MEMORANDA.

HOUSE OF REPRESENTATIVES.

ROBERT CAMPBELL has been elected to fill the vacancy occasioned by the death of *Thomas D. Singleton*, of South Carolina.

THOMAS T. B. BOULDIN, of Virginia, died in his place, in the Hall of the House, on the 11th of February 1834.

PUBLIC BUILDINGS.

WILLIAM NOLAND, of Virginia, has been appointed Commissioner, in place of *Joseph Elgar*.

JUDICIARY.

WILLIAM G. SINGLETON, has been appointed Attorney for the Western District of Virginia, in place of *William A. Harrison*, resigned.

NAVY DEPARTMENT.

MOSES POOR has been appointed Clerk in place of *Thomas R. Miller*, deceased.

PUBLIC LANDS.

The name of ANDREW J. DONELSON, Secretary for signing Land Patents, is incorrectly printed, page 85.

INTERCOURSE WITH FOREIGN NATIONS.

SENOR DON MANUEL CARVALLO has been recognised as Chargé d' Affaires, from the Republic of Chile.

Entered according to Act of Congress, in the year 1834.
BY PETER FORCE,
in the Clerk's Office of the District Court of the District of Columbia.

NATIONAL CALENDAR.

1834.

PRESIDENT OF THE UNITED STATES.

ANDREW JACKSON, of Tennessee, $25,000 per annum.

The President must be thirty-five years of age, fourteen years a resident of the United States, and a natural born citizen or a citizen at the time of the adoption of the Constitution. In case of his removal, death, or resignation, or inability, the duties of his office devolve on the Vice President: and, by act of 1st March, 1792, in case of removal, death, or resignation, or inability both of President and Vice President, the President of the Senate pro tempore, and in case there shall be no President of the Senate, then the Speaker of the House of Representatives, for the time being is to act as President. The legal title of this officer is *The President of the United States;* and he is, by the Constitution, Commander in Chief of the Army and Navy of the United States, and of the Militia of the several States, when called into the service of the United States. He receives ambassadors and other public ministers; and it is his duty to take care that the laws are faithfully executed. He is empowered, with the advice and consent of two thirds of the Senators present, to make treaties; and, by and with the advice of a majority of the Senate, he appoints ambassadors, other public ministers and consuls, judges of the Supreme Court, and all other officers established by law, whose appointments are not otherwise provided for in the Constitution, and the appointment of whom, when of an inferior nature, is not vested by Congress in the President alone, in the courts of law, or in the heads of Departments He commissions all officers of the United States; and may grant reprieves and pardons, except in cases of impeachment. The compensation of the President is 25,000 dollars per annum, which cannot be increased or diminished during the term for which he is elected. His salary was fixed by act of 18th February, 1793. He, as well as the Vice President, is elected by Electors, in the respective States, who are chosen as the Legislatures of the several States may provide.

According to an Act of Congress, of the 1st of March, 1792, the choice of these Electors must be made within thirty-four days preceding the first Wednesday of December, of the year in which an election of the President and Vice President takes place: and they must "be equal to the number of Senators and Representatives to which the several States may by law, be entitled at the time when the President and Vice President thus to be chosen shall come into office. *Provided always,* That where no apportionment of Representatives shall have been made after any enumeration, at the time of choosing electors, then the number of Electors shall be according to the existing apportionment of Senators and Representatives" No Senator or Representative, or person holding an office of trust or profit under the United States, can be appointed an Elector The votes for President and Vice President are given by the Electors on the first Wednesday of December, in every fourth year, throughout the Union.

The Electors meet in their respective States and vote by ballot for President and Vice President, one of whom, at least, shall not be an in-

habitant of the same State with themselves. They vote for President and Vice President separately, by distinct ballots. They make lists of the number of votes given, and of the persons voted for: which they transmit sealed to the seat of the General Government directed to the President of the Senate. who, in the presence of the Senate and House of Representatives, opens all the certificates, and the votes are counted. The person having the greatest number of votes for President is duly elected if such number be a majority, of all the Electors appointed.

If no person have such majority, then from the persons having the highest numbers, not exceding three, in the list of those voted for as President, the House of Representatives shall choose, immediately, by ballot the President. But in choosing the President the votes are taken by States, the Representation from each having ONE vote: a quorum for this purpose consists of a member or members from two thirds of the States, and a majority of all the States is necessary to a choice.

If the House of Representatives shall not choose a President whenever the right of choice devolves upon them, before the fourth of March next following, then the Vice President shall act as President, as in the case of the death or other constitutional disability of the President.

The period of service is four years, but there is no restriction as to re-election. If the offices of President and Vice Presieent should both become vacant, it then becomes the duty of the Secretary of State to communicate information thereof to the Executive of each State, and to cause the same to be published in at least one newspaper in every State, giving two months previous notice that Electors of President shall be appointed or chosen in the several States, within thirty-four days next preceding the first Wednesday in December ensuing, when the choice of President must proceed as usual. The twelfth Presidential term commenced with the twenty-third Congress, on the fourth of March, 1833.

VICE-PRESIDENT OF THE UNITED STATES.

MARTIN VAN BUREN, of New York, $5,000 per annum.

The Vice President is, ex officio, President of the Senate; and as President of the Senate, in virtue of an act of the 8th of May, 1792, one of the Commissioners of the Sinking Fund. His salary of 5,000 dollars per annum, is fixed by the Act of 18th of February, 1793. The Vice President is not a member of the Cabinet. The ordinary duties of this officer is, to preside in the Senate of the United States. When he does not officiate in that station his place is supplied by a President of the Senate pro tempore, who is chosen from the body of Senators by ballot, and receives additional compensation for his services.

The Vice President is elected in the same manner, at the same time, for the same term, and by the same Electors, as the President. But if no person has a majority of the whole number of Electors, then from the two highest numbers in the list, the Senate chooses the Vice President; a quorum for this purpose consists of two-thirds of the whole number of Senators, and a majority of the whole is necessary to a choice.

No person, constitutionally ineligible to the office of President, is eligible to that of Vice President of the United States.

MESSAGE

From the President of the United States, to the two Houses of Congress, at the commencement of the first session of the twenty-third Congress.

FELLOW CITIZENS OF THE SENATE,
AND OF THE HOUSE OF REPRESENTATIVES:

On your assembling to perform the high trust which the people of the United States have confided to you, of legislating for their common welfare, it gives me pleasure to congratulate you upon the happy condition of our beloved country. By the favor of Divine Providence, health is again restored to us: peace reigns without our borders: abundance crowns the labors of our fields: commerce and domestic industry flourish and increase: and individual happiness rewards the private virtue and enterprise of our citizens.

Our condition abroad is no less honorable than it is prosperous at home. Seeking nothing that is not right, and determined to submit to nothing that is wrong, but desiring honest friendship and liberal intercourse with all nations, the United States have gained throughout the world the confidence and respect which are due to the character of the American people, and to a policy so just, and so congenial with the spirit of their institutions.

In bringing to your notice the particular state of our Foreign Affairs, it affords me high gratification to inform you that they are in a condition which promises the continuance of friendship with all nations.

With *Great Britain* the interesting question of our Northeastern boundary remains still undecided. A negotiation, however, upon that subject, has been renewed since the close of the last Congress, and a proposition has been submitted to the British Government with the view of establishing, in conformity with the resolution of the Senate, the line designated by the treaty of 1783. Though no definitive answer has been received, it may be daily looked for, and I entertain a hope that the overture may ultimately lead to a satisfactory adjustment of this important matter.

I have the satisfaction to inform you that a negotiation which, by desire of the House of Representatives, was opened, some years ago, with the British Government, for the erection of light-houses on the Bahamas, has been successful. Those works, when completed, together with those which the United States have constructed on the western side of the Gulf of Florida, will contribute essentially to the safety of navigation in that sea. This joint participation in establishments interesting to humanity and beneficial to commerce, is worthy of two enlightened nations, and indicates feelings which cannot fail to have a happy influence upon their political relations. It is gratifying to the friends of both to perceive that the intercourse between the two people is becoming daily more extensive, and that sentiments of mutual good will have grown up, befitting their common origin, and justifying the hope that, by wise counsels on each side, not only unsettled questions may be satisfactorily terminated, but new causes of misunderstanding prevented.

Notwithstanding that I continue to receive the most amicable assurances from the Government of *France*, and that in all other respects the

most friendly relations exist between the United States and that Government, it is to be regretted that the stipulations of the Convention concluded on the 4th July, 1831, remain, in some important parts, unfulfilled.

By the second article of that Convention, it was stipulated that the sum payable to the United States should be paid at Paris, in six annual instalments, into the hands of such person or persons as should be authorized by the Government of the United States to receive it; and by the same article the first instalment was payable on the second day of February, 1833. By the act of Congress of the 13th July, 1832, it was made the duty of the Secretary of the Treasury to cause the severa instalments, with the interest thereon, to be received from the French Government, and transferred to the United States, in such manner as he may deem best; and by the same act of Congress, the stipulations on the part of the United States, in the Convention, were, in all respects, fulfilled. Not doubting that a treaty thus made, and ratified by the two Governments, and faithfully executed by the United States, would be promptly complied with by the other party, and desiring to avoid the risk and expense of intermediate agencies, the Secretary of the Treasury deemed it advisable to receive and transfer the first instalment by means of a draft upon the French Minister of Finance. A draft for this purpose was accordingly drawn in favor of the Cashier of the Bank of the United States, for the amount accruing to the United States out of the first instalment and the interest payable with it. This bill was not drawn at Washington until five days after the instalment was payable at Paris, and was accompanied by a special authority from the President, authorizing the Cashier, or his assigns, to receive the amount. The mode thus adopted of receiving the instalment, was officially made known to the French Government, by the American Chargé d'Affaires at Paris, pursuant to instructions from the Department of Sta e. The bill, however, though not presented for payment until the twenty-third day of March, was not paid, and for the reason assigned by the French Minister of Finance, that no appropriation had been made by the French Chambers. It is not known to me that, up to that period, any appropriation had been required of the Chambers; and although a communication was subsequently made to the Chambers, by direction of the King, recommending that the necessary provision should be made for carrying the Convention into effect, it was at an advanced period of the session, and the subject was finally postponed until the next meeting of the Chambers.

Notwithstanding it has been supposed by the Frehch ministry that the financial stipulations of the treaty cannot be carried into effect without an appropriation by the Chambers, it appears to me to be not only consistent with the charter of France, but due to the character of both Governments, as well as to the rights of our citizens, to treat the Convention made and ratified, in proper form, as pledging the good faith of the French Government for its execution, and as imposing upon each department an obligation to fulfil it; and I have received assurances through our Chargé d'Affaires at Paris, and the French Minister Plenipotentiary at Washington, and more recently through the Minister of the United States at Paris, that the delay has not proceeded from any indisposition on the part of the King and his Ministers to fulfil the treaty, and

that measures will be presented at the next meeting of the Chambers, and with a reasonable hope of success, to obtain the necessary appropriations.

It is necessary to state, however, that the documents, except certain lists of vessels captured, condemned, or burnt at sea, proper to facilitate the examination and liquidation of the reclamations comprised in the stipulations of the Convention, and which, by the 6th article, France engaged to communicate to the United States by the intermediary of the Legation, though repeatedly applied for by the American Chargé d'Affaires, under instructions from this Government, have not yet been communicated; and this delay, it is apprehended, will necessarily prevent the completion of the duties assigned to the Commissioners, within the time at present prescribed by law.

The reasons for delaying to communicate these documents have not been explicitly stated, and this is the more to be regretted, as it is not understood that the interposition of the Chambers is in any manner required for the delivery of those papers.

Under these circumstances, in a case so important to the interests of our citizens and to the character of our country, and under disappointments so unexpected, I deemed it my duty, however I might respect the general assurances to which I have adverted, no longer to delay the appointment of a Minister Plenipotentiary to Paris, but to despatch him in season to communicate the result of his application to the French Government at an early period of your session. I accordingly appointed a distinguished citizen for this purpose, who proceeded on his mission in August last, and was presented to the King early in the month of October. He is particularly instructed as to all matters connected with the present posture of affairs; and, I indulge the hope that, with the representations he is instructed to make, and from the dispositions manifested by the King and his Ministers, in their recent assurances to our Minister at Paris, the subject will be early considered and satisfactorily disposed of at the next meeting of the Chambers.

As this subject involves important interests, and has attracted a considerable share of the public attention, I have deemed it proper to make this explicit statement of its actual condition; and should I be disappointed in the hope now entertained, the subject will be again brought to the notice of Congress in such manner as the occasion may require.

The friendly relations which have always been maintained between the United States and *Russia*, have been further extended and strengthened by the treaty of navigation and commerce, concluded on the sixth of December last, and sanctioned by the Senate before the close of its last session. The ratifications having been since exchanged, the liberal provisions of the treaty are now in full force; and, under the encouragement which they have secured, a flourishing and increasing commerce, yielding its benefits to the enterprise of both nations, affords to each just recompense of wise measures, and adds new motives for that mutual friendship which the two countries have hitherto cherished towards each other.

It affords me peculiar satisfaction to state that the Government of *Spain* has at length yielded to the justice of the claims which have been so long urged in behalf of our citizens, and has expressed a willingness to provide an indemnification, as soon as the proper amount can be

agreed upon. Upon this latter point, it is probable an understanding had taken place between the Minister of the United States and the Spanish Government before the decease of the late King of Spain; and, unless that event may have delayed its completion, there is reason to hope that it may be in my power to announce to you, early in your present session, the conclusion of a Convention upon terms not less favorable than those entered into for similiar objects with other nations. That act of justice would well accord with the character of Spain, and is due to the United States from their ancient friend. It could not fail to strengthen the sentiments of amity and good will between the two nations which it is so much the wish of the United States to cherish, and so truly the interest of both to maintain.

By the first section of the act of Congress passed on the 13th July, 1832, the tonnage duty on Spanish ships arriving from the ports of Spain, was limited to the duty payable on American vessels in the ports of Spain, previous to the 20th October, 1817, being five cents per ton. The act was intended to give effect, on our side, to an arrangement made with the Spanish Government, by which discriminating duties of tonnage were to be abolished in the ports of the United States and Spain, on the vessels of the two nations. Pursuant to that arrangement, which was carried into effect on the part of Spain, on the 20th of May, 1832, by a royal order dated the 29th April, 1832, American vessels in the ports of Spain have paid five cents per ton, which rate of duty is also paid in those ports by Spanish ships. But, as American vessels pay no tonnage duty in the ports of the United States, the duty of five cents payable in our ports by Spanish vessels, under the act above mentioned, is really a discriminating duty, operating to the disadvantage of Spain. Though no complaint has yet been made on the part of Spain we are not the less bound by the obligation of good faith to remove the discrimination; and I recommend that the act be amended accordingly. As the royal order, above alluded to, includes the ports of the Balearic and Canary Islands, as well as those of Spain, it would seem that the provisions of the act of Congress should be equally extensive; and that for the repayment of such duties as may have been improperly received, an addition should be made to the sum appropriated at the last session of Congress for refunding discriminating duties.

As the arrangement referred to, however, did not embrace the Islands of Cuba and Porto Rico. discriminating duties, to the prejudice of American shipping, continue to be levied there. From the extent of the commerce carried on between the United States and those Islands, particularly the former, this discrimination causes serious injury to one of those great national interests which it has been considered an essential part of our policy to cherish, and has given rise to complaints on the part of our merchants. Under instrctions given to our Minister at Madrid, earnest representations have been made by him to the Spanish Government upon this subject, and there is reason to expect, from the friendly disposition which is entertained towards this country, that a beneficial change will be produced. The disadvantage, however, to which our shipping is subjected by the operation of these discriminating duties, requires that they be met by suitable countervailing duties during your present session—power being at the same time vested in the President to modify or dis

continue them as the discriminating duties on American vessels or their cargoes may be modified or discontinued at those Islands. Intimations have been given to the Spanish Government, that the United States may be obliged to resort to such a measure as one of necessary self defence; and there is no reason to apprehend that it would be unfavorably received. The proposed proceeding, if adopted, would not be permitted, however, in any degree to induce a relaxation in the efforts of our Minister to effect a repeal of this inequality, by friendly negociations; and it might serve to give force to his representations, by showing the dangers to which that valuable trade is exposed by the obstructions and burthens which a system of discriminating and countervailing duties necessarily produces.

The selection and preparation of the Florida archives, for the purpose of being delivered over to the United States, in conformity with the Royal order, as mentioned in my last annual Message, though in progress, has not yet been completed. This delay has been produced, partly by causes which were unavoidable, particularly the prevalence of cholera at Havanna; but measures have been taken which it is believed will expedite the delivery of those important records.

Congress were informed, at the opening of the last session, that, "owing, as was alleged, to embarrassments in the finances of *Portugal*, consequent upon the civil war in which that nation was engaged," payment had been made of only one instalment of the amount which the Portuguese Government had stipulated to pay for indemnifying our citizens for property illegally captured in the blockade to Terceira. Since that time, a postponement for two years, with interest of the two remaining instalments, was requested by the Portuguese Government; and, as a consideration, it is offered to stipulate that rice of the United States should be admitted into Portugal at the same duties as Brazilian rice. Being satisfied that no better arrangement could be made, my consent was given; and a royal order of the King of Portugal was accordingly issued on the 4th of February last for the reduction of the duty on rice of the United States. It would give me great pleasure if, in speaking of that country, in whose prosperity the United States are so much interested, and with whom a long subsisting, extensive, and mutually advantageous commercial intercourse has strengthened the relations of friendship, I could announce to you the restoration of its internal tranquillity.

Subsequently to the commencement of the last session of Congress the final instalment payable by *Denmark*, under the Convention of the 28th day of March, 1830, was received. The Commissioners for examining the claims have since terminated their labors, and their awards have been paid at the Treasury as they have been called for. The justice rendered to our citizens by the Government is thus completed, and a pledge is thereby afforded for the maintenance of that friendly intercourse becoming the relations that the two nations bear to each other.

It is satisfactory to inform you that the Danish Government have recently issued an ordinance by which the commerce with the Island of St. Croix is placed on a more liberal footing than heretofore. This change cannot fail to prove beneficial to the trade between the United States and that colony; and the advantages likely to flow from it may lead to greater relaxations in the colonial systems of other nations

The ratifications of the Convention with the King of the *Two Sicilies* have been duly exchanged, and the Commissioners appointed for examining the claims under it have entered upon the duties assigned to them by law. The friendship that the interests of the two nations require of them, being now established, it may be hoped that each will enjoy the benefits which a liberal commerce should yield to both.

A treaty of amity and commerce between the United States and *Belgium* was concluded during the last winter, and received the sanction of the Senate; but the exchange of the ratifications has been hitherto delayed, in consequence, in the first instance, of some delay in the reception of the treaty at Brussels, and, subsequently, of the absence of Belgian Minister of Foreign Affairs, at the important conferences in which his Government is engaged at London.

That treaty does but embody those enlarged principles of friendly policy, which, it is sincerely hoped, will always regulate the conduct of the two nations, having such strong motives to maintain amicable relations towards each other, and so sincerely desirous to cherish them.

With all the other *European Powers* with whom the United States have formed diplomatic relations, and with the *Sublime Porte*, the best understanding prevails. From all, I continue to receive assurances of good will towards the United States—assurances which it gives me no less pleasure to reciprocate than to receive. With all, the engagements which have been entered into, are fulfilled with good faith on both sides. Measures have also been taken to enlarge our friendly relations and extend our commercial intercourse with other states. The system we have pursued of aiming at no exclusive advantages, of dealing with all on terms of fair and equal reciprocity, and of adhering scrupulously to all our engagements, is well calculated to give success to efforts intended to be mutually beneficial.

The wars, of which the Southern part of this continent was so long the theatre, and which were carried on either by the mother country against the States which had formerly been her colonies, or by the States against each other, having terminated, and their civil dissensions having so far subsided, as, with few exceptions, no longer to disturb the public tranquillity, it is earnestly hoped those States will be able to employ themselves without interruption in perfecting their institutions, cultivating the arts of peace, and promoting, by wise counsels and able exertions, the public and private prosperity which their patriotic struggles so well entitle them to enjoy.

With those States our relations have undergone but little change during the present year. No re-union having yet taken place between the States which composed the *Republic of Colombia*, our Charge d'Affaires at Bogota has been accredited to the Government of *New Granada*, and we have therefore no diplomatic relations with *Venezuela* and *Equator*, except as they may be included in those heretofore formed with the Colombian Republic. It is understood that Representatives from the three States were about to assemble at Bogota to confer on the subject of their mutual interests, particularly that of their union; and if the result should render it necessary, measures will be taken on our part to preserve with each that friendship and those liberal commercial connexions, which it has been the constant desire of the United States to cul-

vate with their sister republics of this hemisphere. Until the important question of re-union shall be settled, however, the different matters which have been under discussion between the United States and the Republic of Colombia, or either of the States which composed it, are not likely to be brought to a satisfactory issue.

In consequence of the illness of the Chargé d'Affaires appointed to *Central America* at the last session of Congress, he was prevented from proceeding on his mission until the month of October. It is hoped, however, that he is by this time at his post, and that the official intercourse, unfortunately so long interrupted, has been thus renewed on the part of the two nations so amicably and advantageously connected by engagements founded on the most enlarged principles of commercial reciprocity.

It is gratifying to state that since my last annual message, some of the most important claims of our fellow-citizens upon the Government of *Brazil* have been satisfactorily adjusted, and a reliance is placed on the friendly dispositions manifested by it that justice will also be done in others. No new causes of complaint have arisen; and the trade between the two countries flourishes under the encouragement secured to it by the liberal provisions of the treaty.

It is cause of regret, that, owing probably to the civil dissensions which have occupied the attention of the *Mexican* Government, the time fixed by the treaty of limits with the United States for the meeting of the Commissioners to define the boundaries between the two nations, has been suffered to expire without the appointment of any Commissioner on the part of that Government. While the true boundary remains in doubt by either party, it is difficult to give effect to those measures which are necessary to the protection and quiet of our numerous citizens residing near that frontier. The subject is one of great solicitude to the United States, and will not fail to receive my earnest attention.

The treaty concluded with *Chili* and approved by the Senate at its last session, was also ratified by the Chilian Government, but with certain additional and explanatory articles of a nature to have required it to be again submitted to the Senate. The time limited for the exchange of the ratifications, however, having since expired, the action of both Governments on the treaty will again become necessary.

The negotiations commenced with the *Argentine Republic*, relative to the outrages committed on our vessels engaged in the fisheries at the Falkland Islands, by persons acting under the color of its authority, as well as the other matters in controversy between the two Governments, have been suspended by the departure of the Chargé d'Affaires of the United States from Buenos Ayres. It is understood, however, that a Minister was subsequently appointed by that Government to renew the negotiation in the United States, but, though daily expected, he has not arrived in this country.

With *Peru* no treaty has yet been formed, and with *Bolivia* no diplomatic intercourse has yet been established. It will be my endeavor to encourage those sentiments of amity and that liberal commerce which belong to the relations in which all the independent States of this continent stand towards each other.

I deem it proper to recommend to your notice the revision of our *Consular System*. This has become an important branch of the public service,

inasmuch as it is intimately connected with the preservation of our national character abroad, with the interest of our citizens in foreign countries, with the regulation and care of our commerce, and with the protection of our seamen. At the close of the last session of Congress I communicated a report from the Secretary of the State upon the subject, to which I now refer, as containing information which may be useful in any inquiries that Congress may see fit to institute with a view to a salutary reform of the system.

It gives me great pleasure to congratulate you upon the prosperous condition of the *Finances* of the country, as will appear from the report which the Secretary of the Treasury will, in due time, lay before you. The receipts into the Treasury during the present year will amount to more than thirty-two millions of dollars. The revenue derived from customs will, it is believed, be more than twenty-eight millions, and the public lands will yield about three millions. The expenditures within the year for all objects, including $2,572,240 99 on account of the public debt, will not amount to twenty-five millions: and a large balance will remain in the Treasury after satisfying all the appropriations chargeable on the revenue for the present year.

The measures taken by the Secretary of the Treasury will probably enable him to pay off, in the course of the present year, the residue of the exchanged four-and-a-half per cent. stock, redeemable on the 1st of January next. It has, therefore, been included in the estimated expenditure of this year, and forms a part of the sum above stated to have been paid on account of the public debt. The payment of this stock will reduce the whole debt of the United States, funded and unfunded, to the sum of $4,760,082 08. And as a provision has already been made for the four-and-a-half per cent. abovementioned, and charged in the expenses of the present year, the sum last stated is all that now remains of the national debt; and the revenue of the coming year, together with the balance now in the Treasury, will be sufficient to discharge it, after meeting the current expenses of the Government. Under the power given to the Commissioners of the Sinking Fund, it will, I have no doubt, be purchased on favorable terms within the year.

From this view of the state of the finances, and the public engagements yet to be fulfilled, you will perceive that, if Providence permits me to meet you at another session, I shall have the high gratification of announcing to you that the national debt is extinguished. I cannot refrain from expressing the pleasure I feel at the near approach of that desirable event. The short period of time within which the public debt will have been discharged, is strong evidence of the abundant resources of the country, and of the prudence and economy with which the Government has heretofore been administered. We have waged two wars since we became a nation, with one of the most powerful kingdoms in the world—both of them undertaken in defence of our dearest rights—both successfully prosecuted and honorably terminated—and many of those who partook in the first struggle, as well as the second, will have lived to see the last item of the debt incurred in these necessary but expensive conflicts, faithfully and honestly discharged—and we shall have the proud satisfaction of bequeathing to the public servants who follow us in the administration of the Government, the rare blessing of a revenue sufficiently

abundant—raised without injustice or oppression to our citizens, and unincumbered with any burthens but what they themselves shall think proper to impose upon it

The flourishing state of the finances ought not, however, to encourage us to indulge in a lavish expenditure of the public treasure. The receipts of the present year do not furnish the test by which we are to estimate the income of the next. The changes made in our revenue system by the acts of Congress of 1832 and 1833, and more especially by the former, have swelled the receipts of the present year far beyond the amount to be expected in future years upon the reduced tariff of duties. The shortened credits on the revenue bonds, and the cash duties on woollens which were introduced by the act of 1832, and took effect on the 4th of March last, have brought large sums into the Treasury, in 1833, which, according to the credits formerly given, would not have been payable until 1834, and would have formed a part of the income for that year. These causes would of themselves produce a great diminution of the receipts in the year 1834, as compared with the present one, and they will be still more diminished by the reduced rates of duties, which take place on the 1st of January next, on some of the most important and productive articles. Upon the best estimates that can be made, the receipts of the next year, with the aid of the unappropriated amount now in the Treasury, will not be much more than sufficient to meet the expenses of the year and pay the small remnant of the national debt which yet remains unsatisfied. I cannot, therefore, recommend to you any alteration in the present tariff of duties The rate as now fixed by law on the various articles was adopted at the last session of Congress as a matter of compromise with unusual unanimity, and unless it is found to produce more than the necessites of the Government call for, there would seem to be no reason at this time to justify a change.

But, while I forbear to recommend any further reduction of the duties, beyond that already provided for by the existing laws, I must earnestly and respectfully press upon Congress the importance of abstaining from all appropriations which are not absolutely required for the public interests, and authorized by the powers clearly delegated to the United States. We are beginning a new era in our Government. The national debt, which has so long been a burthen on the Treasury, will be finally discharged in the course of the ensuing year. No more money will afterwards be needed than what may be necessary to meet the ordinary expenses of the Government. Now then is the proper moment to fix our system of expenditure on firm and durable principles: and I cannot too strongly urge the necessity of a rigid economy, and an inflexible determination not to enlarge the income beyond the real necessities of the Government, and not to increase the wants of the Government by unnecessary and profuse expenditures. If a contrary course should be pursued, it may happen that the revenue of 1834 will fall short of the demands upon it: and after reducing the tariff in order to lighten the burthens of the people, and providing for a still further reduction to take effect hereafter, it would be much to be deplored if, at the end of another year, we should find ourselves obliged to retrace our steps and impose additional taxes to meet unnecessary expenditures.

It is my duty, on this occasion, to call your attention to the destruc-

tion of the public building occupied by the Treasury Department, which happened since the last adjournment of Congress. A thorough inquiry into the causes of this loss was directed and made at the time, the result of which will be duly communicated to you. I take pleasure, however, in stating here, that, by the laudable exertions of the officers of the Department, and many of the citizens of the District, but few papers were lost, and none that will materially affect the public interest.

The public convenience requires that another building should be erected as soon as practicable; and providing for it, it will be advisable to enlarge, in some manner, the accommodations for the public officers of the several Departments, and to authorize the erection of suitable depositories for the safe keeping of the public documents and records.

Since the last adjournment of Congress, the Secretary of the Treasury has directed the money of the United States to be deposited in certain State banks, designated by him, and he will immediately lay before you his reasons for this direction. I concur with him entirely in the view he has taken of the subject; and, some months before the removal, I urged upon the Department the propriety of taking that step. The near approach of the day on which the charter will expire, as well as the conduct of the bank, appeared to me to call for this measure, upon the high consideration of public interest and public duty. The extent of its misconduct, however, although known to be great, was not at that time fully developed by proof. It was not until late in the month of August, that I received from the Government Directors an official report, establishing beyond question that this great and powerful institution had been actively engaged in attempting to influence the elections of the public officers, by means of its money; and that, in violation of the express provisions of its charter, it had, by a formal resolution, placed its funds at the disposition of its President to be employed in sustaining the political power of the bank. A copy of this resolution is contained in the report of the Government Directors, before referred to; and, however the objects may be disguised by cautious language, no one can doubt that this money was in truth intended for electioneering purposes, and the particular uses to which it was proved to have been applied, abundantly show that it was so understood. Not only was the evidence complete, as to the past application of the money and power of the bank, to electioneering purposes, but that the resolution of the Board of Direcctors authorized the same course to be pursued in future.

It being thus established by unquestionable proof that the Bank of the United States was converted into a permanent electioneering engine, it appeared to me that the path of duty which the Executive Department of the Goverment ought to pursue, was not doubtful. As, by the terms of the bank charter, no officer but the Secretary of the Treasury could remove the deposites, it seemed to me that authority ought to be at once exerted, to deprive that great corporation of the support and countenance of the Government in such a use of its funds and such an exertion of its power. In this point of the case, the question is distinctly presented, whether the people of the United States are to govern through representatives chosen by their unbiassed suffrages, or whether the power and money of a great coporation are to be secretly exerted to influence their judgment, and control their decisions. It must now be determined whether the bank is

to have its candidates for all offices in the country, from the highest to the lowest, or whether candidates on both sides of political questions shall be brought forward as heretofore, and supported by the usual means.

At this time the efforts of the Bank to control public opinion through the distresses of some and the fears of others, are equally apparent, and, if possible, more objectionable. By a curtailment of its accommodations more rapid than any emergency requires, and even while it retains specie to an almost unprecedented amount in its vaults, it is attempting to produce great embarrassment in one portion of the community, while, through presses known to have been sustained by its money, it attempts, by unfounded alarms, to create a panic in all.

These are the means by which it seems to expect that it can force a restoration of the deposites, and as a necessary consequence, extort from Congress a renewal of its charter. I am happy to know that, through the good sense of our People, the effort to get up a panic has hitherto failed, and that, through the increased accommodations which the State Banks have been enabled to afford, no public distress has followed the exertions of the Bank; and it cannot be doubted that the exercise of its power, and the expenditure of its money, as well as its efforts to spread groundless alarm, will be met and rebuked as they deserve. In my own sphere of duty, I should feel myself called on by the facts disclosed to order a *scire facias* against the Bank, with a view to put an end to the chartered rights it has so palpably violated, were it not that the charter itself will expire as soon as a decision would probably be obtained from the court of last resort

I called the attention of Congress to this subject in my last Annual Message, and informed them that such measures as were within the reach of the Secretary of the Treasury, had been taken to enable him to judge whether the public deposites in the Bank of the United States were entirely safe; but that as his single powers might be inadequate to the object, I recommended the subject to Congress, as worthy of their serious investigation: declaring it as my opinion that an inquiry into the transactions of that institution, embracing the Branches as well as the principal Bank, was called for by the credit which was given throughout the country to many serious charges impeaching their character, and which, if true, might justly excite the apprehension that they were no longer a safe depository for the public money. The extent to which the examination, thus recommended, was gone into, is spread upon your journals, and is too well known to require to be stated. Such as was made resulted in a report from a majority of the Committee of Ways and Means, touching certain specified points only, concluding with a resolution that the Government deposites might safely be continued in the Bank of the United States. This resolution was adopted at the close of the session, by the vote of a majority of the House of Representatives.

Although I may not always be able to concur in the views of the public interest, or the duties of its agents, which may be taken by the other departments of the Government, or either of its branches, I am, notwithstanding, wholly incapable of receiving otherwise than with the most sincere respect, all opinions or suggestions proceeding from such a source; and in respect to none am I more inclined to do so, than to the House of Representatives. But it will be seen, from the brief views at this time

taken of the subject by myself, as well as the more ample ones presented by the Secretary of the Treasury that the change in the deposites which has been ordered has been deemed to be called for by considerations which are not affected by the procedings referred to, and which, if correctly viewed by that department, rendered its act a matter of imperious duty.

Coming as you do, for the most part, immediately from the People and the States, by election, and possessing the fullest opportunity to know their sentiments, the present Congress will be sincerely solicitous to carry into full and fair effect the will of their constituents in regard to this institution. It will be for these in whose behalf we all act, to decide whether the Executive Department of the Government, in the steps which it has taken on this subject, has been found in the line of its duty.

The accompanying report of the Secretary of War, with the documents annexed to it, exhibit the operations of the *War Department* for the past year, and the condition of the various subjects entrusted to its administration.

It will be seen from them that the Army maintains the character it has heretofore acquired for efficiency and military knowledge. Nothing has occurred since your last session to require its services beyond the ordinary routine of duties, which upon the seaboard and the inland frontier devolve upon it in a time of peace. The system, so wisely adopted and so long pursued, of constructing fortifications at exposed points, and of preparing and collecting the supplies necessary for the military defence of the country, and thus providently furnishing in peace the means of defence in war, has been continued with the usual results. I recommend to your consideration the various subjects suggested in the report of the Secretary of War. Their adoption would promote the public service and meliorate the condition of the army.

Our relations with the various *Indian Tribes* have been undisturbed since the termination of the difficulties growing out of the hostile aggressions of the Sacs and Fox Indians, Several treaties have been formed for the relinquishment of territory to the United States, and for the migration of the occupants to the region assigned for their residence west of the Mississippi. Should these treaties be ratified by the Senate, provision will have been made for the removal of almost all the tribes now remaining east of that river, and for the termination of many difficult and embarrassing questions arising out of their anomalous political condition. It is to be hoped that those portions of two of the southern tribes which in that event will present the only remaining difficulties, will realize the necessity of emigration, and will speedily resort to it. My original convictions upon this subject have been confirmed by the course of events for several years, and experience is every day adding to their strength. That those tribes cannot exist, surrounded by our settlements and in continual contact with our citizens, is certain. They have neither the industry, the moral habits, nor the desire of improvement, which are essential to any favorable change in their condition. Established in the midst of another and a superior race, and without appreciating the causes of their inferiority, or seeking to control them, they must necessarily yield to the force of circumstances, and ere long disappear. Such has been their fate heretofore, and if it is to be averted, and it is, it can only be done by a general removal beyond our boundary and by the re organiza-

tion of their political system upon principles adopted to the new relations in which they will be placed. The experiment which has been recently made, has so far proved successful. The emigrants generally are represented to be prosperous and contented, the country suitable to their wants and habits, and the essential articles of subsistence easily procured. When the report of the commissioners now engaged in investigating the condition and prospects of these Indians, and in devising a plan for their intercourse and government is received. I trust ample means of information will be in possession of the Government for adjusting all the unsettled questions connected with this interesting subject.

The operations of the Navy during the year, and its present condition, are fully exhibited in the annual report from the *Navy Department*.

Suggestions are made by the Secretary of various improvements, which deserve careful consideration, and most of which, if adopted, bid fair to promote the efficiency of this important branch of the public service. Among these are the new organization of the Navy Board, the revision of the pay to officers, and a change in the period of time, or in the manner of making annual appropriations, to which I beg leave to call your particular attention.

The views which are presented on almost every portion of our Naval concerns, and especially on the amount of force and the number of officers, and the general course of policy appropriate in the present state of our country, for securing the great and useful purposes of naval protection, in peace, and due preparation for the contingencies of war, meet with my entire approbation.

It will be perceived from the report referred to, that the fiscal concerns of the establishment are in an excellent condition; and it is hoped that Congress may feel disposed to make promptly every suitable provision desired, either for preserving or improving the system.

The *General Post Office Department* has continued, upon the strength of its own resources, to facilitate the means of communication between the various portions of the Union with increased activity. The method, however, in which the accounts of he transportation of the mail have always been kept, appears to have presented an imperfect view of its expenses. It has recently been discovered that, from the earliest records of the Department, the annual statements have been calculated to exhibit an amount considerably short of the actual expense incurred for that service. These illusory statements, together with the expense of carrying into effect the law of the last session of Congress, establishing new mail routes, and a disposition on the part of the Head of the Department to gratify the wishes of the Public in the extension of the mail facilities, have induced him to incur responsibilities for their improvement, beyond what the current resources of the Department would sustain. As soon as he had discovered the imperfection of the method, he caused an investigation to be made of its results, and applied the proper remedy to correct the evil. It became necessary for him to withdraw some of the improvements which he had made, to bring the expenses of the Department within its own resources. These expenses were incurred for the public good, and the Public have enjoyed their benefit. They are now but partially suspended, and that where they may be discontinued with the least inconvenience to the country.

The progressive increase in the income from postages has equalled the highest expectations, and it affords demonstrative evidence of the growing importance and great utility of this Department. The details are exhibited in the accompanying report from the Postmaster General.

The many distressing accidents which have of late occurred in that portion of our navigation carried on by the use of steam power, deserve the immediate and unremitting attention of the constituted authorities of the country. The fact that the number of those fatal disasters is constantly increasing, notwithstanding the great improvements which are every where made in the machinery employed, and in the rapid advances which have been made in that branch of science, show very clearly that they are in a great degree the result of criminal negligence on the part of those by whom the vessels are navigated, and to whose care and attention the lives and property of our citizens are so extensively entrusted

That these evils may be greatly lessened, if not substantially removed, by means of precautionary and penal legislation, seems to be highly probable; so far therefore as the subject can be regarded as within the constitutional purview of Congress, I earnestly recommend it to your prompt and serious consideration.

I would also call your attention to the views I have heretofore expressed of the propriety of amending the Constitution in relation to the mode of electing the President of the United States. Regarding it as all-important to the future quiet and harmony of the people, that every intermediate agency in the election of these officers should be removed, and that their eligibility should be limited to one term of either four or six years, I cannot too earnestly invite your consideration of the subject.

Trusting that your deliberations on all the topics of general interest to which I have adverted, and such others as your more extensive knowledge of the wants of our beloved country may suggest, may be crowned with success, I tender you, in conclusion, the co-operation which it may be in my power to afford them.

December 4th, 1833. ANDREW JACKSON.

THE CONGRESS.

The Congress of the United States consists of the Senate and House of Representatives; the former composed of forty eight in number, the latter of two hundred and forty three, of whom three are delegates.

There are two Senators from each State. They were originally divided into three classes, and one third of them are chosen every second year for the term of six years. They are chosen by the *Legislatures* of the States.

The Senate have upon all nominations by the President of the United States, a voice of advice and consent, or otherwise; in which case it sits with closed doors. The journal of its proceedings is then secret. They have also a vote in the ratification of treaties; in which case it is indispensable that two thirds of them should consent. The Senate is also a court for the trial of high crimes and misdemeanors, upon impeachments by the House of Representatives.

The Vice President of the United States is, by the constitution, the

President of the Senate, in which body he has only a casting vote, which is given in case of an equal division of the votes of the Senators. The Vice President of the United States, when he acts as President of the Senate, receives no addition to his pay as Vice President, which is $5,000 per annum. In his absence a President *pro tempore* is chosen, who, during the period of his services, receives $16 per diem for every day he attends

The House of Representatives is composed of members chosen every second year by the *People* of the several States; and the election in each State must have the qualifications requisite for electors of the most numerous branch of the State Legislature.

Representatives are apportioned among the several States according to their respective numbers, which are determined by adding to the whole number of free persons, including those bound to service for a term of years, and excluding Indians not taxed, three-fifths of all other persons. An enumeration of the inhabitants of the United States must be made every ten years. The first enumeration was made in 1790, the fifth in 1830.

The Speaker of the House of Representatives is chosen by a majority of the members of the House, for the term of the Congress to which he belongs as member of the House. His privileges are the same as those of any other member; and his compensation is $16 per diem.

The Congress must assemble, at least once in every year on the first Monday in December, if not otherwise provided by law. The President of the United States may convene them at any time upon giving forty days notice. Neither House can adjourn for more than three days, without the consent of the other, nor to any other place than that in which the two Houses shall be sitting. In case of disagreement about the time, the President of the United States may adjourn them to such time as he thinks proper. The Senate and House each form their own rules, and are, respectively, judges of their own election.

Senators, when elected, must be thirty years of age; and Representatives twenty five years; and each Senator and Representative, must, when elected, be an inhabitant of the State in which he shall be chosen

The times, places, and manner of holding elections for Senators and Representatives, is prescribed in each State by the Legislature thereof; but the Congress may, at any time by law, make or alter such regulations, except as to the places of choosing Senators.

Both Senators and Representatives are, in all cases except treason, felony, and breach of the peace, privileged from arrest during their attendance at the Session of their respective Houses, and in going to or returning from, the same; and for any speech or debate in either House, they cannot be questioned in any other place. Bills for raising revenue must originate in the House; and the House solely has the power of impeachment.

No Member of Congress, can, during the time for which he was elected, be appointed to any civil office under the authority of the United States, which shall have been created, or the emoluments whereof shall have been increased, during such time; and no person holding any office under the United States, can be a member of either House during his continuance in office; nor can he be concerned either directly or indirectly, in whole, or in part, in any contract, &c. with the United States.

SENATE OF THE UNITED STATES.

First Session, Twenty-Third Congress.

MARTIN VAN BUREN, of New-York, Vice President of the United States, and President of the Senate.

COMMITTEES OF THE SENATE.

There are twenty Standing Committees in the Senate, appointed at the commencement of each Session of Congress: eighteen consist of five members, and two of three members each. In the appointment of the Standing Committees, the Senate proceeds by ballot, severally, to appoint the Chairman of each Committee, and then, by ballot, the other members necessary to complete the same; and a majority of the whole number of votes given, is necessary to the choice of a Chairman of a Standing Committee. All other Committees are appointed by ballot, and a plurality of votes makes a choice. All Bills on a second reading are considered by the Senate in the same manner *as if the Senate were in Committee of the whole*, before they can be taken up and proceeded on by the Senate, unless otherwise ordered.

STANDING COMMITTEES OF THE SENATE.

1. *Foreign Relations.*—Mr. WILKINS, Chairman. Messrs Rives, Forsyth, Sprague, and Mangum.
2. *Finance.*—Mr. WEBSTER, Chairman Messrs. Tyler, Ewing, Wilkins and Mangum.
3. *Commerce.*—Mr SILSBEE, Chairman. Messrs. King, of Alabama, Wright, Waggaman and Sprague.
4. *Manufactures.*—Mr. FRELINGHUYSEN, Ch'n. Messrs Knight, Morris, Linn, and Prentiss.
5. *Agriculture*—Mr. BROWN, Ch'n Messrs. Robinson, Kent, Wright, and Swift.
6. *Military Affairs.*—Mr. BENTON, Chairman. Messrs Tipton, Preston, Clayton, and King.
7. *Militia*—Mr. ROBINSON, Ch'n. Messrs Hendricks, Waggaman, M'Kean and Clayton.
8. *Naval Affairs.*—Mr. SOUTHARD, Chairman Messrs. Bibb, Robbins, Tallmadge and Chambers
9. *Public Lands.*—Mr. POINDEXTER, Chairman. Messrs Moore, Prentiss, M'Kean and Clay
10. *Private Land Claims.*—Mr. KANE, Chairman. Messrs Linn, Naudain, Poindexter and Silsbee.
11. *Indian Affairs.*—Mr WHITE, Chairman. Messrs Frelinghuysen, Tipton, Smith and Swift.
12. *Claims*—Mr BELL, Chairman Messrs Brown, Naudain, Wright and Tipton.
13. *Judiciary.*—Mr. CLAYTON, Chairman. Messrs Bibb, Preston, Smith and Bell.
14. *Post Office and Post Roads.*—Mr GRUNDY, Chairman Messrs Ewing, Rives, Clayton and Knight.
15. *Roads and Canals.*—Mr HENDRICKS, Chairman. Messrs Hill, Southard, Shepley and Kent.
16. *Pensions*—Mr. TOMLINSON, Ch'n Messrs Prentiss, M'Kean, Tallmadge and Kane.
17. *Revolutionary Claims.*—Mr. MOORE, Ch'n. Messrs Smith, Hill, White and Shepley.
18. *District of Columbia*—Mr. CHAMBERS, Ch'n. Messrs Tyler, Southard Bibb and Tomlinson
19. *Contingent Expenses of Senate.*—Mr KNIGHT, Chairman. Messrs Tomlinson and Tallmadge
20. *Engrossed Bills.*—Mr. SHEPLEY, Chairman. Messrs Morris and Robinson.

SELECT COMMITTEES.

French Spoliations prior to 1800.—Messrs WEBSTER, Preston, Chambers, Grundy, and Prentiss.

Contested Seat in Senate.—Messrs. POINDEXTER, Rives, Frelinghuysen Wright and Sprague.

The *Joint Committee on the Library*, consists of Messrs. *Robbins*, *Poindexter*, and *Bibb*, on the part of the Senate, and Messrs. *E Everett*, *Wayne*, and *Loyall*, on the part of the House of Representatives.

COMMITTEES OF THE HOUSE OF REPRESENTATIVES.

All Committees are appointed by the Speaker, unless otherwise specially directed by the House, in which case they are appointed by ballot; and if upon the first ballot, the number required shall not be elected by a majority of all the votes given, the House then proceeds to a second ballot, when a plurality of votes prevails. There are twenty-nine Standing Committees in the House of Representatives; twenty one consisting of nine members, and eight of five members each. Twenty-three of these Committees are appointed at the commencement of each Session, and continue for one session only; six are appointed at the commencement of each Congress, and continue to the first session of the succeeding Congress. All the standing Committees have leave to report by bill or otherwise, upon any matter committed to them. The Standing Committees are—

1. A Committee of Elections, to examine and report upon the certificates of election, or other credentials, of the members returned to serve in the House, and to take into their consideration all petitions, and other matters touching elections and returns.

2. A Committee of Ways and Means, to take into consideration reports of the Treasury Department, and all propositions relative to the revenue; to inquire into the state of the public debt or the revenue, and of the expenditure; to examine into the state of the several public Departments, and particularly into the laws making appropriations of moneys; and to report whether the moneys have been disbursed conformably with such laws; and, also, to report, from time to time, such provisions and arrangements as may be necessary to add to the economy of the Departments, and the accountability of their officers. In preparing bills of appropriation for other objects, the Committee of Ways and Means must not include appropriations for carrying into effect treaties made by the United States; and, where an appropriation bill shall be referred to them, which contains appropriations for carrying a treaty into effect, and for other objects, they are to propose such amendments as shall prevent appropriations for carrying a treaty into effect being included in the same bill with appropriations for other objects.

3 A Committee of Claims, to take into consideration all petitions and matters or things touching claims and demands on the United States.

4 A Committee on Commerce, to take into consideration all petitions and matters or things touching the commerce of the United States.

5. A Committee on the Public Lands, to take into consideration all petitions and matters or things respecting the lands of the United States.

6. A Committee on Post Offices and Post Roads, to take into consideration all petitions and matters or things touching the post office and post roads.

7. A Committee for the District of Columbia, to take into consideration all petitions, matters, or things, touching the said District.

8. A Committee on the Judiciary, to take into consideration all petitions and matters or things touching judicial proceedings.

9. A Committee on Revolutionary Claims, to take into consideration all petitions and matters or things touching claims and demands originating in the revolutionary war, or arising therefrom.

10 A Committee on Public Expenditures, to examine into the state of

the several public Departments, and particularly into laws making appropriations of moneys, and to report whether the moneys have been disbursed conformably with such laws; and, also, to report, from time to time, such provisions and arrangements as may be necessary to add to the economy of the Departments, and the accountability of their officers.

11. A Committee on Private Land Claims, to take into consideration all claims to land.

12. A Committee on Manufactures.
13. A Committee on Agriculture.
14. A Committee on Indian Affairs.

The rules of the House assign no special duties to these Committees.

15. A Committee on Military Affairs, to take into consideration all subjects relating to the military establishment and public defence; and, also, to report, from time to time, such measures as may contribute to economy and accountability in the said establishment.

16. A Committee on Naval Affairs, to take into consideration all matters which concern the naval establishment; and, also to report, from time to time, such measures as may contribute to economy and accountability in the said establishment.

17. A Committee on Foreign Affairs, to take into consideration all matters which concern the relations of the United States with foreign nations.

18. A Committee on the Territories, to examine into their legislative, civil, and criminal proceedings, and to devise and report to the House such means as, in their opinion, may be necessary to secure the rights and privileges of residents and non-residents.

19. A Committee on Revolutionary Pensions, to take into consideration all matters respecting pensions for services in the revolutionary war, other than Invalid Pensions.

20. A Committee on Invalid Pensions, to take into consideration all matters respecting Invalid Pensions.

21. A Committee on Roads and Canals, to take into consideration all petitions and matters or things relating to roads and canals, and the improvement of the navigation of rivers.

22. A Committee of Revisal and Unfinished Business, to examine and report what laws have expired, or are near expiring and require to be revived or further continued; also, to examine and report from the Journal of last session, all such matters as were then depending and undetermined.

23. A Committee of Accounts, to superintend and control the expenditures of the contingent fund of the House of Representatives, and to audit and settle all accounts which may be charged thereon; and also to audit the accounts of the members for their travel to and from the Seat of Government, and their attendance in the House.

Committees on so much of the Public Accounts and Expenditures—

24. As relate to the Department of State;
25. As relate to the Treasury Department;
26. As relate to the Department of War;
27. As relate to the Department of the Navy;
28. As relate to the Post Office; and
29. As relate to the Public Buildings.

These six Committees are appointed at the commencement of a Congress, and continue to the 1st Sess. of succeeding Congress.

It is the duty of the six foregoing Committees to examine into the state of the accounts and expenditures respectively submitted to them, and to

inquire and report particularly—Whether the expenditures of the respective Departments are justified by law: Whether the claims from time to time satisfied and discharged by the respective Departments are supported by sufficient vouchers, establishing their justness both as to their character and amount: Whether such claims have been discharged out of funds appropriated therefor; and whether all moneys have been disbursed in conformity with appropriation laws: and whether any, and what provisions are necessary to be adopted, to provide more perfectly for the proper application of the public moneys, and to secure the Government from demands unjust in their character, or extravagant in their amount. And it is, moreover, the duty of the said Committees to report, from time to time, whether any, and what, retrenchment can be made in the expenditures of the several Departments, without detriment to the public service; whether any, and what, abuses at any time exist in the failure to enforce the payment of moneys which may be due to the United States from public defaulters or others; and to report, from time to time, such provisions and arrangements as may be necessary to add to the economy of the several Departments, and the accountability of their officers.

STANDING COMMITTEES OF THE HOUSE OF REPRESENTATIVES.

(The Chairman is the first named on each Committee.)

1. *On Elections.*—Messrs. Claiborne, Griffin, Hawkins, of N. C. Banks, Vanderpoel, Jones, of Ga. Peyton, Hamer and Hannegan.

6. *On Engrossed Bills.*—Messrs M'Kennan, Dickson, Briggs, Mason, Me. and Deming.

COMMITTEES OF THE WHOLE HOUSE.

It is a standing order of the day, throughout the session, for the House to resolve itself into a Committee of the Whole House on the state of the Union, in which every proposition for a charge upon the people, and for appropriations of moneys, must be first discussed.

No sum or quantum of tax or duty, voted by a Committee of the Whole House, can be increased in the House until the motion or proposition for such increase shall be first discussed and voted in a Committee of the Whole House; and so in respect to the time of its continuance.

DEPARTMENT OF STATE.

LOUIS M'LANE, of Delaware, Secretary, $6,000 per annum.

The Department of State was created by the act of 15th September 1789. Previous to that period, by act of the 27th of July, 1789, it was denominated the Department of Foreign Affairs. The Secretary is, ex officio, a Commissioner of the Sinking Fund, and, by usage, a mumber of the Cabinet He conducts the negotiation of all treaties between the United States and Foreign Powers; and corresponds officially with the public Ministers of the United States at Foreign Courts, and with the Ministers of Foreign Powers resident in the United States. He performs also the main duties of what, in other Governments, is called the Home Department. He has the charge of the seal of the United States, but cannot affix it to any commission until signed by the President, nor to any other instrument or act, without the special authority of the President. He is, by law, entrusted with the publication and distribution of all the Acts and Resolutions of Congress; and all Treaties with Foreign Nations and Indian Tribes. He preserves, also, the original of all Laws and Treaties, and of the public correspondence growing out of the intercourse between the United States and Foreign Nations: and is required to procure and preserve copies of the statutes of the several States. He grants passports to American citizens visiting foreign countries; preserves the evidence of Copy rights; and has control of the office which issues Patents for useful inventions. He holds his office at the will of the President.

Joseph C. Cabot, of Mass....		3000 00
Tomas Swann, Jr. of District of Columbia, *Secretary*.....		2000 00
John W. Overton, of District of Columbia, *Clerk*.....		1500 00

An Act to carry into effect the Convention between the United States and his Majesty the King of the Two Sicilies, concluded at Naples on the fourteenth day of October, one thousand eight hundred and thirty-two.

SEC. 1. *Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled*, That the President of the United States, by and with the advice and consent of the Senate, shall appoint three Commissioners, who shall form a board, whose duty it shall be to receive and examine all claims which may be presented to them under the Convention between the United States and the King of the Two Sicilies of the fourteenth day of October, one thousand eight hundred and thirty-two, which are provided for by the said Convention, according to the provisions of the same, and the principles of justice, equity, and the law of nations. The said board shall have a Secretary, versed in the French and Italian languages and a clerk both to be appointed by the President, by and with the advice and consent of the Senate: And the Commissioners, Secretary and Clerk, shall, before they enter on the duties of their office, take oath well and faithfully to perform the duties thereof.

SEC. 2. *And be it further enacted*, That the said Commissioners, shall be, and they are hereby, authorized to make all needful rules and regulations, not contravening the laws of the land, the provisions of this act, or the provisions of the said Convention for carrying their said Commission into full and complete effect.

SEC. 3. *And be it further enacted*, That the members of the board so constituted shall meet at the city of Washington, and their salaries shall begin to be allowed within thirty days after the exchange of the ratifications of the Convention shall have been proclaimed by the President of the United States; and, within one year from the time of said meeting, they shall terminate their duties. And the Secretary of State is required as soon as the said proclamation of the President shall have been made, to give notice of the said meeting; to be published in two newspapers in Washington, and in such other papers as he may think proper.

SEC. 4. *And be it further enacted*, That all records, documents, or other papers, which now are in, or hereafter during the continuance of this Commission may come into the possession of the Department of State, in relation to such claims, shall be delivered to the commission aforesaid.

SEC. 5. *And be it further enacted*, That the compensation of the respective officers, for whose appointment provision is made by this act, shall not exceed the following sums, namely: to each of the said Com-

missioners, at the rate of three thousand dollars per annum; to the Secretary of the board, at the rate of two thousand dollars per annum; and to the clerk, at the rate of fifteen hundred dollars per annum. And the President of the United States shall be, and he is hereby, authorized to make such provision for the contingent expenses of the said commission, as shall appear to him reasonable and proper, and the said salaries and expenses shall be paid out of any money in the Treasury, not otherwise appropriated.

SEC. 6. *And be it further enacted*, That the said commissioners shall report to the Secretary of State a list of all the several awards made by them; a certified copy thereof shall be by him transmitted to the Secretary of the Treasury, who shall thereupon distribute in rateable proportions, among the persons in whose favor the awards shall have been made, such moneys as may have been received into the Treasury in virtue of this act according to the proportions which their respective awards shall bear to the whole amount then received, first deducting such sums of money as may be due the United States from said persons in whose favor said awards shall be made; and shall cause certificates to be issued by the Secretary of the Treasury, in such form as he may prescribe, showing the proportion to which each may be entitled of the amount that may thereafter be received; and on the presentation of the said certificates at the Treasury, as the nett proceeds of the general instalments, payable to the Neapolitan Government, shall have been received, such proportions thereof shall be paid to the legal holders of the said certificates

SEC. 7. *And be it further enacted*, That it shall be the duty of the Secretary of the Treasury, to cause the several instalments with the interest thereon payable to the United States, in virtue of the said Convention, to be received from the Neapolitan Government, and transferred to the United States, in such manner as he may deem best, and the nett proceeds thereof to be paid into the Treasury, and the same are hereby appropriated, to satisfy the awards herein provided for.

SEC. 8. *And be it further enacted*, That the communications to and from the Secretary of the Board of Commissioners, on the business of the Commission, shall pass by mail, free of postage.

SEC. 9. *And be it further enacted*, That as soon as said Commission shall be executed and completed, the records, documents, and all other papers, in the possession of the commission or its officers, shall be deposited in the office of the Secretary of State. [*Approved March* 2, 1833]

Convention between the Government of the United States of America, and his Majesty the King of the Kingdom of the two Sicilies, to terminate the reclamations of said Government, for the depredations inflicted upon American commerce by Murat, during the years 1809, 1810, 1811, *and* 1812: *Concluded at Naples, October* 14, 1832, *and ratified June* 8*th*, 1833.

The Government of the United States of America and his Majesty the King of the Kingdom of the two Sicilies, desiring to terminate the reclamations advanced by said Government against his said Majesty, in order that the merchants of United States may be indemnified for the losses inflicted upon them by Murat, by the depredations, seizures, confisca-

tions and destruction of their vessels and cargoes, during the years 1809, '10, '11, and '12. and his Sicilian Majesty desiring thereby to strengthen with the said Government the bonds of that harmony not hitherto disturbed, the said Government of the United States and his aforesaid Majesty, the King of the Kingdom of the two Sicilies have with one accord, resolved to come to an adjustment; to effectuate which they have respectively named and furnished with the necessary powers, viz. the said Government of the United States, *John Nelson*, Esquire, a citizen of said States, and their Chargé d'Affaires near his Majesty the King of the Kingdom of the two Sicilies; and his Majesty his Excellency D. Antonio Maria Statello, *Prince of Cassaro*, Marquis of Spaccaforno, Count Statello &c. &c. &c. his said Majesty's Minister Secretary of State for Foreign Affairs, &c. &c. who after the exchange of their respective full powers found in good and due form, have agreed to the following articles:

ART. 1 His Majesty the King of the Kingdom of the two Sicilies, with a view to satisfy the aforesaid reclamations, for the depredations, sequestrations, confiscations and destruction of the vessels and cargoes of the merchants of the United States, (and for every expense of every kind whatever incident to, or growing out of the same) inflicted by Murat during the years 1809, '10, '11, and '12, obliges himself to pay the sum of two millions, one hundred and fifteen thousand Neapolitan ducats to the Government of the United States; seven thousand six hundred and seventy-nine ducats, part thereof, to be applied to re-imburse the said Government for the expense incurred by it, in the transportation of American seamen from the Kingdom of Naples, during the year 1810, and the residue to be distributed amongst the claimants by the said Government of the United States in such manner, and according to such rules as it may prescribe.

ART. 2 The sum of two millions one hundred and fifteen thousand Neapolitan ducats agreed on in article the 1st, shall be paid in Naples, in nine equal instalments of two hundred and thirty-five thousand ducats; and with interest thereon at the rate of four per centum per annum, to be calculated from the date of the interchange of the ratification of this Convention, until the whole sum shall be paid. The first instalment shall be payable twelve months after the exchange of the said ratification, and the remaining instalments, with the interest, successively, one year after another. The said payments shall be made in Naples into the hands of such person as shall be duly authorized by the Government of the United States to receive the same.

ART. 3 The present Convention shall be ratified and the ratifications thereof shall be exchanged in this capital, in the space of eight months from this date or sooner if possible.

In faith whereof the parties above named have respectively subscribed these articles, and thereto affixed their seals. Done at Naples on the 14th day of October, 1832.

JNO. NELSON, [L. S.]

IL PRINCIPE DI CASSARO, [L. S.]

This Convention was duly ratified on both parts, and the respective ratifications of the same were exchanged at Naples, on the 8th of June, 1833, by *Auguste Davezac* on the part of the United States, and the *Prince of Cassaro* on the part of the King of Kingdom of the two Sicilies.

TREATY WITH RUSSIA.

Treaty of Navigation and Commerce between the United States of America and the Emperor of all the Russias, concluded at St. Petersburg, December 6th—18th, 1832; and the respective ratifications of the same were exchanged at the City of Washington, on the 11th day of May, 1833; by Edward Livingston, Secretary of State of the United States, and the Baron de Krudener, Envoy Extraordinary and Minister Plenipotentiary of His Majesty the Emperor of all the Russias, in the said United States, on the part of their respective Governments.

In the name of the most Holy and Indivisible Trinity:

The United States of America, and His Majesty the Emperor of all the Russias, equally animated with the desire of maintaining the relations of good understanding, which have hitherto so happily subsisted between their respective States, and of extending and consolidating the commercial intercourse between them, have agreed to enter into negotiations for the conclusion of a treaty of navigation and commerce: for which purpose the President of the United States has conferred full powers on *James Buchanan*, their Envoy Extraordinary and Minister Plenipotentiary near His Imperial Majesty; and His Majesty the Emperor of all the Russias has conferred like powers on the Sieur *Charles Robert Count de Nesselrode*, His Vice Chancellor, Knight of the Orders of Russia, and of many others, &c.; and the said Plenipotentiaries having exchanged their full powers, found in good and due form, have concluded and signed the following articles:

ART I There shall be between the territories of the High Contracting Parties, a reciprocal liberty of commerce and navigation. The inhabitants of their respective states shall, mutually, have liberty to enter the ports, places and rivers of the territories of each party, wherever foreign commerce is permitted. They shall be at liberty to sojourn and reside in all parts whatsoever of said territories, in order to attend to their affairs, and they shall enjoy, to that effect, the same security and protection as natives of the country wherein they reside, on condition of their submitting to the laws and ordinances there prevailing, and particularly to the regulations in force concerning commerce.

ART. II. Russian vessels arriving either laden or in ballast, in the ports of the United States of America; and reciprocally, vessels of the United States arriving, either laden or in ballast, in the ports of the Empire of Russia, shall be treated, on their entrance, during their stay, and at their departure, upon the same footing as national vessels, coming from the same place, with respect to the duties of tonnage. In regard to light-house duties, pilotage, and port charges, as well as to the fees and perquisites of public officers, and all other duties and charges, of whatever kind or denomination, levied upon vessels of commerce, in the name or to the profit of the government, the local authorities, or of any private establishments whatsoever, the High Contracting Parties shall reciprocally treat each other upon the footing of the most favored nations with whom they have not treaties now actually in force, regulating the said duties and charges on the basis of an entire reciprocity.

ART. III. All kind of merchandise and articles of commerce, which may be lawfully imported into the ports of the Empire of Russia in Russian vessels, may, also, be so imported in vessels of the United States of America, without paying other or higher duties or charges, of whatever kind or denomination, levied in the name, or to the profit, of the government, the local authorities, or of any private establishment whatsoever, than if the same merchandise or other articles of commerce had been imported in Russian vessels. And reciprocally, all kind of merchandise and articles of commerce which may be lawfully imported into the ports of the United States of Ameri-

ca, in vessels of the said States, may, also, be so imported in Russian vessels, without paying other or higher duties or charges, of whatever kind or denomination, levied in the name, or to the profit of the government, the local authorities, or of any private establishments whatsoever, than if the same merchandise or articles of commerce had been imported in vessels of the United States of America.

ART. IV It is understood that the stipulations contained in the two preceding articles, are, to their full extent, applicable to Russian vessels and their cargoes, arriving in the ports of the United States of America; and reciprocally, to vessels of the said States and their cargoes, arriving in the ports of the Empire of Russia, whether the said vessels clear directly from the ports of the country to which they respectively belong, or from the ports of any other foreign country.

ART V. All kind of merchandise and articles of commerce, which may be lawfully exported from the ports of the United States of America in national vessels, may, also, be exported therefrom in Russian vessels without paying other or higher duties or charges, of whatever kind or denomination, levied in the name, or to the profit of the Government, the local authorities, or of any private establishments whatsoever, than if the same merchandise, or articles of commerce, had been exported in vessels of the United States of America. And reciprocally, all kind of merchandise and articles of commerce, which may be lawfully exported from the ports of the Empire of Russia in national vessels, may also be exported therefrom in vessels of the United States of America, without paying other or higher duties or charges of whatever kind or denomination, levied in the name, or to the profit of the Government, the local authorities, or of any private establishments whatsoever than if the same merchandise or articles of commerce had been exported in Russian vessels.

ART. VI. No higher or other duties shall be imposed on the importation into the United States of any article, the produce or manufacture of Russia; and no higher or other duties shall be imposed on the importation into the Empire of Russia, of any article, the produce or manufacture of the United States, than are, or shall be, payable on the like article, being the produce or manufacture of any other foreign country. Nor shall any prohibition be imposed on the importation or exportation of any article the produce or manufacture of the United States or of Russia, to, or from the ports of the United States, or to, or from the ports of the Russian Empire, which shall not equally extend to all other nations.

ART. VII. It is expressly understood that the preceding articles II, III, IV, V and VI, shall not be applicable to the coastwise navigation of either of the two countries, which each of the High Contracting Parties reserves exclusively to itself.

ART. VIII. The two Contracting Parties shall have the liberty of having in their respective ports, Consuls, Vice Consuls, Agents and Commissaries, of their own appointment, who shall enjoy the same privileges and powers, as those of the most favored nations; but if any such Consul shall exercise commerce, they shall be submitted to the same laws and usages to which the private individuals of their nation are submitted, in the same place.

The Consuls, Vice Consuls, and Commercial Agents, shall have the right, as such, to sit as judges and arbitrators in such differences as may arise between the captains and crews of the vessels belonging to the nation whose interests are committed to their charge, without the interference of the local authorities, unless the conduct of the crews, or of the captain, should disturb the order or tranquillity of the country, or the said Consuls, Vice Consuls, or Commercial Agents should require their assistance to cause their decisions to be carried into effect or supported It is, however, understood, that this species of judgment or arbitration shall not deprive the contending parties of the right they have to resort on their return, to the judicial authority of the country

ART IX The said Consuls, Vice Consuls, and Commercial Agents, are authorized to require the assistance of the local authorities, for the search, arrest, detention and imprisonment of the deserters from the ships of war and merchant vessels of their country. For this purpose they shall apply to the competent tribunals, judges and officers, and shall, in writing, demand said deserters, proving by the exhibition of the registers of the vessels, the rolls of the crews, or by other official documents, that such individuals formed part of the crews; and this reclamation being thus substantiated, the surrender shall not be refused.

Such deserters, when arrested, shall be placed at the disposal of the said Consuls, Vice Consuls, or Commercial Agents, and may be confined in the public prisons, at the request and cost of those who shall claim them, in order to be detained until the time when they shall be restored to the vessel to which they belonged, or sent back to their own country by a vessel of the same nation or any other vessel whatsoever. But if not sent back within four months, from the day of their arrest, they shall be set at liberty, and shall not be again arrested for the same cause.

However, if the deserter should be found to have committed any crime or offence, his surrender may be delayed until the tribunal before which his case shall be depending, shall have pronounced its sentence, and such sentence shall have been carried into effect.

ART X. The citizens and subjects of each of the High Contracting Parties shall have power to dispose of their personal goods within the jurisdiction of the other, by testament, donation, or otherwise, and their representatives, being citizens or subjects of the other party, shall succeed to their said personal goods, whether by testament or *ab intestato*, and may take possession thereof, either by themselves, or by others acting for them, and dispose of the same, at will, paying to the profit of the respective Governments, such dues only as the inhabitants of the country wherein the said goods are, shall be subject to pay in like cases. And in case of the absence of the representative, such care shall be taken of the said goods, as would be taken of the goods of a native of the same country in like case, until the lawful owners may take measures for receiving them. And if a question should arise among several claimants as to which of them said goods belong, the same shall be decided finally, by the laws and judges of the land wherein the said goods are. And where, on the death of any person holding real estate, within the territories of one of the High Contracting Parties, such real estate would, by the laws of the land, descend on a citizen or subject of the other party, who by reason of alienage may be incapable of holding it, he shall be allowed the time fixed by the laws of the country, and in case the laws of the country actually in force, may not have fixed any such time, he shall then be allowed a reasonable time to sell such real estate and to withdraw and export the proceeds without molestation, and without paying to the profit of the respective Government any other dues than those to which the inhabitants of the country wherein said real estate is situated, shall be subject to pay, in like cases. But this article shall not derogate, in any manner, from the force of the laws already published, or which may hereafter be published by His Majesty the Emperor of all the Russias, to prevent the emigration of his subjects.

ART. XI. If either party shall, hereafter, grant to any other nation, any particular favor in navigation or commerce, it shall, immediately, become common to the other party, freely, where it is freely granted to such other nation, or on yielding the same compensation, when the grant is conditional.

ART. XII. The present treaty, of which the effect shall extend, in like manner, to the Kingdom of Poland, so far as the same may be applicable thereto, shall continue in force until the first day of January, in the year of our Lord one thousand eight hundred and thirty-nine; and if one year before that day, one of the High Contracting Parties, shall not have announced to the

other, by an official notification, its intention to arrest the operation thereof, this treaty shall remain obligatory one year beyond that day, and so on, until the expiration of the year which shall commence after the date of a similar notification.

ART XIII. The present treaty shall be approved and ratified by the President of the United States of America, by and with the advice and consent of the Senate of the said States, and by His Majesty the Emperor of all the Russias, and the ratifications shall be exchanged in the city of Washington within the space of one year, or sooner if possible.

In faith whereof, the respective Plenipotentiaries have signed the present treaty, in duplicate, and affixed thereto the seals of their arms. Done at St. Petersburg the sixth. (eighteenth) December, in the year of Grace one thousand eight hundred and thirty-two.

JAMES BUCHANAN.
CHARLES, COMTE DE NESSELRODE.

—

SEPARATE ARTICLE.

Certain relations of proximity and anterior engagements, having rendered it necessary for the Imperial Government to regulate the commercial relations of Russia with Prussia and the Kingdoms of Sweden and Norway by special stipulations, now actually in force, and which may be renewed hereafter; which stipulations are, in no manner, connected with the existing regulations for foreign commerce in general; the two High Contracting Parties, wishing to remove from their commercial relations every kind of ambiguity or subject of discussion, have agreed, that the special stipulations granted to the commerce of Prussia, and of Sweden and Norway, in consideration of equivalent advantages granted in these countries, by the one to the commerce of the Kingdom of Poland, and by the other to that of the Grand Dutchy of Finland, shall not, in any case, be invoked in favor of the relations of commerce and navigation, sanctioned between the two High Contracting Parties by the present treaty.

The present separate article shall have the same force and value as if it were inserted, word for word, in the treaty signed this day, and shall be ratified at the same time.

In faith whereof, we, the undersigned, by virtue of our respective full powers, have signed the present separate article, and affixed thereto the seals of our arms.

Done at St. Petersburg, the sixth, (eighteenth,) of December, in the year of Grace one thousand eight hundred and thirty-two.

JAMES BUCHANAN.
CHARLES, COMTE DE NESSELRODE.

TREATY WITH MEXICO.

Treaty of Amity, Commerce and Navigation between the United States of America, and the United Mexican States, concluded at Mexico April 5th 1831: *and the respective ratifications of the same were exchanged at Washington, on the fifth day of April, one thousand eight hundred and thirty-two, by Edward Livingston, Secretary of State of the United States of America, and Jose Montoya, Charge d'Affaires of the United Mexican States, on the part of their respective Governments.*

The United States of America and the United Mexican States desiring to establish upon a firm basis the relations of friendship that so happily subsist between the two Republics have determined to fix in a clear and positive manner the rules which shall in future be religiously observed between both, by means of a treaty of Amity, Commerce, and Navigation. For which important object, the President of the United States of America has appointed *Anthony Butler*, a citizen of the United States, and Charge d'Affaires of the United States of America near the United Mexican States, with full powers; and the Vice Presi-

dent of the United Mexican States in the exercise of the Executive power, having conferred like full powers on his Excellency *Lucas Alaman*, Secretary of State for Home and Foreign Affairs, and his Excellency *Raphael Mangino*, Secretary of the Treasury, and the aforesaid Plenipotentiaries after having compared, and exchanged in due form their several powers as aforesaid, have agreed upon the following articles:

Art. I. There shall be a firm, inviolable, and universal peace, and a true and sincere friendship between the United States of America and the United Mexican States in all the extent of their possessions and territories, and between their people and citizens respectively, without distinction of persons or places.

Art. II. The United States of America and the United Mexican States, designing to take for the basis of their agreement the most perfect equality and reciprocity, engage mutually not to grant any particular favor to other nations in respect of commerce and navigation, which shall not immediately become common to the other party; who shall enjoy the same freely, if the concession was freely made, or upon the same conditions, if the concession was conditional.

Art. III The citizens of the two countries respectively shall have liberty, freely and securely to come with their vessels and cargoes to all such places, ports, and rivers of the United States of America and of the United Mexican States, to which other foriegners are permitted to come: to enter into the same, and to remain and reside in any part of the said territories respectively; also, to hire and occupy houses and warehouses for the purpose of their commerce, and to trade therein, in all sorts of produce, manufactures, and merchandise; and, generally, the merchants and traders of each nation shall enjoy the most complete protection and security for their commerce.

And they shall not pay higher or other duties, imposts, or fees whatsoever, than those which the most favored nations are or may be obliged to pay; and shall enjoy all the rights, privileges, and exemptions, with respect to navigation and commerce, which the citizens of the most favored nation do or may enjoy: but subject always to the laws, usages, and statutes of the two countries respectively.

The liberty to enter and discharge the vessels of both nations of which this article treats, shall not be understood to authorize the coasting trade, which is permitted to National vessels only.

Art. IV. No higher or other duties shall be imposed on the importation into the United Mexican States of any article, the produce, growth, or manufacture of the United States of America, than those which the same or like articles the produce, growth, or manufacture of any other foreign country do now or may hereafter pay; nor shall articles, the produce, growth, or manufacture of the United Mexican States, be subject on their introduction into the United States of America, to higher or other duties than those which the same or like articles of any other foreign country do now or may hereafter pay.

Higher duties shall not be imposed in the respective States on the exportation of any article to the States of the other contracting Party, than those which are now or may hereafter be paid on the exportation of the like articles to any other foreign country; nor shall any prohibition be established on the exportation or importation of any article, the produce, growth, or manufacture of the United States of America, or of the United Mexican States respectively, in either of them, which shall not in like manner be established with respect to other foreign countries.

Art. V. No higher or other duties or charges on account of tonnage, light or harbor dues, pilotage, salvage in case of damage or shipwreck, or any other local charges, shall be imposed in any of the ports of Mexico on vessels of the United States of America, than those payable in the same ports by Mexican vessels; nor in the ports of the United States of America, on Mexican vessels, than shall be payable in the same ports on vessels of the United States of America.

Art. VI. The same duties shall be paid on the importation into the United Mexican States, of any article, the growth, produce, or manufacture of the United States of America, whether such importation shall be in Mexican vessels or in vessels of the United States of America; and the same duties shall be paid on the importation into the United States of America, of any article, the growth, produce, or manufacture of Mexico, whether such importation shall be in vessels of the United States of America or in Mexican vessels. The same duties shall be paid, and the same bounties and drawbacks allowed, on the exportation to Mexico of any articles, the growth, produce, or manufacture of the United States of America, whether such exportation shall be in Mexican vessels or in vessels of the United States of America; and the same duties shall be paid, and the same bounties and drawbacks allowed, on the exportation of any articles, the growth, produce, or manufacture of Mexico, to the United States of America, whether such exportation shall be in vessels of the United States of America or Mexican vessels.

Art. VII. All merchants, captains, or commanders of vessels and other citizens of the United States of America, shall have full liberty in the United Mexican States to direct or manage themselves, their own affairs, or to commit them to the management of whomsoever they may think proper, either as broker, factor, agent, or interpreter; nor shall they be obliged to employ for the aforesaid purposes any other persons than those employed by Mexicans, nor to pay them higher salaries or remuneration than such as are in like cases paid by Mexicans; and absolute freedom shall be allowed in all cases to the buyer and seller to bargain and fix the prices of any goods, wares, or merchandise import-

ed into, or exported from, the United Mexican States, as they may think proper; observing the laws usages, and customs of the country. The citizens of Mexico shall enjoy the same privileges in the States and Territories of the United States of America, being subject to the same conditions.

Art. VIII. The citizens of neither of the contracting parties shall be liable to any embargo, nor shall their vessels, cargoes, merchandise, or effects, be detained for any military expedition, nor for any public or private purpose whatsoever, without a corresponding compensation.

Art. IX. The citizens of both countries, respectively, shall be exempt from compulsory service in the army or navy; nor shall they be subjected to any other charges, or contributions, or taxes, than such as are paid by the citizens of the States in which they reside.

Art. X. Whenever the citizens of either of the contracting parties shall be forced to seek refuge or asylum in the rivers, bays, ports, or dominions of the other with their vessels, whether Merchant or of war, public or private, through stress of weather, pursuit or enemies, they shall be received and treated with humanity, with the precau ions which may be deemed expedient on the part of the respective Governments in order to avoid fraud, giving to them all favor and protection for repairing their vessels, procuring provisions, and placing themselves in a situation to continue their voyage without obstacle or hindrance of any kind.

Art. XI. All vessels, merchandise, or effects, belonging to the citizens of one of the contracting parties, which may be captured by pirates, whether within the limits of its jurisdiction, or on the high seas, and may be carried into or found in the rivers, bays, ports, or dominions of the other, shall be delivered up to the owners, they proving, in due and proper form, their rights before the competent tribunal; it being well understood that the claim shall be made within one year, counting from the capture of said vessels or merchandise, by the parties themselves, or their attorneys, or by the agents of the respective Governments.

Art. XII. When any vessel belonging to the citizens of either of the contracting parties, shall be wrecked, foundered, or shall suffer any damage on the coasts or within the dominions of the other, there shall be given to it all the assistance and protection in the same manner which is usual and customary with the vessels of the nation where the damage happens; permitting them to unload the said vessel, if necessary, of its merchandise effects, with the precautions which may be deemed expedient on the part of the respecti e Governments, in order to avoid fraud, without exacting for it any duty, impost, or contribution whatever, until they be exported.

Art. XIII. In whatever relates to the succession of [personal] estates, either by will or *ab intestato* [and the right of] disposal of such property, of whatever sort or denomination it may be, by sale, donation, exchange, or testament, or in any other manner whatsoever the citizens of the two contracting parties shall enjoy, in their respective States and Territories, the same privileges, exemptions, liberties, and rights, as native citizens; and shall not be charged, in any of these respects, with other or higher duties or imposts, than those which are now, or may hereafter be paid by the citizens of the Power in whose territories they may reside.

Art. XIV. Both the contracting parties promise and engage to give their special protection to the persons and property of the citizens of each other, of all occupations, who may be in their territories, subject to the jurisdiction of the one or of the other, transient or dwelling therein; leaving open and free to them the tribunals of justice for their judicial recourse, on the same terms which are usual and customary with the natives or citizens of the country in which they may employ in defence of their rights, such advocates, solicitors, notaries, agents, and factors, as they may judge proper, in all their trials at law; and citizens of either party, or their agents, shall enjoy, in every respect, the same rights and privileges, either in prosecuting or defending their rights of person or of property, as the citizens of the country where the cause may be tried.

Art. XV. The citizens of the United States of America, residing in the United Mexican States, shall enjoy in their houses, persons, and properties, the protection of the Government, with the most perfect security and liberty of conscience: they shall not be disturbed or molested, in any manner, on account of their religion, so long as they respect the Constitution, the laws, and established usages of the country where they reside; and they shall also enjoy the privilege of burying the dead in places which now are, or may hereafter be assigned for that purpose; nor shall the funerals or sepulchres of the dead be disturbed in any manner, nor under any pretext.

The citizens of the United Mexican States shall enjoy, throughout all the States and Territories of the United States of America, the same protection; and shall be allowed the free exercise of their religion, in public or in private, either within their own houses, or in the chapels or places of worship set apart for that purpose.

Art. XVI. It shall be lawful for the citizens of the United States of America, and of the United Mexican States respectively, to sail with their vessels with all manner of security and liberty, no distinction being made who are the owners of the merchandise laden thereon, from any port to the places of those who now are, or may hereafter be at enmity with the United States of America or with the United Mexican States. It shall likewise be lawful for the aforesaid citizens respectively to sail with their vessels and merchandise, before men-

tioned, and to trade with the same liberty and security from the places, ports, and havens of those who are enemies of both or either party, without any opposition or disturbance whatsoever, not only directly from the places of the enemy, before mentioned, to neutral places, but also from one place belonging to an enemy to another place belonging to an enemy, whether they be under the jurisdiction of the same Government or under several; and it is hereby stipulated that free ships shall also give freedom to goods; and that every thing shall be deemed free and exempt which shall be found on board the vessels belonging to the citizens of either of the contracting parties, although the whole lading or any part thereof should appertain to the enemies of either, contraband goods being always excepted. It is also agreed that the same liberty be extended to persons who are on board a free vessel, so that, although they be enemies to either party shall not be made prisoners, or taken out of that free vessel, unless they are soldiers, and in the actual service of the enemy. By the stipulation that the flag shall cover the property, the two contracting parties agree that this be so understood with respect to those powers who recognise this principle; but if either of the two contracting parties shall be at war with a third party, and the other neutral, the flag of the neutral shall cover the property of enemies whose Governments acknowledge this principle, and not of others.

Art. XVII. It is likewise agreed that in the case where the neutral flag of one of the contracting parties shall protect the property of the enemies of the other, by virtue of the above stipulation, it shall always be understood that the neutral property found on board such enemies' vessels shall be held and considered as enemies' property, and as such shall be liable to detention and confiscation, except such property as was put on board such vessel before the declaration of war, or even afterwards if it were done without the knowledge of it: but the contracting parties agree that four months having elapsed after the declaration, their citizens shall not plead ignorance thereof; on the contrary, if the flag of the neutral does not protect the enemy's property, in that case the goods and merchandises embarked in such enemy's vessel shall be free.

Art. XVIII. This liberty of commerce and navigation shall extend to all kinds of merchandise, excepting those only which are distinguished by the name of contraband; and under this name of contraband or prohibited goods, shall be comprehended, first, cannons, mortars, howitzers, swivels, blunderbusses, muskets, fusees, rifles, carbines, pistols, pikes, swords, sabres, lances, spears, halberts, hand granades, bombs, powder, matches, balls, and all other things belonging to the use of these arms: secondly, bucklers, helmets, breast-plates, coats of mail, infantry belts, and clothes made up in a military form, and for a military use; thirdly, cavalry belts and horses with their furniture; fourthly, and generally, all kinds of arms, and instruments of iron, steel, brass and copper or of any other materials manufactured, prepared and formed expressly to make war by sea or land.

Art. XIX. All other merchandise and things not comprehended in the articles of contraband expressly enumerated and classified as above, shall be held and considered as free and subjects of free and lawful commerce, so that they may be carried and transported in the freest manner by both the contracting parties, even to places belonging to an enemy, excepting only those places which are at that time besieged or blockaded; and to avoid all doubt in that particular, it is declared that those places only are besieged or blockaded, which are actually besieged or blockaded by a belligerent force capable of preventing the entry of the neutral.

Art. XX. The articles of contraband before enumerated and classified, which may be found in a vessel bound for the enemy's port, shall be subject to detention and confiscation, leaving free the rest of the cargo and the vessel, that the owners may dispose of them as they see proper. No vessels of either of the two nations shall be detained on the high seas on account of having on board articles of contraband, whenever the master, captain, or supercargo of said vessel will deliver up the articles of contraband to the captor, unless the quantity of such articles be so great and of so large a bulk, that they cannot be received on board the capturing vessel without great inconvenience; but in this, and in all other cases of just detention, the vessel detained shall be sent to the nearest convenient and safe port for trial and judgment, according to law.

Art. XXI. And, whereas, it frequently happens that vessels sail for a port or place belonging to an enemy without knowing that the same is besieged, blockaded, or invested, it is agreed that every vessel so situated may be turned away from such port or place, but shall not be detained; nor shall any part of her cargo, if not contraband, be confiscated, unless, after warning of such blockade or investment from the commanding officer of the blockading force, she should again attempt to enter the aforesaid port; but she shall be permitted to go to any other port or place she may think proper. Nor shall any vessel of either of the contracting parties, that may have entered into such port before the same was actually besieged, blockaded, or invested by the other, be restrained from quitting such place with her cargo; nor if found therein after the surrender, shall such vessel or her cargo be liable to confiscation, but she shall be restored to the owner thereof.

Art. XXII. In order to prevent all kinds of disorder in the visiting and examination of the vessels and cargoes of both the contracting parties on the high seas, they have agreed, mutually, that, whenever a vessel of war, public or private, should meet with a neutral vessel of the other contracting party, the first shall remain out of cannon shot, and may send its boat, with two or three men only, in order to execute the said examination of the papers concerning the ownership and cargo of the vessel, without causing the least ex-

tortion, violence, or ill treatment, for which the commanders of the said armed vessels shall be responsible with their persons and property; and for this purpose the commanders of said private armed vessels shall, before receiving their commissions give sufficient security to answer for all the damages they may commit. And it is expressly agreed, that the neutral party shall in no case, be required to go on board the examining vessel for the purpose of exhibiting his papers, or for any other purpose whatsoever.

Art. XXIII. To avoid all kinds of vexation and abuse in the examination of papers relating to the ownership of vessels belonging to the citizens of the two contracting parties, they have agreed, and do agree that in case one of them should be engaged in war, the vessels belonging to the citizens of the other must be furnished with sea letters or passports, expressing the name, property, and bulk of the vessel, and also the name and place of habitation of the master or commander of said vessel, in order that it may thereby appear that the said vessel really and truly belongs to the citizens of one of the contracting parties; they have likewise agreed that such vessels being laden, besides the said sea-letters or passports, shall also be provided with certificates, containing the several particulars of the cargo, and the place whence the vessel sailed, so that it may be known whether any forbidden or contraband goods be on board the same; which certificate shall be made out by the officers of the place whence the vessel sailed, in the accustomed form: without which requisites, the said vessel may be detained to be adjudged by the competent tribunal, and may be declared legal prize, unless the said defect shall be satisfied or supplied by testimony entirely equivalent to the satisfaction of the competent tribunal.

Art. XXIV. It is further agreed, that the stipulations above expressed, relative to visiting the examination of vessels, shall apply only to those which sail without convoy; and when said vessels are under convoy, the verbal declaration of the commander of the convoy, or his word of honor that the vessels under his protection belong to the nation whose flag he carries, and when they are bound to an enemy's port, that they have no contraband goods on board, shall be sufficient.

Art. XXV. It is further agreed, that in all cases the established courts for prize causes, in the country to which the prizes may be conducted, shall alone take cognizance of them. And whenever such tribunal of either party shall pronounce judgment against any vessel, or property claimed by the citizens of the other party, the sentence or decree shall mention the reason or motives on which the same shall have been founded; and an authenticated copy of the sentence or decree, in conformity with the laws and usages of the country, and of all the proceedings of the case, shall, if demanded, be delivered to the commander or agent of said vessel, without any delay, he paying the legal fees for the same.

Art. XXVI. For the greater security of the intercourse between the citizens of the United States of America and of the United Mexican States, it is agreed now for then, that if there should be at any time hereafter an interruption of the friendly relations which now exist, or a war unhappily break out between the two contracting parties, there shall be allowed the term of six months to the merchants residing on the coast, and one year to those residing in the interior of the States and Territories of each other respectively, to arrange their business, dispose of their effects, or transport them wh resoever they may please, giving them a safe conduct to protect them to the port they may designate. Those citizens who may be established in the States and Territories aforesaid, exercising any other occupation or trade, shall be permitted to remain in the uninterrupted enjoyment of their liberty and property, so long as they conduct themselves peaceably, and do not commit any offence against the laws; and their goods and effects, of whatever class and condition they may be, shall not be subject to any embargo or sequestration whatever, nor to any charge nor tax other than may be established upon similar goods and effects belonging to the citizens of the State in which they reside respectively; nor shall the debts between individuals, nor moneys in the public funds or in public or private banks, nor shares in companies, be confiscated, embargoed, or detained.

Art. XXVII. Both the contracting parties being desirous of avoiding all inequality in relation to their public communications and official intercourse, have agreed and do agree to grant to the envoys, ministers, and other public agents, the same favors, immunities, and exemptions which those of the most favored nation do or may enjoy, it being understood that whatever favors, immunities, or privileges the United States of America or the United Mexican States may find proper to give to the ministers and public agents of any other power, shall by the same act be extended to those of each of the contracting parties.

Art. XXVIII. In order that the consuls and vice-consuls of the two contracting parties may enjoy the rights, prerogatives, and immunities which belong to them by their character, they shall, before entering upon the exercise of their functions, exhibit their commission or patent in due form to the Government to which they are accredited; and having obtained the exequatur, they shall be held and considered as such by all the authorities, magistrates, and inhabitants of the consular district in which they reside. It is agreed likewise to receive and admit consuls and vice-consuls in all the ports and places open to foreign commerce, who shall enjoy there all the rights, prerogatives, and immunities of the consuls and vice-consuls of the most favored nation, each of the contracting parties remaining at liberty to except those ports and places in which the admission and residence of such consuls and vice-consuls may not seem expedient.

Art. XXIX. It is likewise agreed that the consuls, vice-consuls, their secretaries, officers and persons attached to the service of consuls, they not being citizens of the country

in which the consul resides, shall be exempt from all compulsory public service, and also from all kind of taxes, imposts and contributions levied specially on them, except those which they shall be obliged to pay on account of commerce or their property, to which the citizens and inhabitants, native and foreign, of the country in which they reside, are subject; being in every thing besides subject to the laws of their respective States. The archives and papers of the consulates shall be respected inviolably, and under no pretext whatever shall any magistrate seize, or in any way interfere with them.

Art. XXX. The said consuls shall have power to require the assistance of the authorities of the country, for the arrest, detention, and custody of deserters from the public and private vessels of their country; and for that purpose, they shall address themselves to the courts, judges, and officers competent, and shall demand the said deserters in writing, proving, by an exhibition of the register of the vessel, or ship's roll, or other public documents, that the man or men demanded were part of said crews; and on this demand so proved, (saving always where the contrary is proved,) the delivery shall not be refused. Such deserters, when arrested, shall be placed at the disposal of the said consuls, and may be put in the public prisons at the request and expense of those who reclaim them, to be sent to the vessels to which they belonged, or to others of the same nation. But, if they be not sent back within two months, to be counted from the day of their arrest, they shall be set at liberty, and shall not be again arrested for the same cause.

Art. XXXI. For the purpose of more effectually protecting their commerce and navigation, the two contracting parties do hereby agree, as soon hereafter as circumstances will permit, to form a consular convention, which shall declare specially the powers and immunities of the consuls and vice consuls of the respective parties.

Art. XXXII. For the purpose of regulating the interior commerce between the frontier territories of both Republics, it is agreed that the Executive of each shall have power, by mutual agreement, of determining on the route and establishing the roads by which such commerce shall be conducted; and in all cases where the caravans employed in such commerce may require convoy and protection by military escort, the Supreme Executive of each nation, shall, by mutual agreement, in like manner, fix on the period of departure for such caravans, and the point at which the military escort of the two nations shall be exchanged. And it is further agreed, that, until the regulations for governing this interior commerce between the two nations shall be established, that the commercial intercourse between the State of Missouri of the United States of America, and New Mexico in the United Mexican States, shall be conducted as heretofore, each Government affording the necessary protection to the citizens of the other.

Art. XXXIII. It is likewise agreed that the two contracting parties shall, by all the means in their power, maintain peace and harmony among the several Indian nations who inhabit the lands adjacent to the lines and rivers which form the boundaries of the two countries; and the better to attain this object, both parties bind themselves expressly to restrain, by force, all hostilities and incursions on the part of the Indian nations living within their respective boundaries: so that the United States of America will not suffer their Indians to attack the citizens of the United Mexican States, nor the Indians inhabiting their territory; nor will the United Mexican States permit the Indians residing within their territories to commit hostilities against the citizens of the United States of America, nor against the Indians residing within the limits of the United States, in any manner whatever.

And in the event of any person or persons captured by the Indians who inhabit the territory of either of the contracting parties, being or having been carried into the territories of the other, both Governments engage and bind themselves in the most solemn manner to return them to their country as soon as they know of their being within their respective territories, or to deliver them up to the agent or representative of the Government that claims them, giving to each other, reciprocally, timely notice, and the claimant paying the expenses incurred in the transmission and maintenance of such person or persons, who, in the mean time, shall be treated with the utmost hospitality by the local authorities of the place where they may be. Nor shall it be lawful, under any pretext whatever, for the citizens of either of the contracting parties to purchase or hold captive prisoners made by the Indians inhabiting the territories of the other.

Art. XXXIV. The United States of America and the United Mexican States, desiring to to make as durable as circumstances will permit, the relations which are to be established between the two parties by virtue of this treaty or general convention of amity, commerce, and navigation, have declared solemnly, and do agree to the following points:

First. The present treaty shall remain and be of force for eight years from the day of the exchange of the ratifications, and until the end of one year after either of the contracting parties shall have given notice to the other of its intention to terminate the same; each of the contracting parties reserving to itself the right of giving such notice to the other, at the end of said term of eight years. And it is hereby agreed between them, that, on the expiration of one year after such notice shall have been received by either of the parties from the other party, this treaty, in all its parts, relating to commerce and navigation, shall altogether cease and determine, and in all those parts which relate to peace and friendship, it shall be permanently and perpetually binding on both the contracting parties.

Secondly. If any one or more of the citizens of either party shall infringe any of the articles of this treaty, such citizens shall be held personally responsible for the same; and the harmony and good correspondence between the two nations shall not be interrupted

thereby; each party engaging, in no way, to protect the offender, or sanction such violation.

Thirdly. If (what indeed cannot be expected) any of the articles contained in the present treaty shall be violated or infracted in any manner whatever, it is stipulated that neither of the contracting parties will order or authorize any acts of reprisal, nor declare war against the other, on complaints of injuries or damages, until the said party considering itself offended, shall first have presented to the other a statement of such injuries or damages, verified by competent proofs, and demanded justice and satisfaction, and the same shall have been either refused or unreasonably delayed.

Fourthly. Nothing in this treaty contained, shall however be construed to operate contrary to former and existing public treaties with other Sovereigns or States.

The present treaty of amity, commerce, and navigation, shall be approved and ratified by the President of the United States of America, by and with the advice and consent of the Senate thereof, and by the Vice-President of the United Mexican States, with the consent and approbation of the Congress thereof; and the ratifications shall be exchanged in the city of Washington, within the term of one year, to be counted from the date of the signature hereof; or sooner, if possible.

In witness whereof, We, the Plenipotentiaries of the United States of America and of the United Mexican States, have signed and sealed these presents. Done in the city of Mexico on the fifth day of April, in the year of our Lord one thousand eight hundred and thirty-one, in the fifty-fifth year of the Independence of the United States of America, and in the eleventh of that of the United Mexican States.

A. BUTLER, [L. S.]
LUCAS ALAMAN, [L. S.]
RAFAEL MANGINO, [L. S.]

ADDITIONAL ARTICLE.

Whereas, in the present state of the Mexican shipping, it would not be possible for Mexico to receive the full advantage of the reciprocity established in the fifth and sixth articles of the treaty signed this day, it is agreed that for the term of six years, the stipulations contained in the said articles shall be suspended; and in lieu thereof, it is hereby agreed, that, until the expiration of the said term of six years, American vessels entering into the ports of Mexico, and all articles, the produce, growth, or manufacture of the United States of America, imported in such vessels, shall pay no other or higher duties, than are or may hereafter be payable in the said ports by the vessels and the like articles, the growth, produce or manufacture of the most favored nation; and, reciprocally, it is agreed that Mexican vessels entering into the ports of the United States of America, and all articles, the growth, produce, or manufacture of the United Mexican States, imported in such vessels, shall pay no other or higher duties than are, or may hereafter be, payable in the said ports by the vessels and the like articles, the growth, produce, or manufacture of the most favored nation, and that no higher duties shall be paid, or bounties or drawbacks allowed, on the exportation of any article, the growth, produce, or manufacture of either country, in the vessels of the other, than upon the exportation of the like articles in the vessels of any other foreign country.

The present additional article shall have the same force and value as if it had been inserted, word for word, in the treaty signed this day. It shall be ratified, and the ratification exchanged at the same time.

In witness whereof, We, the respective Plenipotentiaries, have signed and sealed the same Done at Mexico, on the fifth day of April, one thousand eight hundred and thirty-one.

TREATY WITH THE OTTOMAN PORTE.

Treaty of Commerce and Navigation, between the United States of America and the Ottoman Porte, concluded and signed at Constantinople, by the respective Plenipotentiaries of the two Powers, on the 7th of May, 1830; and ratified by the President on the 2d of February, 1831. The ratifications were exchanged, at Constantinople, on the 5th of October, 1831, by David Porter, Charge d'Affaires of the United States near the Sublime Porte, and Neujib Effendi, Reis Effendi of the Porte.

The object of this firm instrument, and the motive of this writing well drawn up, is that—

No treaty or diplomatic and official convention, having, heretofore, existed, between the the Sublime Porte, of perpetual duration, and the United States of America; at this time, in consideration of the desire formerly expressed, and of repeated propositions which have lately been renewed by that power and in consequence of the wish entertained by the Sublime Porte to testify the United States of America, its sentiments of friendship.—We, the Undersigned, Commissioners, invested with the high office of Chief of the Chancery of State of the Sublime Porte, existing forever, having been permitted by His very Noble Im-

perial Majesty to negotiate and conclude a treaty, and having thereupon conferred with our friend, the honorable *Charles Rhind*, who has come to this Imperial Residence, furnished with full powers to negotiate, settle, and conclude, the articles of a treaty, separately and jointly with the other two Commissioners, *Commodore Biddle* and *David Offley*, now at Smyrna, have arranged, agreed upon and concluded, the following articles.

Art. I. Merchants of the Sublime Porte, whether Musselmans or Rayahs, going and coming, in the countries, provinces, and ports, of the United States of America, or proceeding from one port to another, or from the ports of the United States to those of other countries, shall pay the same duties and other imposts that are paid by the most favored nations; and they shall not be vexed by the exaction of higher duties; and in travelling by sea and by land, all the privileges and distinctions observed towards the subjects of other Powers, shall serve as a rule, and shall be observed towards the merchants and subjects of the Sublime Porte. In like manner, American merchants who shall come to the well defended countries and ports of the Sublime Porte, shall pay the same duties and other imposts that are paid by merchants of the most favored friendly Powers, and they shall not, in any way, be vexed or molested. On both sides, travelling passports shall be granted.

Art. II. The Sublime Porte may establish *Shehbenders* (Consuls) in the United States of America; and the United States may appoint their citizens to be Consuls or Vice Consuls, at the commercial places in the dominions of the Sublime Porte, where it shall be found needful to superintend the affairs of commerce. These Consuls or Vice Consuls shall be furnished with *Berats* or *Firmans*; they shall enjoy suitable distinction, and shall have necessary aid and protection.

Art. III American merchants established in the well defended States of the Sublime Porte, for purposes of commerce, shall have liberty to employ *Semsars* (brokers) of any nation or religion, in like manner as merchants of others friendly Powers; and they shall not be disturbed in their affairs, nor shall they be treated, in any way, contrary to established usages. American vessels arriving at, or departing from, the ports of Ottoman Empire, shall not be subjected to greater visit, by the officers of the custom-house and the Chancery of the Port, than vessels of the most favored nation.

Art. IV. If litigations and disputes should arise between the subjects of the Sublime Porte and citizens of the United States, the parties shall not be heard, nor shall judgment be pronounced unless the American Dragoman be present. Causes in which the sum may exceed five hundred piasters, shall be submitted to the Sublime Porte, to be decided according to the laws of equity and justice. Citizens of the United States of America quietly pursuing their commerce, and not being charged or convicted of any crime or offence, shall not be molested; and even when they may have committed some offence they shall not be arrested and put in prison, by the local authorities, but they shall be tried by their Minister or Consul, and punished according to their offence, following, in this respect, the usage observed towards other Franks.

Art. V. American merchant vessels that trade to the dominions of the Sublime Porte, may go and come in perfect safety with their own flag; but they shall not take the flag of any other Power, nor shall they grant their flag to the vessels of other nations and powers, nor to the vessels of rayahs. The Minister, Consuls, and Vice Consuls of the United States, shall not protect secretly or publicly, the rayahs of the Sublime Porte, and they shall never suffer a departure from the principles here laid down and agreed to by mutual consent.

Art VI. Vessels of war of the two contracting Parties, shall observe towards each other, demonstrations of friendship and good intelligence, according to naval usage; and towards merchant vessels they shall exhibit the same kind and courteous manner.

Art. VII. Merchant vessels of the United States, in like manner as vessels of the most favored nations, shall have liberty to pass the Canal of the Imperial Residence, and go and come in the Black Sea, either laden or in ballast; and they may be laden with the produce, manufactures and effects, or the Ottoman Empire, such as are prohibited, as well as of their own country.

Art VIII. Merchant vessels of the two contracting Parties shall not be forciby taken, for the shipment of troops, munitions and other objects of war, if the Captains or proprietors of the vessels, shall be unwilling to freight them.

Art IX. If any merchant vessel or either of the contracting parties, should be wrecked, assistance and protection shall be afforded to those of the crew that may be saved: and the merchandise and effects, which it may be possible to save and recover, shall be conveyed to the Consul, nearest to the place of the wreck, to be by him, delivered to the proprietors.

The foregoing articles, agreed upon and concluded, between the Riassert (Chancery of State,) and the above mentioned Commissioner of the United States, when signed by the other two Commissioners, shall be exchanged. In ten months from the date of this *Temessuck*, or instrument of treaty, the exchange of the ratifications of the two Powers shall be made, and the articles of this treaty shall have full force and be strictly observed by the two Contracting Powers.

Given the fourteenth day of the moon Zilcaade, and in the year of the Hegira, 1245, corresponding with the seventh day of May, of the year one thousand eight hundred and thirty of the Christian Æra. (Signed)

MOHAMMED HAMID,
Reis-ul-Kutab. (Reis Effendi).

TREASURY DEPARTMENT.

ROGER B. TANEY, of Maryland, Secretary, $6,000 per annum.

The office of Secretary of the Treasury was created by act of the 2d September, 1789. He superintends all the fiscal concerns of the Government, and upon his own responsibility, recommends to Congress measures for improving the condition of the revenue. He holds his office at the will of the President; is, by usage, a member of the Cabinet; and, ex officio, one of the Commissioners of the Sinking Fund. By an act of Congress, of the 15th of May, 1820, the Treasury Department has been invested with extraordinary powers for the recovery of public moneys not accounted for or withheld by officers receiving them prior to such moneys being paid into the Treasury. Warrants of distress in the nature of executions upon judgments, are authorized upon certificates of balances from the first Comptroller, against principals and sureties in default; and the judges of the United States are, by the same law, clothed with extensive chancery jurisdiction, with a view of ameliorating any undue severity to individuals, which may possibly occur under the warrants in question.

By the act of 29th May, 1832, the office of Solicitor of the Treasury was created. A portion of the duties of this office had been previously under the act of the 15th May, 1820, performed by the fifth Auditor, as agent of the Treasury.

All accounts of the government are finally settled at the Treasury Department: for which purpose it is divided into the office of the Secretary (who superintends the whole, but who is not, therefore, absolute, with respect to the power of adjusting claims or of paying money;) into two Comptrollers, five Auditors, a Register, a Treasurer, and a Solicitor. The Auditors of the public accounts are empowered to administer oaths or affirmations to witnesses in any case in which they may deem it necessary for the due examination of the accounts with which they are charged.

Besides the disbursement of moneys for the great objects of government there are contingent funds appropriated yearly by Congress. These are expended for such objects as could not well be foreseen, by some one of the clerks or other officer belonging to each of the departments, who is especially entrusted with that business, to whom the accounts of such contingencies must be presented. He takes his receipt in his own name, and at the end of each quarter of a year is brought to a settlement himself, for all his disbursements, at the Treasury Department.

The act of Congress of May 7, 1822, requires, that all moneys appropriated for the use of the War and Navy Departments shall, from and after the 30th of June 1822, be drawn from the Treasury by warrants of the Secretary of the Treasury, upon the requisitions of the Secretaries of those departments, countersigned by the Second Comptroller, and registered by the proper Auditor.

The act of January 31st, 1823, prohibits an advance of public money in any case whatever; and requires all persons who may receive public money for disbursement, to render quarterly accounts to the proper accounting officers of the Treasury, for settlement: and all officers of the government who neglect to comply with this regulation, are to be promptly reported to the President, and dismissed from the public service.

CLERKS IN THE TREASURY DEPARTMENT.

McCLINTOCK YOUNG, Chief Clerk, superintends the business of the office generally; receives the directions of the Secretary on matters to be acted upon; refers to the officers of the Department all matters requiring their examination, distributes the business to the clerks, and submits to the Secretary the business prepared by them; and directs remittances to foreign bankers..... $2000 00

James L. Anthony, prepares the warrants for payment into the Treasury; issues and registers the warrants for payments, under the appropriations for civil diplomatic, and miscellaneous expenditures; and keeps accounts of all such appropriations; and also keeps an account of the bonds taken and liquidated at each custom house..... 1600 00

Samuel M McKean, attends to the business with banks; to remission of fines, penalties, and forfeitures; to applications for release from imprisonment: to matters relating to internal improvement, and to the Mint establishment: and to such subjects as are submitted by the Solicitor of the Treasury and District Attorneys, not immediately connected with the branches of business assigned to others, and all claims under like circumstances*..... 1600 00

Thomas Dungan, issues and registers the warrants for payments under the appropriations for the naval service; keeps the appropriation accounts of the Navy; prepares the warrants for the transfer of stocks from one loan office to that of another; and keeps an account of the accruing duties..... 1400 00

Francis A Dickins, 1st. Examines and registers claims under the act of 15th of May, 1828; "for the relief of certain surviving officers and soldiers of the army of the revolution," prepares and registers certificates for those allowed and warrants for their payment, and generally attends to all correspondence or other business connected with those claims. 2d Examines and registers claims under the act of the 5th July, 1832; "for liquidating and paying certain claims of the State of Virginia," and attends to all correspondence and other business connected with those claims. 3d Issues and registers warrants for the payment of duties refunded under the act of 2d March, 1833; and 4 h Transmits Mediterranean passports and sea letters to the collectors of the customs†.. .. 1400 00

John McGinnis, jun. attends to the business submitted from the General Land Office, and other offices relating to accounts or business of the land officers; to all matters concerning the revenue cutter services and marine hospitals, and charges or complaints for official misconduct against any of those officers. 1400 00

Gilbert Rodman, keeps an account of moneys received and expended by collectors of the customs; examines applications for entries under the 10th section of the Act of the 1st of March, 1823; appeals from appraisements under the 18th section of

*Acts as Translator of foreign Languages for which he receives an additional salary of $150.

†For which last service he receives an additional salary of $150.

John N. Lovejoy, messenger..... 700 00

Jacob Hines, assistant messenger..... 350 00

SECOND COMPTROLLER'S OFFICE,

James B. Thornton, Comptroller, $3,000 per annum.

In the brief view given of the powers of the Comptrollers of the Treasury, it may be sufficient to remark that, within the sphere of their respective duties they are the ultimnte law officers of the Government

The Second Comptroller is independent of the First. His office was established to effect a prompt settlement of the public accounts, which from the constantly increasing expenditures of the government, had accumulated, and which with other duties, was found to exceed the ability of one Comptroller. The second Comptroller therefore would be more correctly styled the Comptroller of the accounts of the Army, Navy, and Indian disbursements. It may be here remarked, that the duties of advancing money, and accounting for it are distinct. The Secretaries of the Departments exercise a discretion, in advancing from the appropriations, the requisite sums to the disbursing officers; but it is made the duty of the accounting officers of the Treasury, independent of the Secretaries, to require accounts and vouchers, shewing the legal application of the money. In this division of duties, is perceived a salutary check. The hands of the executive are left unrestrained in advancing to the agents the necessary funds, to accomplish the purposes of the government; but these agents have to account to officers of the Treasury, leaving the executive no power to misapply the funds advanced.

It is the duty of the 2d Comptroller to revise and certify the accounts stated in the offices of the 2d, 3d, and 4th Auditors; and he decides on all appeals from the decisions of those Auditors, and his decision is final except relief is granted by Congress.

In the office of the 2d Comptroller, a record is kept of the accounts settled, showing the balances due to and from the United States; a record of all the requitions for money, drawn by the Secretaries of the War and Navy Departments; and on its files are placed all the contracts involving the payment of money, entered into by those Departments. It is also the duty of the Comptroller to direct suits and stoppages on account of delinquencies; to keep an account with each specific appropriation, and to make annual and other statements of the disbursements, as required by law. He also prescribes the forms for the accounts and vouchers, and of keeping and stating the accounts, subject to his revision.

CLERKS IN THE SECOND COMPTROLLER'S OFFICE.

JOHN N. MOULDER, Chief Clerk, is charged with the general superintendence of the details of the business of the office; with the registering, filing, and safe keeping of the bonds of Disbursing Officers, and of the contracts and bonds for services and supplies in the War and Navy Departments; with drafting the forms and instructions issued to the Disbursing officers and Agents of those Departments, for keeping and rendering their accounts in an uniform and systematic manner; with assisting the Comptroller in the general correspondence of the office; and in occasionally aiding in the examination and revision of accounts reported by the respective Auditors for the decision of the Comptroller..... 1700 00

Jonathan Seaver, is charged with the examination of the accounts for the Naval Expenditures; for the Marine Corps; for the Naval Hospitals; and for the Payments of the Navy and Privateer Pensioners, of which he makes an entry of each semi-annual Payment. He keeps the Record of the Balances due to and from the United States, by the Disbursing officers of the Navy; and acts as Agent for paying the salaries and disbursing the Contingent Fund of the Second Comptroller's office..... 1400 00

John M. Broadhead, his duties are to open and keep an account under each head of the numerous appropriations connected with the War Department; to make such reports and statements as are from time to time officially required by officers of these Departments, through the Second Comptroller, and to prepare condensed reports of the Army Appropriations, at the end of each year, for the information of Congress..... 1150 00

James L. Cathcart, opens and keeps an account under each head of appropriation connected with the Naval Service, Navy Pension, Navy Hospital, and Privateer Pension Fund; makes such statements as are from time to time required by the Navy Department, through the 2d Comptroller; and prepares condensed Reports at the end of each year for the information of Congress: he likewise records all requisitions drawn by the Secretary of the Navy on the Treasury, and all transfer and refunding requisitions, and keeps all the books including the leger, which appertain to the Naval establishment, and keeps the indexes..... 1150 00

John Davis, is charged with the revision of the Paymaster's accounts; the accounts appertaining to the Indian Department; the accounts for expenditures under the Engineer Department; for fortifications, surveys, and improvements, of roads and canals, rivers, harbors, purchasing Department &c. 1400 00

Joseph Manahan, is charged with the revision of all the pension accounts reported by the Third Auditor, with the entries of the same on the check books; and with the entries of the semi-annuel statements from the War Department, of the changes arising from the deaths, transfers, &c on the rolls of the respective agencies..... 1000 00

James M. Cutts, charged with the revision of the accounts for Quarter Master Department; Subsistence and Hospital Department; Arsenals, arrearages, and accounts for the relief of individuals..... 1150 00

Alfred Hume, Recording Clerk, and accounts of recruiting, contingent, ordnance, armories, arming and equipping Militia, and armament of fortifications..... 800 00

John Sessford, messenger; in addition to his appropriate duties as messenger, he is charged with the order and safe keeping of the library, maps, &c. belonging to the office..... 700 00

SOLICITOR'S OFFICE.

Virgil Maxcy, Solicitor of the Treasury, $3,500 per annum.

The office of the Solicitor of the Treasury was created by the act of 29th May, 1830. He superintends all the civil suits, commenced in the name of the United States, in all the courts, until they are carried up to the Supreme Court of the United States, when they come under the superintendence of the Attorney General. He instructs the District Attorneys, Marshals and Clerks in all matters and proceedings appertaining to those suits, and receives from them, after each term of court, reports of their situation and progress. He receives from collectors reports of custom house bonds put in suit, and of informations, &c. directed by them. He establishes, with the approbation of the Secretary of the Treasury, such rules and regulations, not inconsistent with law, for the observance of Collectors, District Attorneys, and Marshals, as may be deemed necessary for the just responsibility of those officers and the prompt collections of all revenues and debts due and accruing to the United States.

This officer also has charge of all lands and other property, which have been or shall be assigned, set off, or conveyed to the United States in payment of debts, and all trusts created for the use of the United States, in payment of debts due them; and has power to sell and dispose of lands assigned or set off to the United States in payment of debts, or being vested in them by mortgage or other security for the payment of debts.

CLERKS IN THE SOLICITOR'S OFFICE.

GENERAL LAND OFFICE.

Elijah Hayward, Commissioner, $3,000 per annum

Prior to the 25th of April, 1812, grants of land were issued by Letters Patent from the Department of State. By an act of that date, a General Land office was established, in which all patents for land are now made out and recorded.

By the act of 24th of April, 1820, all sales of Public Lands, made after July 1st of that year are made for cash; and complete payment must be made on the day of purchase. The minimum price is fixed at $1 25 per acre, below which they cannot be disposed of.

By the act of 1812, the President was required to sign all land patents, but under a law of the last session, a Secretary has been appointed to sign them for him. During the past year, upwards of forty thousand patents for lands sold have been issued.

CLERKS IN THE GENERAL LAND OFFICE.

JOHN M. MOORE, Chief Clerk		$1700 00
Samuel D King, has in charge the reports of the Commissioners on private land claims—attends to all enquiries connected with those claims, and issues the patents therefor—attends to the subject of the locations of Indian reserves, with various miscellaneous duties		1150 00
Frederick Keller, issues the patents for the Virginia Military bounty lands, and examines warrants and prepares documents whereon military bounty land *Scrip* is issued at the Treasury, and attends to the miscellaneous enquiries and correspondence connected with these subjects		1150 00

WAR DEPARTMENT.

LEWIS CASS, of Ohio, Secretary, $6,000 per annum.

The War Department, as organized under the present Constitution, was created by act of 7th August, 1789. The Secretary of War, at first, had the superintendence of Naval Affairs. On the 30th of April, 1789, however a separation took place, and a Navy Department was established. The Secretary of War superintends every branch of the Military Department; and is, by usage, a member of the Cabinet. He holds his office at the will of the President. Attached to the War Department, and under the immediate direction of the Secretary, are, a Requisition Bureau, a Bounty Land Bureau, a Pension Office, an Office of Indiam Affairs; and an Engineer Office, a Topographical Office, an Ordnance Office, an Office for the Commissary General of Subsistence, an office for the Clothing Department, a Paymaster General's office, and a Surgeon General's office. All these offices, together with the Head Quarters of the Commanding General, (major General Macomb) and the adjutant General's and Quartermasters General's offices, are located at Washington. To this Department belongs the erection of all fortifications, making all topographical surveys; surveying and leasing the national lead mines; and the direction (under the laws) of intercourse with Indian tribes.

CLERKS IN THE SECRETARY'S OFFICE.

Cary A. Harris, Clerk..... 1400 00
John C. Reynolds, Clerk..... 1000 00
William Markward, messenger..... 650 00
Francis Datcher, assistant messenger..... 400 00

CLERK IN THE REQUISITION BUREAU.

LAWRENCE L. VAN KLEECK..... 1600 00

From this Bureau all the requisitions of the War Department are made out on the Treasury, and salaries and the contingencies of the Department paid.

CLERKS IN THE BOUNTY LAND BUREAU.

WILLIAM GORDON, Principal..... 1400 00
Edward Stephens, Clerk..... 1000 00

The Bounty Land Bureau of the War Department is a Bureau in which claims for military bounty lands, originating in the revolutionary and late war, are examined, and from which military bounty land warrants issue.

OFFICE OF INDIAN AFFAIRS.

ELBERT HERRING, Commissioner..... 3000 00
Daniel Kurtz, Chief Clerk..... 1600 00
Hezekiah Miller, Clerk..... 1400 00
Samuel J. Potts, Clerk..... 1000 00
William Ward, Clerk..... 1000 00

This office which had previously been one of the Bureaus of the War Department, was created by an act of July 9, 1832, entitled "an act to pro-

vide for the appointment of a Commissioner of Indian Affairs, and for other purposes."

This act provides that the Commissioner of Indian Affairs, who shall be appointed by the President and Senate, shall, under the direction of the Secretary of War, and agreeably to such regulations as the President may, from time to time prescribe, have the direction and management of all Indian Affairs, and of all matters arising out of Indian relations — All accounts and vouchers for claims and disbursements connected with Indian affairs must be transmitted to the Commissioner for administrative examination, and by him be passed to the second Auditor of the Treasury for settlement.

		James Benson, messenger	300 00

The Pension Office was created by Congress, at its last session: the claims for Pensions had been previously settled by a Bureau of the War Department. (See Vol XI. p. 115.) In the office, as now established, the Commissioner of Pensions executes under the direction of the Secretary of War, such duties in relation to the various Pension laws, as may be prescribed by the President of the United States.

OFFICES OF THE GENERAL STAFF OF THE ARMY.

HEAD QUARTERS OF THE ARMY.

Major General Alexander Macomb, General-in-Chief.

Lieutenant Samuel Cooper, Aid-de-Camp, 4th Artillery.

Lieutenant Abraham Van Buren, Aid-de-Camp, 2d Infantry.

The Army of the United States is placed under the command of the Major General, who is generally styled, *the General in Chief*.

His duties comprise the arrangement of the military force in such manner as to give protection to the maritime frontier and to the interior border. He superintends the recruiting service: the discipline and police of the army; orders general courts martial, and decides on all cases, except when the life of an officer or soldier is affected, or the commission of an officer. It is his province to see that the laws and regulations governing the army are enforced, and that justice is done to all concerned In his duties he is assisted by the Adjutant General, through whose office all orders are issued to the army, and returns of its strength made, as well as the general military correspondence in relation to the details of service He is also assisted by the two Inspectors Generals, who, under his orders, inspect the condition of the several regiments, corps, and posts, and inquire minutely into every subject relating to the welfare of the army; and recommend such improvements as may add to the comfort of the officers and men; they also report on the general con-

dition of corps, and the individual character of its members. The General in Chief has two Aides-de-Camp who assist him in his correspondence and in the recording of it, and who also perform the duties of assistant adjutants general.

There are no clerks attached to the head quarters of the army, the correspondence and duties being of a delicate and confidential nature, in a great degree, it is entrusted only to those who, by previous education and experience, can properly appreciate and understand its object.

ADJUTANT GENERAL'S OFFICE.

Colonel R. Jones, Adjutant General.
Lieutenant William B. Davidson, 3d Artillery.
Lieutenant James H. Prentis, 1st Artillery.
Lieutenant Lorenzo Thomas, 4th Infantry.
Brooke Williams, Clerk.....1150 00
John H. Hepburn, Clerk.....1000 00
James L. Addison, Clerk.....800 00

This office is the repository of the records which refer to the *personnel* of the Army, in war, as well as in time of peace, and of the military history of every officer and soldier, from the earliest period of the government, so far as these may have been preserved. It is here where all military appointments and commissions are made out and registered, where the names of all enlisted soldiers are entered, and their size, roll, and enlistments, recorded and filed, &c. It is in this office where the monthly returns of the troops, and muster rolls of companies, required by the 13th and 19th Articles of War are received and preserved ; where the original proceedings of General Courts Martial are deposited and entered, where the inventory of the effects of deceased officers and soldiers are forwarded and recorded. [90th and 94th Articles of War.]

The Adjutant General of the Army is charged with the registery of all commissioned officers, and with the distribution of their commissions ; with the record of all appointments in the Army, promotions, resignations, deaths, &c. All orders which emanate from General Head Quarters of the Army, and all regulations and general orders from the War Office, are communicated to the troops by the Adjutant General

In this office, the annual returns of the Militia of the several States and Territories are deposited for safe keeping, as well as arms, munitions, and accoutrements pertaining to the same, required by law to be made to the President of the United States. The general returns of the militia of the United States, required for the use of Congress, pursuant to the act of March 2d, 1803, are consolidated in this office. Here all appointments and commissions of the officers of the militia of the District of Columbia, are registered and distributed.

ENGINEER DEPARTMENT.

Brevet Brig. Gen. Charles Gratiot, Corps of Engineers, Chief Engineer.
Lieutenant W. H. C. Bartlett, of the Corps of Engineers, Assistant
Benjamin Fowler, Clerk.....1150 00
J. C. Wilson, Clerk.....1000 00
Willis Fawcett, Clerk.....800 00

The chief of the Corps of Engineers is stationed at the seat of Government, and directs and regulates the duties of the Corps of Engineers, and those also of such of the Topographical Engineers as may be attached to the Engineer Department; and also is the Inspector of the Military Academy, and is charged with its correspondence.

The duties of the Engineer Department comprise—reconnoitring and surveying for military purposes and for internal improvements, the selection of sites, the formation of plans and estimates, the construction, repair, and inspection of fortifications, and the disbursements of the sums appropriated for the fulfilment of those objects severally, comprising those of the Military Academy. Al o, the superintendence of the execution of the acts of Congress in relation to internal improvements by roads, canals, the navigation of rivers, and the repairs and improvements connected with the harbours of the United States, or the entrance into the same, which may be authorized by acts of Congress, with the execution of which the War Department may be charged.

The function of the engineers being generally confined to the most elevated branch of military science, they do not assume, nor are they subject to be ordered on any duty beyond the line of their immediate profession, except by special authority through the War Department—and when so arranged to other duties, either on detachment or otherwise, they have precedence according to their commissions, which, at all times, entitle them to every mark of military respect.

TOPOGRAPHICAL BUREAU.

Brevet Lt. Col. John J. Abert, Topographical Engineers, Superintendent.
Lieut George D. Ramsay, 1st Artillery, Assistant.
Robert Fowler, Clerk..... ..... 800 00

This Bureau has charge of all topographical operations and surveys for military purposes, and for purposes of internal improvements, and of all maps, drawings and documents in relation to those duties.

ORDNANCE DEPARTMENT.

George Bomford, Colonel of Ordnance.
William H. Bell, Captain of Ordnance.
William Riddall, Clerk..... .....1150 00
A. G. Glynn, Clerk 1000 00
Morris Adler, Clerk..... .....800 00
John Robb, Superintendent, Springfield, $100 pr month and 4 rations.
C. Howard, Storekeeper, Springfield, Pay, &c. of Captain of Infantry.
J. Weatherhead, Master Armourer, Springfield, $50 pr m. and 2 rations.
George Rust, Superintendent, Harper's Ferry, $100 pr m. and 4 rations.
D. Bedinger, Storekeeper, Harper's Ferry, Pay, &c. of Captain of Inf.
Benjamin Moor, Storekeeper, Harper's Ferry $50 pr m. and 2 rations.
Adam Hoops, Storekeeper..... .....
James R. Butler, Storekeeper, Pittsburg.....
Samuel Perkins, Storekeeper, New York, City..... } Pay, &c. of Cap-
Daniel S. Gaillard, Storekeeper, Watervliet, N. Y.. } tain of Infantry
Roger Alden, Storekeeper, West Point, N. Y.....
Marcus C. Buck, Storekeeper, near Richmond, Va.. .

The Ordnance Department which had been abolished and merged in the Artillery, by the act of 2d March, 1821, was re-organized under the act of 5th April, 1832, entitled, "An act to provide for the organization of the Ordnance Department" Under this law it consists of one Colonel, one Lieutenant Colonel, two Majors, and ten Captains, and as many enlisted men, as the public service may require, not exceeding two hundred and fifty.

It is the duty of the Colonel of the Ordnance Department to direct the inspection and proving of all pieces of ordnance, cannon balls, shot, shells,

small arms and side arms, and equipments procured for the use of the armies of the United States; and to direct the construction of all cannon and carriages, and every implement and apparatus for ordnance, and all ammunition wagons, travelling forges, and artificers' wagons, the inspection and proving of powder, and the preparation of all kinds of ammunition and ordnance stores. It is also his duty to furnish estimates, under the direction of the Secretary of War, to make contracts and purchases for procuring the necessary supplies of arms, equipments, ordnance, and ordnance stores.

The general denomination of ordnance and ordnance stores, comprehends all cannon, howitzers, mortars, cannon balls, and shells for the land service, all gun carriages, caissons, travelling forges and pontoons, with all their equipments, and all other apparatus and machines required for the service and manœuvres of artillery in garrison, sieges, or in the field, together with the materials for their construction and repair. Also, all small arms, side arms and accoutrements for the artillery, cavalry, infantry, and riflemen—all ammunition for cannon and small arms; and all stores of expenditures for the service of the artillery; materials, utensils and stores for laboratories; all intrenching and miner's tools, for the attack or defence of places; armourer's tools for the repair of arms, and artificers' tools of every description, required for the construction or repair of gun carriages and artillery equipments. The ordinary articles of camp equipage, such as axes, spades, shovels, mattocks, &c. are not included.

ORDNANCE SERGEANTS.

The act of 5th April, 1832, providing for the organization of the Ordnance Department, authorizes the Secretary of War to select from the sergeants of the line of the army, who shall have faithfully served eight years in the service, four years of which in the grade of non-commissioned officer, as many Ordnance Sergeants, as the service may require, not to exceed one for each Military Post; whose duty it shall be to receive and preserve the Ordnance, Arms, Ammunition, and the other Military Stores under the direction of the Commanding Officer of the Post, and who shall receive for their service, five dollars per month in addition to their pay in the line. The following named Sergeants have been selected accordingly, by the Secretary of War.

QUARTER MASTER'S DEPARTMENT.

General Thomas S. Jesup, Quarter Master General.
Major Trueman Cross, 7th Infantry, Quartermaster.
Captain Thomas F Hunt, 5th Infantry, Assistant Quartermaster.
William A. Gordon, Clerk.. .....1150 00
Levin Belt, Clerk..... 900 00

The objects of this department are, to insure an efficient system of supply and to give facility and effect to the movements and operations of the army.

The Quartermaster General is stationed at the City of Washington, but occasionally visits the several stations of the subordinate officers of his department. He has, under the direction of the Secretary of War, the exclusive control of all the quartermasters, and assistant quartermasters; and of all officers and agents acting in, or making disbursements on account of the department; in every thing relating to the administrative branch of their duties, and their accountability. He has a like control of all regimental and company officers, in every thing relating to barracks or quarters, and to the accountability for supplies of the quartermaster's and purchasing departments One quartermaster is attached to the office of the quartermaster general, who in addition to his other duties is charged with the disbursements at Washington, and in the absence of the quartermaster general, has the direction of the office. There is also attached to the office an assistant quartermaster, and as may subaltern officers, &c. as the service from time to time requires.

All communications relating to the duties of the department, or to any

branch or officer thereof, except from commanding generals of divisions, or departments of armies, must be addressed to the quartermaster general.

It is the duty of the Quartermaster general to make himself acquainted with the frontiers, both maritime and interior, and with the avenues leading to the contiguous Indian and foreign territories; with the resources of the country, in military supplies, and the means of transportation, particularly of the districts on the frontiers; with the most eligible points for concentrating troops and collecting supplies, whether in relation to offensive or defensive operations; with the relative expense of concentrating at particular positions and the advantages of those positions. It is also his duty to designate the routes of communication between different posts and armies—the course of military roads—and the sites for permanent and temporary depots of provisions and military stores.

The officers of the quartermaster's department are enjoined to collect information in relation to all these points, and to make themselves acquainted with the state of the roads, the course and description of the rivers, and the most direct routes between the different military posts within their respective departments.

The quartermaster general can assign the officers of his department to such stations as he may think proper; and officers so assigned cannot be removed from their stations, nor be subject to detail, nor be employed upon any other duties than those of their department, except by his order or that of the Secretary of War.

The officers of this department must provide quarters and transportation for the troops, and transportation for all military stores, provisions, camp and garrison equipage, and artillery, and provide for opening and repairing roads, and constructing and repairing bridges, which may be necessary to the movements of any part of the army.

They must provide good and sufficient store houses for all military supplies and for all provisions deposited by the commissary general and his assistants, or under contracts between individuals and the government, and appoint storekepers, when necessary, for the custody of such stores or provisions, or any other property of the government placed there.

They purchase all forage, fuel, straw and stationary, for the use of the troops, and have the same transported and issued agreeably to the regulations. They purchase dragoon and artillery horses, and horses, oxen, wagons, carts and boats, for the transportation of baggage, and for garrison purposes; and provide materials for constructing and repairing barracks, hospitals, stables and bridges.

No purchase can be made on public account, in time of peace, by any officer of the quartermaster's department, but the articles above enumerated, except by special authority from the Secretary of War, communicated through the quartermaster general, or at the risk of the officer ordering the supplies.

Officers of this department receive from the purchasing and subsistence departments, and from the ordnance depots, all medical and hospital stores, provisions, arms, ammunition, and ordnance, and transport the same to the place of destination, and make distribution thereof, agreeably to the direction given to the articles by the commissary general of purchases, the commissary general of subsistence, the ordnance officer, or the general commanding the division or department to which they are destined.

As far as practicable, all supplies and services required in the operations of the quartermaster's department, are procured by contracts, based upon proposals respecting the same, previously advertised for. When this course is found impracticable, or inconvenient to the public service, those supplies and services are obtained by open purchase or agreement in the market.

All contracts entered into, are executed in triplicate, one of which in all cases is transmitted to the quartermaster general's office. They must be accompanied by a bond of the contractor, conditioned for the faithful per-

formance of his stipulations, under penalty of one half the amount involved, and supported by two sureties, of whose sufficiency satisfactory evidence is required, in the absence of personal knowledge.

Proposals are not to be opened until the time shall have elapsed within which they are to be received, and in all cases the several bidders have, on application, the privilege of reference to the proposals after they shall have been acted upon. A copy of all advertisements for proposals are transmitted to the quartermaster general's office, with the contracts to which they relate; also, an abstract of the proposals, showing the names and terms of the several bidders. The proposals themselves are carefully preserved for future reference.

Officers of the quartermaster's department have the right, without reference to any other authority, to pay for all supplies or services for which they are authorized by these regulations to contract; but advances on contracts being strictly prohibited by law, under all circumstances, payment is, in no case, made for supplies until they have been delivered, nor for services until they have been performed.

Payment for services or supplies are as far as practicable, made within the quarter during which the service shall have been rendered, or the supplies furnished. When this is not practicable, either from the want of funds or any other cause, the fact must be reported to the quartermaster general at the close of the quarter; and all property received, whether paid for or not, must appear on the property returns of the quarter in which it shall have been received.

Due bills are not, in any case, given by officers of the quartermaster's department; nor are receipts taken from any claimant, whether for supplies or services, unless the amount specified be actually paid.

No officer or other person employed in the quartermaster's department can be concerned, directly or indirectly, either for himself or others, in any contract with any department of the government, nor in the purchase of any claim of the government, whether of a soldier or a citizen, nor in the purchase or sale of any article of military supply, except on public account.

All officers and agents of the quartermaster's department, are required to keep and render their accounts, both of money and property, according to the forms prescribed by the regulations; and each officer and agent of the department must forward his accounts to the office of the quartermaster general, within twenty days after the expiration of the quarter; and it shall be the duty of the quartermaster general to examine and transmit them, with his remarks, to the proper accounting officers of the treasury department.

Any officer or agent of the quartermaster's department, who fails to forward at the time prescribed, any report, estimate, return, or statement, which he is required by the regulations to make, is removed, and his neglect is the subject of military investigation; unless he explain the cause of such failure to the satisfaction of the quartermaster general.

The quartermaster general may, whenever he shall deem it necessary, cause a thorough inspection to be made of the books and accounts of the quartermasters, and of all officers and agents making disbursements on account of the department. This inspection embraces property as well as money: and extends to contracts—to prices paid for articles purchased—prices paid for transportation— and generally, to every article of supply, and to all effects connected with the department.

The books and accounts of the quartermaster general is subject to a similar inspection.

Whenever private buildings are occupied as quarters, or lands for encampments, by the troops of the United States, a reasonable compensation is paid to the proprietor by the quartermaster of the department, post, or detachment. When the rate of compensation cannot be satisfactorily agreed upon, disinterested persons are appointed by the quartermaster and proprietor, to appraise and determine the rent

Every officer of the quartermaster's department must, before entering upon the duties of his office, give bond to the United States with two or more sufficient sureties, conditioned for the faithful performance of his duty The quartermaster general, in the sum of fifty thousand dollars, quartermasters twenty thousand, assistant quartermasters ten thousand, and storekeepers five thousand dollars. The sufficiency of the sureties to be certified by the district attorney, or United States' Judge, of the State or Territory in which they reside, or of which they are citizens.

There are in the Quartermaster's department, one Quartermaster general, with the rank of Brigadier General; four Quartermasters, with the rank of Majo s; and twenty assistant Quartermasters to be taken from the line.

PURCHASING DEPARTMENT.

C. Irvine, Commissary General of Purchases.....	3000 00
Timothy Banger, Chief Clerk.....	1550 00
William C. Irvine, Clerk.....	1000 00
James Irvine, Clerk..	950 00
Samuel Wilmar, messenger.....	700 00
William Banger, Clerk, military storekeeper's office....	900 00

Edwards S. Fayssoux, Military Storekeeper, Philadelphia.

Charles Litle, do. New York, each with Pay &c. of a Captain of Infantry.

The Commissary general of this department purchases on the orders and estimates of the War Department, all clothing, dragoon saddles and bridles, tents, tent poles, camp kettles, mess pans, bed sacks, and all other articles required for the public service for the army of the United States, excepting only such as are ordered to be purchased by the Ordnance, Quartermaster's, Subsistence, and Medical Departments.

All articles provided by the commissary general of purchases, and in a state fit for immediate issue to the troops must be deposited in the military store near the Schuylkill, and held subject to the orders of the War Department.

CLOTHING DEPARTMENT.

Brevet Major John Garland, 3d Infantry.

This Bureau has been added to those attached to the War Department, for the purpose of securing more system and responsibility in supplying clothing for the troops. Besides a general superintendency as to economy in obtaining articles necessary for the clothing of the army, the disposition of them when prepared for use, is entrusted to the officer in charge of his Department. His duty is to prepare estimates of clothing and camp equipage to be provided by the "Purchasing Department" as well as the detailed estimates of those supplies issued to the army He is required to keep sealed patterns, of every article procured under contracts, and to compare them from time to time, and whenever he deems it necessary, with the articles furnished, to establish their conformity as well as their quality. He is charged with all the correspondence of the department, upon subjects connected with the clothing of the army, and with the appropriations and requisitions. It is his duty, also, to procure information upon all topics relating to the clothing; and to suggest to the Secretary of War such alterations relative thereto as the good of the service may require, and to point out any disadvantages he may observe attending the present system. Patterns of every part of the dress of the officers, non-commissioned officers and privates of the army, made in conformity with the requirements of the General Order of the 11th June, 1832, restoring the facings worn by revolutionary army, are also kept in this department.

PAY DEPARTMENT.

Nath'n Towson, Pay Master General	2500 00	William Rich, Clerk	1700 00
Nathan'l Frye, Chief Clerk	1700 00	William D. Beall, Clerk	1100 00
		Jacob Brodbeck, messenger	700 00

The Paymaster General is stationed at the seat of Government; he is charged with the military responsibilities of this department, in all its details. The subordinate officers, being confined exclusively to the disbursement of public money, are subject only to the orders of the Secretary of War and the Paymaster general, except that they are liable to arrest by the senior officer of the department or command to which they may be arranged for the regular payment of the troops.

It being provided by law that "the troops be paid in such manner, that the arrears shall, at no time, exceed two months, unless the circumstances of the case shall render it unavoidable," regular payments become due on the last days of February, April, June, August, October, and December in each year. Payments are made on those days or as soon after as the situation of the troops and other unavoidable circumstances will permit, and in the same relation; in order that the [illegible] posis may be at regular periods.

There are, in the Pay Department, besides the Paymaster General, fourteen Paymasters, authorized by the act of March 2, 1821.

SUBSISTENCE DEPARTMENT.

Brevet Brig. Gen. George Gibson, Commissary General of Subsistence.
Major James H. Hook, Commissary of Subsistence.
Captain Thomas Hunt, 5th Infantry.

Charles G. Wilcox, Clerk, Subsistence of the Army	1350 00		
Richard Gott, Clerk do do	800 00		
George Forsyth, Clerk do do	1000 00		
Wm. C. Easton, Clerk, removal and subsistence of Indians	1600 00		
James Ord, Clerk do do do do	1000 00		
Townsend Waugh, Clerk do do do do	1000 00		
Basil H Waring, Clerk do do do do	800 00		

The present mode of supplying the army with subsistence was established by the 6th, 7th, 8th, 9th, and 10th sections of an act of Congress passed April 14, 1818, entitled "an act regulating the Staff of the Army of the United States;" and by the eighth section of "an act to reduce and fix the military peace establishment," passed 2d March, 1821. By the former, it was to continue for five years; and it was renewed for five more by "an act to continue the present mode of supplying the army," passed 23d January, 1823; and again for five years by act of same title, passed 2d March, 1829.

The first named act provides for a Commissary General of Subsistence, whose duties are to make estimates of expenditures for his department, contract and purchase subsistence for the army; regulate the transmission of funds to his assistants; make payments to contractors; adjust accounts for settlement; locate his assistants at their several stations; and, in general, provide for the proper administration of his department in all its ramifications. This act provides, also, for as many assistant commissaries as might be required, to be taken from the subalterns of the line. The 8th section of the act of 2d March, 1821, limits these assistants to fifty, and subjects them to the performance of duty in the quartermaster's department. By the act of 2d March, 1829, "the better to enable the Commissary General of subsistence to carry into effect the provisions of the above specified acts" two Commissaries are to be taken from the line of the army; one of whom has the same rank, pay, and emoluments as Quartermaster, and the other with rank, pay, and emoluments of Assistant Quartermaster.

MEDICAL DEPARTMENT.

Joseph Lovell, Surgeon General	2500 00
Richmond Johnson, Clerk	1150 00

The Surgeon General is stationed at the City of Washington; he is the director and immediate accounting officer of the medical department. He issues all orders and instructions relating to the professional duties of the officers of the medical staff; and calls for and receives, such reports and returns from them, as may be requisite to the performance of his several duties.

He receives from the medical director of armies, districts and departments, confidential reports relative to the condition of hospitals and infirmaries—the character and conduct of the surgeons and assistant surgeons—the state of their books and accounts—the medical topography of the several posts and stations—the nature of the prevailing complaints, their probable causes, and the treatment adopted.

He receives from every surgeon and assistant, performing the duties of surgeon, quarterly reports of sick, with such remarks as may be necessary to explain the nature of the diseases of the troops, the practice adopted, and the kinds of medicines and stores required, together with a copy of the entries made, for the quarter, in the book kept for the diary of the weather, accompanied with suitable observations.

He receives from every surgeon and assistant surgeon, having charge of public property of any description for the use of the sick, duplicate semi-annual returns of the same, in the form and manner prescribed, and also annual requisitions for the supplies required for each hospital, regiment, post or garrison, for the ensuing year, and transmits them, with his instructions to the officers of the apothecary's department.

He receives from the officers of the apothecary's department, duplicates of all invoices and supplies, put up for, and delivered or forwarded to, the several surgeons and assistant surgeons, and also a return of the several articles purchased, received and issued by them.

It is his duty to examine the returns and accounts of the surgeons and assistant surgeons, see that proper vouchers are sent for articles issued, and that the quantities expended with the sick are according to the number on the sick reports, and the nature of their complaints; if found to be so, he shall certify it, and at the end of each year, and oftener if necessary, send the returns and accounts thus certified, to the office of the proper accounting officer of the treasury, (*2d Auditor*) for final settlement.

It is his further duty to make to the Secretary of War such reports and returns as may be necessary to explain all the concerns of the department under his charge, with such remarks relative to the improvements in practice and police, and to the clothing, subsistence, &c. of the army, as may seem to be required for the preservation of health, the comfort and recovery of the sick, and the good of the public service.

Army surgeons have precedence in their several grades, according to dates of commissions. They may, when necessary, be employed as Judge Advocates, but are not to be detailed as members of either general, regimental, or garrison courts martial. They are not permitted to be engaged in private practice

The act of March 2, 1821, provides that the Medical Department shall consist of one Surgeon General, eight Surgeons, and forty-five Assistant Surgeons And the act of June 28, 1832, "to increase the number of Surgeons and Assistant Surgeons of the Army of the United States," authorizes the appointment of "four additional Surgeons, and ten additional Surgeon's Mates."

NAVY DEPARTMENT.

LEVI WOODBURY, of New Hampshire, Secretary, $6000 per annum.

The office of the Secretary of the Navy was created by act of April 30, 1798. He issues all orders to the Navy of the United States, and superintends the concerns of the Naval Establishment generally. A board of Navy Commissioners was instituted by act of 7th February, 1815, to aid him in the discharge of his duties. By act of July 10, 1832, all the powers conferred, and duties imposed, by existing laws, on the Commissioners of the Navy and Privateer Pension and Hospital Funds, were transferred to the Secretary of the Navy. He is by usuage, a member of the cabinet, and holds his office at the will of the President.

POSTAGE.

Rates of Postage, as established by act of Congress of 3d March, 1825, and the amendatory act of 2d March, 1827.

For single letters, composed of one piece of paper—	*Miles*	*Cents*
Any distance not exceeding	30	6
Over 30 and not exceeding	80	10
Over 80..... do.....	150.	12½
Over 150 .....do.....	400	18¾
Over 400		25

Double letters, or those composed of two pieces of paper, are charged with double those rates.

Triple letters, or those composed of three pieces of paper are charged with triple those rates.

Quadruple letters, or those composed of four pieces of paper, are charged with quadruple those rates.

One or more peices of paper, mailed as a letter, weighing one ounce, are charged with quadruple postage, and at the same rate should the weight be greater: and quadruple postage is charged on all packets containing four pieces of paper.

The postage on *Ship Letters*, if delivered at the office where the vessel arrives, is six cents—if conveyed by post, two cents in addition to the ordinary postage.

Newspaper Postage.—For each newspaper, not carried out of the State in which it is published, or if carried out of the State, but carried not over 100 miles,.....1 *cent.*
Over 100 miles, and out of the State in which it is published.....1½ *cents*

Magazines and Pamphlets.—If published periodically, distance not exceeding 100 miles.....1½ *cents* per sheet.
Ditto.....do.....over 100 miles.....2½.....do.....
If not published periodically, distance not exceeding
100 miles.....4.....do.....
Ditto.....do.....over 100 miles.....6.....do.....

Small pamphlets printed on a half or quarter sheet of royal, or less size, are charged with half those rates. Eight pages quarto are rated as *one sheet*, and all other sizes in the same proportion.

The number of sheets which it contains, must be printed or written on one of the outer pages of every pamphlet or magazine to be sent by mail. Where the number of sheets is not truly stated, double postage is charged.

Every thing not coming under the denomination of newspapers or pamphlets, is charged with letter postage.

Letters to Canada are forwarded through the agents of the United States at *Kingston*, Upper Canada, and *Montreal*, Lower Canada.

Any person, other than the Postmaster General, or his authorized agents, who shall set up a foot or horse post, for the conveyance of letters and packets, upon any post road, which is, or may be, established as such by law, shall incur a penalty of not exceeding fifty dollars for every letter or packet so carried.

Privilege of Franking.

Letters and packets to and from the following officers of the government, are by law received and conveyed by post, free of postage.

The President and Vice President of the United States; Secretaries of State, Treasury, War, and Navy; Attorney General; Postmaster General and Assistants Postmaster General; Comptrollers, Auditors, Register and Solicitor of the Treasury; Treasurer; Commissioner of General Land Office; Commissioners of Navy Board; Commissary General; Adjutant General; Inspectors General; Quartermaster General; Paymaster General; Superintendent of Patent Office; Commissioner of Indian Affairs; Speaker and Clerk of the House of Representatives, and Secretary of the Senate; and such individual who shall have been, or may hereafter be, President of the United States; and each may receive newspapers by post, free of postage.

Each member of the Senate, and each member and delegate of the House of Representatives, may send and receive, free of postage, newspapers, letters, and packets, weighing not more than two ounces, (in case of excess of weight, excess alone to be paid for,) and all documents printed by order of either House, from the period of sixty days before he takes his seat in Congress, until the commencement of the next Congress.

Postmasters may send and receive free of postage, letters and packets not exceeding half an ounce in weight; and they may receive one daily newspaper, each, or what is equivalent thereto.

Printers of newspapers may send one paper to each and every other printer of a newspaper within the United States, free of postage, under such regulations as the Postmaster General may provide.

Violation of Franking Privilege.

Any person who shall frank any letter or letters, other than those written by himself or by his order, in the business of his office, shall, on conviction thereof, pay a fine of ten dollars—and it is made the especial duty of Postmasters to prosecute for such offence. The law provides, however, that the Secretaries of State, Treasury, War, and Navy, and Postmaster General, may frank letters or packets on official business, prepared in any other public office in the absence of the principal thereof.

If any person, having the right to receive letters free of postage, shall receive, enclosed to him, any letter or packet addressed to a person not having that right, it is his duty to return the same to the Post Office, marking thereon the place from whence it came, that it may be charged with postage.

Any person who shall counterfeit the hand writing or frank of any person, or cause the same to be done, in order to avoid the payment of postage, shall, for each offence, pay five hundred dollars.

No Postmaster or assistant Postmaster can act as agent for lottery offices, or under any colour of purchase or otherwise vend lottery tickets, nor can any Postmaster receive free of postage, or frank any lottery schemes, circulars, or tickets. For a violation of this provision of the law, the persons offending shall suffer a penalty of fifty dollars.

No Postmaster, assistant Postmaster, or clerk employed in any Post Office, can be a contractor, or concerned in any contract for carrying the mail.

THE JUDICIARY.

The Judiciary power of the United States is vested in one Supreme Court, and in such inferior Courts as Congress, from time to time, establish. The present Judicial establishment of the United States consists of a Supreme Court, of thirty-one District Courts, and seven Circuit Courts, which are thus organized : the Supreme Court is composed of one Chief Justice and six Associate Justices, who hold a Court in the City of Washington, annually ; besides which, each of these Justices attends a certain Circuit comprising two or more districts, appropriated to each, and together with the Judge of the District compose a Circuit Court, which is holden in each District of the Circuit. The District Courts are held respectively by the District Judge alone. Appeals are allowed from the District to the Circuit Court, and from the Circuit to the Supreme Court ; and in some cases, where the inconvenience of attending a Court by a Justice of the Supreme Court is very great, the District Courts are invested with Circuit Court powers. Each State is one District, for the purpose of holding District and Circuit Courts therein, with the exception of New York, Pennsylvania, Virginia, Tennessee, Louisiana, and Alabama, each of which is divided into two Districts. There are, besides, Territorial Courts, which are temporary, and lose that character whenever a Territory becomes a State. In addition to the District Court for the District of Columbia, there is a Circuit Court for that District, which exercises, under the authority of Congress, similar common law and equity jurisdiction as the County Courts of Maryland and Virginia. Each Court has a Clerk, a Public Attorney or prosecutor, and a Marshal ; all of whom are appointed by the Executive of the United States, with the exception of the Clerks, who are appointed by the Courts. The compensation of the Judges are fixed by law ; that of the clerks, Attorneys, and Marshals consists of fees, and in a few instances, as it regards Attorneys and Marshals, of a yearly salary of about $200

By an act of Congress of the 15th of May, 1820, District Attorneys are to be appointed for four years only, removable at pleasure. Marshals have always held their offices for four years, removable at pleasure, in pursuance of the 27th section of the Act of the 24th of September, 1789. The Judges hold their offices during good behaviour, and can only be removed on impeachment. The appointments are made by the President, by and with the advice and consent of the Senate.

THE SUPREME COURT OF THE UNITED STATES.

The Supreme Court of the United States has exclusive jurisdiction of all controversies of a civil nature, where a State is a party, except between a State and its citizens ; and except, also, between a State and citizens of other States or aliens, in which latter case it has original, but not exclusive jurisdiction—and has exclusively all such jurisdiction of suits or proceedings against ambassadors, or other public ministers, or their domestics, or domestic servants, as a court of law can have or exercise consistently with the law of nations—and original, but not exclusive jurisdiction of all suits brought by ambassadors, or other public ministers, or in which a consul or vice consul shall be a party. The Supreme Court has also appellate jurisdiction from the Circuit Courts and Courts of the several States, in certain cases : and has power to issue writs of prohibi-

tion to the District Courts, when proceeding as courts of admiralty and maritime jurisdiction, and writs of mandamus, in cases war anted by the principles and usages of law, to any courts appointed, or persons holding office, under the authority of the United States.

A final judgment or decree in any suit, in the highest court of law or equity of a State in which a decision in the suit could be had, where is drawn in question the validity of a treaty or statute of, or an authority exercised under the United States, and the decision is against their validity—or where is drawn in question the validity of a statute of, or an authority exercised under any State, on the ground of their being repugnant to the constituton, treaties, or laws of the United States, and the decision is in favor of such their validity—or where is drawn in question the construction of any clause of the constitution, or of a treaty or statute of, or commission held under the United States, and the decision is against the title, right, privilege, or exemption, specially set up or claimed by either party, under such clause of the constitution, treaty, statute or commission—may be re-examined and reversed or affirmed, in the Supreme Court of the United States, upon a writ of error, the citation being signed by the chief justice, or judge, or chancellor, of the court rendering or passing the judgment or decree complained of, or by a justice of the Supreme Court of the United States, in the same manner, and under the same regulations, and the writ has the same effect, as if the judgment or decree complained of had been rendered or passed in a Circuit Court—and the proceeding upon the revisal is also the same, except that the Supreme Court, instead of remanding the cause for a final decision, may, at their discretion, if the cause shall have been once remanded before, proceed to a final decision of the same, and award execution. But no other error can be assigned or regarded as a ground of reversal in any such case, than such as appears on the face of the record and immediately respects the beforementioned questions of validity or construction of the said constitution, treaties, statutes, commissions or authorities in dispute. The following is the mode of suing out a Writ of Error.

In cases of writs of error to a Federal Court, the writ should be allowed, citation signed, and bond approved, by a Circuit Judge; where the writ is to a State Court, the same must be done either by a Justice of the Supreme Court or by the presiding Judge of the Court whose judgment is complained of. With the transcript of the record for the Supreme Court should be returned the writ, citation with service, and a copy of the bond, filing in the office below the bond and copies of the writ and citation.

DISTRICT COURTS OF THE UNITED STATES.

The District Courts of the United States, have, exclusively of the Courts of the several States, cognizance of all crimes and offences that are cognizable under the authority of the United States, committed within their respective districts, or upon the high seas, where no other punishment than whipping, not exceeding thirty stripes, a fine not exceeding one hundred dollars, or a term of imprisonment not exceeding six months is to be inflicted, and also have exclusive original cognizance of all civil causes of admiralty and maritime jurisdiction, including all seizures under laws of impost, navigation or trade, of the United States, where the seizures are made on waters which are navigable from the sea by vessels of ten or more tons of burthen, within their respective districts, as well as upon the high seas, saving to suitors, in all cases, the right of a common law remedy, where the common law is competent to give it; and also have exclusive original cognizance of all seizures on land or other waters than as aforesaid, made, and of all suits for penalties, and forfeitures incurred, under the laws of the United States. And they also have cognizance, concurrent with the Courts of the several States, or the Circuit Court, as the case may be, of all causes where an alien sues for a tort only in violation of the law of nations or a treaty of the United States. And also have cognizance, concurrent, as last mentioned, of all suits of common law, where the United States sue, and the matter in dispute amounts, exclusive of costs, to the sum or value of one hundred dollars. And also have jurisdiction, exclusively of the Courts of the several States, of all suits against consuls or vice consuls, except for offences above the description aforesaid. The trial of issues in fact, in the District Courts, in all causes except civil causes of admiralty and maritime jurisdiction, are by jury.

The act of 18th December, 1812, requires the district and territorial judges of the United States to reside within the districts and territories respectively, for which they are appointed; and makes it unlawful for any judge appointed under the authority of the United States, to exercise the profession or employment of counsel or attorney, or to be engaged in the practice of the law. And any person offending against the injunction or prohibition of this act shall be deemed guilty of a misdemeanor.

An act of April 5, 1832, provides, that in any cause of admiralty and maritime jurisdiction, or other cause of seizure, depending in any Court of the United States, any Judge of the said Court, in vacation, shall have the same power and authority to order any vessel, or cargo, or other property, to be delivered to the claimants, upon bail or bond, under the statute, as the case may be, or to be sold, when necessary, as such court has in term time, and to appoint appraisers, and exercise every other incidental power necessary to the complete execution of the authority granted by the act.

Augustus Jones, Marshal, St. Louis.
Joseph Gamble, Clerk, St. Louis.

It is made the duty of each *District Attorney* to prosecute, in the Judicial District for which he is appointed, all delinquents, for crimes and offences cognizable under the laws of the United States, and all civil actions in which the United States shall be concerned.

The *Marshal* for each District is required to attend the District and Circuit Court, and to execute throughout the District, all lawful precepts directed to him, and issued under the authority of the United States. He has power to command all necessary assistance in the execution of his duty. Before entering upon his office he must give bond with two sureties in the sum of twenty thousand dollars. Every Marshal, when removed from office, or when the term for which he is appointed shall expire, has power, notwithstanding, to execute all precepts which may be in his hands, at the time of such removal or expiration of office.

The clerks are appointed by the Supreme Court, and the several District Courts. The clerk for each District Court, is clerk also of the Circuit Court in such District. Each clerk is required to give bond in the sum of two thousand dollars, faithfully to discharge the duties of his office, and seasonably to record the decrees, judgments and determinations of the Court, of which he is clerk. In case of the District Judge in any District being unable to discharge his duties, the clerk certifies all suits or actions, to the next Circuit Court to be held in the District; and also, by leave or order of the Circuit Judge, to take, during the disability of the District Judge, all examinations and depositions of witnesses, and make all necessary rules and orders preparatory to the final hearing of all causes of admiralty and maritime jurisdiction.

CIRCUIT COURTS OF THE UNITED STATES.

The Circuit Courts of the United States have original cognizance, concurrent with the Courts of the several States, of all suits of a civil nature, at common law, or in equity; where the matter in dispute exceeds,

exclusive of costs, the sum or value of five hundred dollars, and the United States are plaintiffs or petitioners; or an alien is a party, or the suit is between a citizen of the State where the suit is brought, and a citizen of another State; and have exclusive cognizance of all crimes and offences cognizable under the authority of the United States, (except where the laws of the United States otherwise direct,) and concurrent jurisdiction with the District Courts of the crimes and offences cognizable therein. But no person can be arrested in one district, for trial in another, in any civil action, before a Circuit or District Court. No civil suit can be brought before either of said Courts against an inhabitant of the United States, by an original process, in any other District than that whereof he is an inhabitant, or in which he shall be found at the time of serving the writ; and no District or Circuit Court has cognizance of any suit to recover the contents of any promissory note, or other chose in action, in favor of an assignee, unless a suit might have been prosecuted in such Court to recover the said contents if no assignment had been made, except in cases of foreign bills of exchange. The Circuit Courts also have appellate jurisdiction from the District Courts, under the regulations and restrictions provided by law.

From final decrees in a District Court, in causes of admiralty and maritime jurisdiction, where the matter in dispute exceeds the sum or value of three hundred dollars, exclusive of costs, an appeal is allowed to the next Circuit Court, to be held in such District. But no District Judge (sitting in a Circuit Court) can give a vote in any case of appeal or error, from his own decision; but may assign the reason of such his decision.

Places and Times of holding the Courts of the United States.

SUPREME COURT.

The Supreme Court of the United States must be holden at the City of Washington, and have one session every year, to commence on the second Monday in January.

DISTRICT COURTS.

Maine. Wiscasset, last Tuesday of February, and first Tuesday of September; and at Portland 1st Tuesday of June.

New Hampshire. Exeter and Portsmouth, alternately, on the 3d Tuesdays of December, and each 3d calendar month thereafter

Massachusetts. Boston, 3d Tuesday in March, 4th Tuesday in June, 2d Tuesday in September, and 1st Tuesday in December

Rhode Island. Newport, 2d Tuesday in May, and 3d Tuesday in October; at Providence, the 1st Tuesday in August, and 1st Tuesday in February.

Connecticut. Hartford and New Haven, alternately, on the 4th Tuesdays of February, May, August, and November.

Vermont. Rutland, 6th of October, and at Windsor, 24th of May.

New York. City of New York, for the southern district, on the 1st Tuesday of each month; for the northern district, at Albany, 3d Tuesday of January, and at Utica, last Tuesday of August.

New Jersey. New Brunswick, 2d Tuesdays of March and September; and at Burling on, 3d Tuesdays of May and November.

Pennsylvania. Eastern District, at Philadelphia, 3d Mondays in February, May, August and November; and for the western district, at Pittsburg, 1st Monday of May, and 2d Monday of October.

Delaware. Newcastle and Dover, alternately, 4th Tuesdays of November, and of each third calendar month thereafter.

Maryland. Baltimore, 1st Tuesdays of December, and of each 3d calendar month thereafter.

Virginia. Eastern District, at Richmond, 15th day of May, and 15th day of November; and at Norfolk, 1st day of May, and 1st day of November; and for the Western District, at Clarksburg, 1st Mondays in April and September; at Lewisburg, 1st Wednesday after the 2d Mondays in April and September; at Wythe Court house, 1st Wednesdays after the 3d Mondays in April and September; and at Staunton, 1st day of May and 1st day of October.

North Carolina Edenton, district of Albermarle, 3d Mondays of April and October; at Newbern, (district of Pamptico,) 4th Mondays of April and October; and at Wilmington, (district of Cape Fear) 1st Monday after the 4th Mondays of April and October.

South Carolina Eastern district, Charleston, 3d Monday in March, and September, 1st Monday in July, and 2d Monday in December; for the western district, at Laurens Court-house, on the next Tuesday after the adjournment of the Circuit Court at Columbia.

Georgia. Savannah, 2d Tuesday in February, May, and August; and in Augusta, 2d Tuesday in November.

Kentucky. Frankfort, 1st Mondays of May and November.

Tennessee. Knoxville, for East Tennessee, 3d Monday in April and 2d Monday in October; and at Nashville, for West Tennessee, 4th Mondays in May and November.

Ohio. Columbus, 3d Monday in July, and 4th Monday in December.

Louisiana. Eastern district, at New Orleans, 2d Monday of December, and for the Western district, at Opelousas Court-house, 2d Monday of June.

Indiana. Corydon, last Mondays in May and November.

Mississippi. Court house of Adams county, 4th Mondays in January and June.

Illinois. Vandalia, 4th Monday of May and 1st Monday of December.

Alabama. Huntsville, 2d Monday of April and October; at Mobile, 1st Monday in May and 2d Monday in December.

Missouri. St. Charles, 1st Mondays in March and September.

Circuit Courts.

Maine, at Portland 1st May, and at Wiscassett, 1st October.

New Hampshire, at Portsmouth and Exeter, alternately, 8th May and 8th October.

Massachusetts, at Boston, 1st June and 20th October.

Rhode Island, at Newport and Providence, alternately, 15th June and 15th November.

Connecticut, at Hartford and New Haven, alternately, 13th April and 17th September.

New York, at New York, last Monday in February, 1st Monday in April, last Monday in July and October.

Vermont, at Rutland and Windsor, alternately, 21st May and 3d October.

New Jersey, at Trenton, on the 1st April and 1st October.

Pennsylvania, at Philadelphia, 11th April and 11th October.

Delaware, at Newcastle and Dover, alternately, 3d June and 27th October.

Maryland, at the City of Baltimore, 8th April and November.

Virginia, at Richmond, 22d May and 22d November.

North Carolina, at Raleigh, 12th May and 12th November.

INTERCOURSE WITH FOREIGN NATIONS.

Since the publication of the preceding volume, the following change have taken place in the foreign missions of the United States:

Edward Livingston, late Secretary of State, has been appointe Envoy Extraordinary and Minister Plenipotentiary to France, and has arrived at Paris, with Thomas P. Barton, Secretary of Legation. James Buchanan, late Envoy Extraordinary and Minister Plenipotentiary to Russia, has returned to the United States, and has left J. Randolph Clay, Secretary of Legation, acting Chargé d'Affaires at St. Petersburg. Thomas P. Moore, late Envoy Extraordinary and Minister Plenipotentiary to Colombia, has returned home; and his place has been supplied by the appointment of Robert B. M'Afee, Chargé d'Affaires, who has been accredited to New Granada. Charles G De Witt, has received the appointment of Chargé d'Affaires to the Republic of Central America Francis Baylies, late Chargé d'Affaires to Buenos Ayres, has returned from that country, but no appointment has been made to supply his place.

The Pay of Ministers Plenipotentiary is 9,000 dollars per annum salary, besides 9,000 dollars for an outfit. Secretaries of Legation receive 2,000 dollars, and Chargés d'Affaires, 4,500 dollars per annum.

Consuls to Barbary are more of Diplomatic than Commercial Agents, not only as it regards their vocation, but also as it respects their compensation. They receive regular annual salaries; and their pay does not in the least depend on fees. Consuls of the United States, generally so called, are, in effect, Agents for Commerce and Seamen. They receive no yearly salaries, (except at Paris and London, where they have an annual salary of $2,000) and their compensation is derived from the fees which are allowed by law Consuls of the United States, for commercial purposes, are regularly admitted and recognised, as to their official functions, in the ports of Europe, but in the colonies of the European nations, agents for Commerce and Seamen mostly exercise the duties of their stations under courtesy, without any formal recognition.

In their public capacity Consuls and Agents for Commerce and Seamen are principally occupied in verifying in different forms, the legality of the trade of the United States with foreign nations, and in relieving and sending home American Seamen, who, by accident or misfortune, are left destitute within the jurisdiction of their several consulates or agencies.

Consular Agents, though not recognised by law, have, in some cases been made by our Ministers abroad for special and temporary purposes; but Commissions for these appointments are not granted by the United States.

Ministers, Consuls, &c. of the United States in Foreign Countries, with the places of their Residence.

England.

Aaron Vail, Chargé d'Affaires.

FOREIGN MINISTERS IN THE UNITED STATES.

During the past year, the following changes have occured in the Foreign Missions to this country:—Sir Charles R. Vaughan, Envoy Extra'ry and Min. Plen. of Great Britain, in the place of Mr. Bankhead, Chargé d'Affaires; Baron De Krudener, E E. and M. P. of Russia, in the place of Baron Sacken, Chargé d'Affaires: M. Adr Martini, Chargé d'Affaires of the Netherlands, in the place of R. Huygens; D. Joaquin Maria de Castillo, Chargé d'Affaires of Mexico, in the place of Sr. Yturbide; D. Cavalcanti d'Albuquerque, Chargé d'Affaires of Brazil, in the place of Mr. Ribeiro; Chevalier S. Lorich, Chargé d'Affaires, *ad int.* of Sweden, in the place of Mr. Ankarloo, absent on leave; Don Francisco Tacon, late Minister Resident of Spain, has been promoted to the rank of Envoy Extraordinary and Minister Plenipotentiary, and has been recognised as such by the President.

For the protection of the persons of Foreign Ministers, by the act of 30th April, 1790, it is provided that if any writ or process shall at any time be sued forth or prosecuted by any person or persons, in any of the courts of the United States, or in any courts of a particular State, or by any judge or justice therein, respectively, whereby the person of any ambassador, or other public minister of any foreign prince or State, authorized and received as such by the President of the United States, or any domestic, or domestic servant, of any such ambassador or other public minister, may be arrested or imprisoned, or his, or their goods or chattels be distrained, seized, or attached, such writ or process shall be deemed and adjudged as utterly null and void, to all intents, constructions, and purposes, whatsoever.

In case any person or persons shall sue forth or prosecute any such writ or process, such person or persons, and all attorneys or solicitors prosecuting or soliciting in such case, and all officers executing any such writ or process, being thereof convicted, shall be deemed violators of the laws of nations and disturbers of the public repose, and imprisoned not exceeding three years, and fined at the discretion of the court. But no citizen or inhabitant of the United States, who shall have contracted

debts prior to his entering into the service of any ambassador or other public minister, which debts shall be still due and unpaid, shall have, take, or receive, any benefit of this act; nor shall any person be proceeded against by virtue of this act, for having arrested or sued any other domestic servant of any ambassador or other public minister unless the name of such servant be first registered in the office of the Secretary of State, and by such Secretary transmitted to the Marshal of the District of Columbia, who shall, upon receipt thereof, affix the same in some public place in his office, whereto all persons may resort and take copies without fee or reward.

Ministers, &c. of Foreign Powers in the United States.

France.

THE ARMY.

REPORT OF THE SECRETARY OF WAR.

DEPARTMENT OF WAR, *November* 29, 1833.

To the President of the United States.

SIR: In submitting to you, agreeably to your instructions, a report of the operations and administration of this department for the past year, it affords me pleasure to bear my testimony to the zeal and ability of the respective officers at the head of the various bureaus, and of those employed to aid them in the performance of the important functions committed to this branch of the Executive Government

A reference to the accompanying reports and documents will show the state of the army, as well with relation to its numbers, and their position and condition, as to the progress of the various works entrusted to them, and the collection and preservation of the necessary *materiel* for offensive and defensive operations, which is indispensable to the safety of the country. The principle, which governed the reduction of the army from a war to a peace establishment, has been found, by subsequent experience, to be salutary; and its practical operation has been to form a body of officers, equal in all the requisites of military knowledge and efficiency to those of any other service, which is known to us. The army is so organized, that should an increase become necessary, in consequence of those conflicts of interest and opinion to which all nations in their intercourse with one another have been exposed, and from which we have no right to expect perpetual exemption, any reasonable addition may be made to it, without disturbing its arrangement; and the professional knowledge and experience embodied in it will be immediately felt in the new corps, and will identify them with those previously in service. The military experience of other countries, as well as of our own, has shown that the system of extension, by which new and old troops are incorporated together, is much better calculated to produce discipline and subordination, and thus to meet the exigencies of a service which does not allow large bodies of troops to be kept up in time of peace, than the organization of separate corps, composed of inexperienced officers and men, with all their military knowledge to acquire, and all their military habits to form. And this is more particularly true of the staff departments of an army, upon which its movement, its subsistence, and the economy of its administration must principally depend. The system established in our service is equally creditable to the army, and satisfactory to the Government, and may be applied to any necessary extent, without any diminution of that economy and efficiency which have heretofore marked its operation.

Much advantage is anticipated from the operation of the act, passed at the last session of Congress, for improving the condition of the army Already its effects have been felt, as the subjoined documents will show, in the decrease of desertion, and in the increase of the business of recruiting. The addition to the pay of the rank and file, the reduction of the term of service, and the improved condition of the non commissioned officers, promise important meliorations in the character of the army,

This prospect cannot but be interesting to the Government and the country. Although the numerical strength of the army is comparatively small, it is yet sufficient to excite public solicitude; and this must be increased by the consideration that the character of our military establishment may hereafter essentially depend upon the measures now taken for its moral and intellectual advancement. Although it were idle, in the present state of the country, to apprehend any danger from the force which is employed, still, the lessons of experience taught by the progress of events in other nations, ought not be neglected, nor the possibility overlooked, that other circumstances may lead to the increase of our military strength, and to the diminution of that wise jealousy which is now one of our national characteristics. Moral habits in the soldiery constitute one of the best safeguards against the abuse of military power, and their inculcation has engaged the attention of this department during successive periods of its administration. Amongst other measures which have been adopted with this view, you have recently directed the discontinuance of all parades on Sunday, in order that that day may be exclusively devoted to the purposes of instruction and improvement. Certainly, in time of peace, no just reason can exist for converting a day of rest and devotion into a day of military parade.

The act for the better defence of the frontiers, by raising a regiment of dragoons, is in the process of execution. About six hundred men have been enlisted, and most of the officers appointed, and five of the companies have been ordered to proceed to Fort Gibson, upon the Arkansas, where they will be stationed during the winter. The remainder of the regiment will be concentrated at Jefferson barracks this season, and it is intended in the spring to order the whole to proceed through the extensive Indian regions between the western boundaries of Missouri and Arkansas and the Rocky Mountains. It is deemed indispensable to the peace and security of the frontiers, that a respectable force should be displayed in that quarter, and that the wandering and restless tribes who roam through it should be impressed with the power of the United States, by the exhibition of a corps so well qualified to excite their respect.—These Indians are beyond the reach of a mere infantry force. Without stationary residences, and possessing an abundant supply of horses, and with habits admirably adapted to their use, they can be held in check only by a similar force, and by its occasional display among them. Almost every year has witnessed some outrage committed by them upon our citizens, and as many of the Indian tribes from the country this side of the Mississippi, have removed and are removing to that region, we may anticipate their exposure to these predatory incursions, unless vigorous measures are adopted to repel them. We owe protection to the emigrants, and it has been solemnly promised to them. And this duty can only be fulfilled by repressing and punishing every attempt to disturb the general tranquillity. Policy and humanity equally dictate this course, and their is reason to hope that the display of this force will itself render unnecessary its hostile employment. The more barbarous tribes will perceive that their own safety is closely connected with the permanent establishment of pacific relations, both with the United States and with the other Indians.

It is due to the regiment of dragoons to remark that its composition is

believed to be good, and I anticipate it will do honor to the army, and render effectual service to the country.

I feel it a duty once more to ask your favorable interposition in behalf of the Medical Corps. There is no portion of the army whose compensation is so utterly inadequate to their services. The pay of the highest grade but little exceeds that of a captain, and the pay of the lowest that of a first lieutenant; and these two grades constitute the whole range of service within the reach of medical officers. In the line of the army, and most of the staff departments, there are successive gradations of rank, each with increased emolument, to stimulate the exertions and to reward the services of the officers. The importance of professional skill and talent in the medical corps will not be doubted; and the dispersed condition of our Army in time of peace, and its exposure to the effects of various climates, render the conservation of its health an object of much solicitude; and, in time of war, this solicitude will be increased by the perils of active service.

In order to place in a proper condition this branch of our military establishment, a system of examination has been recently instituted, by which the pretensions of medical gentlemen, seeking appointments in the army, will be suojected to rigid scrutiny. A board, composed of able and experienced surgeons, has been organized, and the various members of the department have been examined by them. The result has already been highly useful, and cannot fail to be so for the future. But, while the standard of professional acquirements is thus increased, justice demands that the rate of compensation should be examined, and that it should be rendered commensurate with the duties and responsibility of this most useful class of officers. It is not to be expected that the medical corps can retain the able men who now compose it, or see others join it, unless their services are adequately rewarded.

The act organizing the Subsistence Department expires, by its own limitation, on the 2d day of March next. It was originally passed in 1818, and has been continued, by successive temporary acts, till the present time. The reason of this course of legislation is undoubtedly to be found in the fact, that the introduction of the system was an experiment, and it was deemed prudent to test its operations before a permanent character was given to it This has been fully done, and the result is, in every point of view, satisfactory. All who were acquainted with the mode of supplying the army previously to, and during the late war, and for a few years after its termination, must be sensible of the superiority of the present plan. In the quality of the provisions, in the certainty of the supply, and in the economy of administration, its operation is decidedly superior to the old system, where contractors furnished and issued all the subsistence required. The continued failures that took place, and frequently in the most critical state of affairs, the controversies arising out of perpetual attempts to issue unsound provisions, and the serious obstacles which these and the other operations of the system interposed to the public service, must be fresh in the recollection of every military man who participated in the events of those periods The army is now well and promptly supplied, and the faithful officer at the head of the subsistence department has established a system of purchasing, of issuing, and of responsibility, which, while it ensures this result, guards the public

interest against loss and imposition, as far as a business necessarily so extended permits. During the fifteen years in which this department has been in operation, more than five millions and a half of dollars have been expended under its direction, and the whole loss which has been incurred by the defalcations of its officers, does, not amount to sixteen thousand dollars.

I consider that the time has arrived when the present arrangement should be rendered permanent, and I therefore present the subject with that view to your notice. And I also beg leave to suggest that the compensation of the clerks in the office should be increased. It is now lower than the average amount allowed in the other public offices, and less than is due to their labor and responsibility

The report of the Visiters appointed to examine the Military Academy shows that the institution is in a prosperous condition, and is fulfilling the duties committed to it, in the education of the young men destined for the military service of the country. The suggestions made by the Visiters for the improvement of this national school are the result of a careful examination, and, coming as they do from a body of able and impartial citizens, are entitled to much consideration. They appear to me just in themselves, and promising, in the event of their adoption, salutary consequences to the institution.

There is one subject which I feel particularly desirous of placing before you The situation of teacher of drawing corresponds neither with the nature and importance of the duties required of that officer, nor with the professional merit of the distinguished artist who has relinquished the fair prospects held out to him in a foreign country to accept it. The art itself is highly important to military men, and its acquisition is essential to a respectable standing at the academy It is very desirable that the instructor should unite in his person those high qualifications, natural and acquired, which have in all ages been the lot of those who have attained eminence in the art, and which have placed it among those pursuits that are at once the cause and the effect of advanced improvement in society. I respectfully recommend that this officer be placed in the same situation as the professors at the academy, and I cannot but believe that such a measure would not only be just in itself, but would be a proper tribute of respect to the liberal arts, and a proper notice of one whose professional talents and success have been honorable to his country

I have had the honor heretofore to submit to your consideration my views in relation to brevet commissions in the army, and I am induced, as an act of justice to those entitled to them, again to present the subject If no new legislation is contemplated, nor any action of the Senate which shall change the principle or practice heretofore prevalent, no objections occur to me to delay, any longer, these promotions. The officers have earned them by length of service, agreeably to the established usage; and to make a discrimination without any previous declaration, so as to exclude from this advantage those who are at this time entitled to it, does not seem called for by the exigency of any circumstance connected with this subject. And, in fact, there are no very obvious reasons occurring to me, why these professional honors, which, in common cases, make no demand upon the Treasury, but serve to foster those professional feelings which give elevation to the military character, should not be

granted, as they have heretofore been Under ordinary circumstances they would produce no practical operation, either with relation to emolument or command, When they should do either, it would be precisely when their value would be enhanced by the very state of things producing this change in their operation; when the great experience of the brevet officer would entitle him to an enlarged command, and to a corresponding rank over those, whether in the regular army or the militia, whose qualifications, so far as these depend upon service, are less than his.

The attention of the army has been frequently drawn to a project for the establishment of a fund for the support of invalid officers, and of the widows and children of such as may die in the service. The object is a commendable one and as the only aid expected of the Government is such legislative provision as may be necessary to give effect to the measure, in conformity with the general views of the officers of the army, it is certainly entitled to the favorable regard of the Government. A moderate and stated deduction from the pay of each officer would create a fund which would afford essential relief to many, who otherwise would be exposed to want and penury, and might soothe the declining years of meritorious officers, who may have necessarily expended in the maintenance of their families the whole allowance made to them by law, and who, without such an arrangement, would look forward with anxiety for the future. Whatever plan may be ultimately adopted, a legal organization is essential to its operation and success. And as the funds will be provided by the officers themselves, and for their own advantage, the administration will no doubt be committed to them, to be exercised by such persons, and in such manner, as they may direct. The considerations connected with this measure are so obviously just, and in accordance with the dictates of prudence and humanity, that I trust they will be favorably considered. And I also feel it my duty to bring before you a kindred subject connected with the rank and file of the army, and having for its object a provision for the support of superannuated soldiers. In our service, as at present organized, a soldier can only be retained as long as his physical powers are sufficient to enable him to perform the duties required of him. When his constitution fails, unless it is the result "of disability incurred in the line of his duty," he is discharged without any provision for his support, and generally, from the *habits of his life*, without the disposition and too often the power to labor, and without the means of support. He is then thrown upon the charity of the community, after devoting the best of his life to the service of his country

This result may be easily obviated without expense to the Government, and an ample provision made for those discharged soldiers who are unable to procure the means of support. The principle which has been long and wisely applied to the navy, may be safely applied to the army. An inconsiderable deduction from the pay of each soldier would go far towards the creation of a fund for this purpose. And if this deduction were to commence with those who might enlist after the passage of the law, there could be no objections on account of the previous engagements formed with the soldiers. And there are three auxiliary sources of revenue which may be applied towards the former object. These are—

Fines assessed by courts martial;

The pay due to soldiers who may die without leaving any heirs to claim it;

A proportion of the post fund, which is principally derived from a tax upon sutlers.

It is believed that the means which may be realized agreeably to this suggestion would be found sufficient to provide for the maintenance of this class of persons whose condition is now so hopeless, and so unsuited to the character of the Government, and the feelings of the community.

The experience of every year adds to the conviction, that the sooner the Indians remaining east of the Mississippi migrate to the region west of that river, the sooner will they be relieved from the embarrassments of their present position, and placed in a situation where they may physically and morally improve, and look forward to a prosperous and permanent destiny. All the reports which reach the department upon this subject, concur in the representation that the emigrants already there are comfortable and contented—that the region assigned to them is fertile, salubrious, and as extensive as they and their descendants for many generations can require. They are making improvements, and erecting dwellings, and are evidently laying the foundations of a social system, which, it is to be hoped, will afford them security and prosperity. As a striking proof of their improvement, and of the quantity of provisions raised among them, it may be stated that one of the contracts for furnishing provisions has been taken by a Choctaw, who is said to have a supply of his own, amply sufficient to enable him to meet his engagement. It is fortunate for the Indians themselves, and for the great cause of humanity, that the efforts of the Government to persuade them peaceably and voluntarily to remove, are every year crowned with more and more success. Since the last annual report from this department, the conditional arrangement made by the Seminoles for their emigration has been rendered absolute by a personal inspection of the country proposed for their residence. They have examined, and are satisfied with it; and if the treaty should be ratified by the Senate, they will soon leave the Territory of Florida. An arrangement has also been made with the separate bands in that Territory, by which they have agreed to emigrate; and thus provision has been made for the removal of the whole Indian population from Florida.

The treaty with the Chickasaws has terminated all difficulties with that tribe. It is understood that the exploring party, provided for in that instrument, are about to commence their journey with a view to select a residence west of the Mississippi. If they succeed, they will remove within the period limited. If they do not, and choose to remain, they will become, with their own consent, citizens of Mississippi, and will occupy as absolute owners, the several tracts of land assigned to them.

The obligations assumed by the United States in the treaty with the Choctaws, for the removal of those Indians, have been fulfilled. From the reports which have been made to the department, it appears that about fifteen thousand individuals of this tribe have been removed. A party, estimated to contain from fifteen hundred to three thousand persons, have changed their usual place of residence in Alabama, and have declined ac-

companying the other Indians in their emigration. It is believed that this party is composed principally of the worst portion of the tribe, and that they intend to hang upon the white settlements, in order to indulge the vicious habits they have acquired. As the Government has scrupulously fulfilled its engagements with these people, which terminate with this year, and as every exertion has been made by the proper agents to induce them to remove, nothing remains but to leave them to the results of their own experience. It cannot be long before they will feel the necessity of rejoining the great body of the tribe.

Satisfied as you have been, that the very existence of the Creeks in Alabama required their establishmeat in the country west of the Mississippi, where so many of their tribe already reside, you have not hesitated to embrace every opportunity which offered, of accomplishing this object. Instructions have been three times given, to ascertain their views, and to endeavor to persuade them to acquiesce in this course. The two first attempts proved unsuccessful. The result of the last is unknown. Independent of the general reasons arising out of our Indian relations, which operated to induce these efforts, the peculiar state of things among these Indians, and a strong desire to remove the difficulties connected with them, had much influence in directing the negotiations.

The Sacs and Foxes have quietly removed to the region assigned to them; and the Winnebagoes have left the country upon Rock river, agreeably to the stipulations of the treaty with them, and retired across the Mississippi, to their lands north of the Ouisconsin.

Treaties have been formed with the Pottawatamies, Chippewas, and Ottawas, claiming the district on the west side of Lake Michigan, south of Green Bay, and north of Chicago, for its cession to the United States; and with the Pottawatamies of the peninsula of Michigan, for the relinquishment of their reservation south of Grand river.

With the exception, therefore, of the Miamies, in the State of Indiana, of a band of the Wyandots, at Upper Sandusky, in Ohio, and of scattered portions of the Ottawas and Chippewas, in the peninsula of Michigan, north of Grand river, and of Saganaw bay, probably not exceeding altogether, five thousand individuals, the whole country north of the Ohio, and east of the Mississippi, including the States of Ohio, Indiana, and Illinois, and the Territory of Michigan, as far as the Fox and Ouisconsin rivers, has been cleared of the embarrassments of Indian relations; and the Indians themselves have either already emigrated, or have stipulated to do so, within limited periods, and upon such terms as will ensure them adequate subsistence, and the means of establishing themselves comfortably in their new residence, unless, indeed, the aid and efforts of the Government are rendered useless by their habitual indolence and improvidence. The Cherokees occupying portions of land in Georgia, Alabama, North Carolina, and Tennessee, and probably not exceeding eleven thousand persons, are the only Indians south of the Ohio, and east of the Mississippi, with whom an arrangement has not been made, either for emigration, or for a change of political relations. It is to be regretted that the same causes which have heretofore prevented an adjustment of the difficulties of that tribe, and their removal west, yet continue to defeat the efforts of the Government. These causes are, no doubt, principally to be traced to the ascendancy of particular individu-

als, and to their desire to retain political influence and power. It is expected that about five hundred of these Indians will remove west this season, and the residue of the Cherokees, then remaining east of the Mississippi, will be, agreeably to previous computations, about ten thousand five hundred.

The commissioners west of the Mississippi are engaged in the execution of the duties connected with our Indian relations in that quarter. They have succeeded in arranging satisfactorily the disputed question of boundaries between the Creeks and Cherokees, which has for some time occasioned much embarrassment. They have also formed treaties with the Creeks, the Cherokees, the Senecas and Shawanees, the Quapaws and the the Seminoles of Florida, by which all matters connected with these tribes have been satisfactorily adjusted. Their labors will be now directed to the other subjects indicated in their instructions, and which are important to a permanent arrangement of the various questions arising out of the new state of things which will be created in that region. Among these, one of the most interesting is a practical plan for regulating the intercourse of the various tribes, indigenous and emigrant, with one another, and with the United States, and for the establishment of some general principles, by which their own internal Government can be safely administered by themselves, and a general superintending authority exercised by the United States, so far as may be necessary to restrain hostilities among them, and incursions into our borders Until such a system is adopted, it is evident that the condition of these Indians cannot be secure, nor will the obligation imposed upon the Government be fulfilled. The task requires an intimate knowledge of the local circumstances of the tribes of that region, and of the country they inhabit, and a practical acquaintance with Indian habits, feelings and mode of life. I trust the commissioners will be able to report a plan which will fulfil the expectation of those who have observed with solicitude the course of this matter, and which will eventually secure the prosperity of the Indians. As it is probable, however, that this cannot be effected within the time limited for the duties of the commissioners, I would respectfully suggest the propriety of their term of service being prolonged until the close of the next year.

There has been presented for allowance, under the pension act of June 7, 1832, thirty thousand six hundred claims. The whole of these have been examined, and either admitted, rejected, or returned to the parties for supplementary action Twenty-three thousand four hundred and thirty eight certificates have been issued, eleven hundred and eleven claims have been rejected, three hundred returned cases are in the office, awaiting or undergoing re-examination, thirteen hundred and fifty-one, which are incomplete in their proofs, are suspended till these are furnished and four thousand four hundred and twenty-five are in the hands of the the parties for additional evidence or authentication, or *in transitu* between them and the office.

It is creditable to the industry and efficiency of the Pension office, that such a mass of business should have been performed within the period which has elapsed since the passage of the above law.

I have the honor to be, very respectfully, Sir, your obedient Servant,

LEWIS CASS

CONDITION OF THE ARMY.

Extract from the Report of the Major General of the Army, Nov. 1833.

Since my last annual report on the state of the army, [Vol. XI. p. 170,] nothing material has occurred in the movements of the troops, worthy of particular notice. The discipline of the several corps continues to be maintained with regularity, and there is every reason to believe that they are in a condition for active service.

The battalion of mounted rangers has been discharged, and the regiment of dragoons, authorized by the act of 2d of March, 1833, in lieu of that battalion, has been partially raised: Five companies of it are mounted, and have been ordered to Fort Gibson under Colonel Dodge, to be in readiness to accompany the commissioners in the ensuing season, on their contemplated visit to the Indian country: The remaining five companies are being raised. The lateness of the selections and appointments of the captains and other officers, from the mounted rangers has been the cause of the delay in filling the regiment: but there is every prospect that, before the end of the year, the regiment will be completed to its establishment.

The results expected to be produced by the operation of the act of the 2d of March of the last session of Congress, "for the improvement of the condition of the non-commissioned officers and privates of the army, and for the prevention of desertion," so far as they can be ascertained, are decidedly favorable and satisfactory. The men who now offer to enlist, are found to be of a more respectable class, and the number of enlistments does not diminish. In regard to desertions, there are strong indications of the salutary operations of the law, as the average number of men who have deserted, for a given period since the passage of the bill is, by a comparison with the number of desertions for corresponding periods in the three years preceding, one-third less. A further proof of the beneficial influence of the law on the rank and file of the army is found in the fact that soldiers who have honorably completed their term of service, now more readily re-enlist, which is considered a decided advantage to the public, both as it regards economy in the expenditure for the military service, and in reference to the efficiency of the army.

RECRUITING—1833.

The number of Recruits enlisted from January 1, to Sept. 30, were—At Albany, 65; Boston, 8; Buffalo, 24; Baltimore, 88; Burlington, 23; Easton, 84; Fredericksburg, 4; Fredericktown, 109; Hartford, 5; Ithaca, 13; Lancaster, 60; Lynchburg, 5; Louisville, 2; Middleburg, 24; New York, 175; New Bedford, 3; Providence, 3; Philadelphia, 13; Plattsburg, 30; Port Deposit, 20; Rochester, 59; Sackett's Harbor, 19; Utica, 19; Whitehall, 66; Cincinnati, 3; Frankfort, 1; Lexington, 3; Louisville, 20; Maysville, 2; Natchez, 2; Newport, 9.—Total number enlisted at *Recruiting Stations*, 1031

In the Dragoons. 443, 1st Regiment of Artillery, 74; 2d, 34; 3d, 38, 4th, 64; 1st Regiment of Infantry, 12; 2d, 96; 3d, 8; 4th, 86; 5th, 5; 6th, 43; 7th, 16. In the detachment at West Point, 9; Band at West Point, 3; Detachment of Orderlies at Washington, 5; Ordnance Depots, 9;—Total enlistments in *Regiments* and *Detachments*, 955. Total number enlisted, 2,036.

Eastern Department, under the command of Brevet Major General Winfield Scott.

Operations under the Quartermaster's Department, during the past year.

ROADS.

Of the public works under the direction of the Department, the military road in the State of Maine, which has been in a course of construction for several years, is now completed, and is represented by the officer charged with its superintendence, to be of a superior character. Connecting as it does the resources of the Atlantic with an interior post on a distant frontier, it may be justly considered a work of importance, at least in its military relations

The road from Fort Howard, Green Bay, to Fort Crawford, on the Mississippi river, has been surveyed and located during the present season. This is an important military communication, intended to connect three of the exterior posts on the Northwestern frontier.

The Washington and Jackson road, in the Territory of Arkansas, a highly important communication, connecting the centre of the territory, with its frontier on Red river, has been extended as far as the limited appropriation made at the last session of Congress for the purpose would warrant.

The road from Pensacola to Tallahassee, and thence to St Augustine, in Florida, has been partially repaired.

That portion of the road from Memphis, Tennessee, to Little Rock, Arkansas, lying between the latter place and Saint Francis river, has been in a course of repair.

BARRACKS.

Measures were taken early in the year to procure a suitable site for the barracks authorized in the vicinity of New Orleans; but the malignant diseases which have prevailed there throughout the season, have occasioned much delay, and prevented any conclusive arrangement being made. An experienced officer is on his way to New Orleans, with instructions to adopt immediate and energetic measures to accomplish the work; and unless the diseases which have proved so destructive should continue through the winter, it is believed that accommodations for two companies at least may be ready by the 1st of June, 1834.

Arrangements have been made for repairing the barracks and building hospital at Baton Rouge; and a site has been obtained for the barracks authorized to be erected in the city of Savannah, and the officer charged with the superintendence has obtained a part of the materials, and has commenced the work.

The barracks at Fort Crawford, owing to the interruption of operations by the presence of the cholera, and causes connected with our Indian relations in that vicinity, have not yet been completed. Nor has it been practicable to complete the barracks at Fort Howard, Green Bay.

The store house authorized to be erected in Pittsburg, has been completed; and the necessary repairs have been bestowed on the wharf at Fort Washington, Maryland

DELAWARE BREAKWATER.

In regard to the Delaware breakwater, the experiment has now been fairly made. That work already affords a good harbor for such vessels engaged in transporting the materials used in its construction, as well as

for vessels engaged in commerce as take shelter under it in time of storm.

General Bernard's estimate to complete the work was	$2,216,950
The several appropriations up to this date amount altogether to - - - - -	1,160,000
Leaving, of the estimate not yet appropriated, a balance of	1,056,950

The whole length of the breakwater, according to the plan is 3,600 feet. The deposite of stone already extends 2,700 feet; of which there are elevated five feet above the plane of high water, 1,007 feet; nearly level with high water, 950 feet; Averaging fifteen feet above the sea bottom 743 feet.

The whole length of the ice breaker, according to the plan is 1,500 feet. The deposite of stone extends already 1,400 feet;—of which there are elevated above the level of high water, 978 feet; level with high water, 300 feet; Averaging 14 feet above the sea bottom, 122 feet.

Officers and Agents, Civil and Military, in the employ of the Quarter Master's Department, not named in the Army Register.

Operations of the Engineer Department during the past year.

I. FORTIFICATIONS.

1. *Fort Independence, Boston Harbor.*—In making the necessary preparations for commencing the repairs of this work, it was perceived that the amount of funds appropriated for that object would not be sufficient to effect it. Under these circumstances, it was deemed proper to limit the operations, for the present, on Castle Island, to the building of the sea wall, for its preservation, and the repairing of the south-west wharf. The former has been put under contract, and measures were taken for the early completion of the latter. 2. *Fort Warren, George's Island, Boston Harbor.*—The calls upon the department, during the last season, have been so numerous, and of a nature so pressing, as to render it impossible, with its limited means, to mature the plans for this work. 3. *Fort Adams. Newport Harbor, Rhode Island.*—Great progress has been made in this work. The operations on it have been conducted in a manner altogether satisfactory; it is in a good state, and exhibits some of the finest specimens of workmanship to be met with in our public works. 4. *Fort Hamilton, Narrows New York.*—A small amount of the last appropriation for this work, yet unexpended, will be applied in the course of the year, to give the work that degree of finish which can only be attained after the lapse of sufficient time to allow the defects in construction, that cannot be foreseen, to develop themselves. 5. *Fort Columbus and Castle Williams, Governor's Island, New York.*—Satisfactory progress has been made in the repairs of Fort Columbus, which are nearly completed. The operations for the repair of Castle Williams have been confined to the building of a wharf and the collection of materials. 6. *Fort Schuyler, Throg's Neck, East River, New York.*—The attention of the officer charged with the construction of this fort, has been directed principally to the accomplishment of such preparatory measures as shall enable him to commence and prosecute his operations with advantage, as soon as the plans shall be matured and adopted. These are not yet in readiness, in consequence of incessant engagements of the officers of the department. 7. *Fort Delaware, Delaware river.*—The latter end of April, 1833, a commencement was made on the Pea Patch Island, to construct the temporary quarters and workshops, preparatory to a demolition of the walls of the old fort. This object has been effected. Twenty-two thousand yards of the masonry of the old fort have been demolished by mining; 10,000 yards of the same have been removed, and transported to the exterior of the dyke surrounding the island, for its preservation; of which 300 running yards have been thus secured, and 400,000 bricks of the old work cleaned, preparatory to their being used in the construction of the new work. To accomplish the removal of the material of the old fort, the most economical plan was to excavate the draining ditches of the island to such a size as would suit them for navigation with lighters. The extent of this excavation is 6,700 cubic yards. 8. *Fort Monroe, Hampton Roads, Virginia.*—Much has been done towards its completion, yet, owing to the great demand for labor, and the consequent difficulty in commanding it at Fort Monroe, though an advance of fifteen per cent. was offered, the outwork on the front of attack is not in a state as far advanced as it was hoped it would be. 9. *Fort Calhoun, Hampton Roads, Virginia.*—It has for some time been a leading object at this work to compress the substratum, by the accumulation of materials upon it, to a state which will produce an equilibrium when it shall be required to sustain the weight of the walls, and the armament of the fort. Twelve thousand five hundred tons of stone have been added to the mole, and eleven thousand eight hundred tons of building stone deposited on and near the walls during the year. 10. *Fort Macon, Beaufort, North Carolina.*—This work is completed. The works for the preservation of its site have been prosecuted with considerable advantage, and give promise that they will accomplish the desirable object for which they were begun. 11. *Fort Caswell, Oak Island, North Carolina.*—This fort is completed. 12. *Fortifications in Charleston harbor, South Carolina.*—Castle Pinckney and Fort Moultrie have been much improved as regards their ability for defence, and the latter thoroughly repaired. Works to arrest the encroachments of the water, on the site of Fort Moultrie, have been commenced; but sufficient time has not yet elapsed to justify the expression of any opinion as to their ultimate effect. About 16,500 tons of stone have been added to the mole to be occupied as a foundation to Fort Sumter, and the necessary preparations made to commence the construction of this work as soon as the mole shall be finished. 14. *Fort Pulaski, Cockspur Island, Georgia.*—About two months at the commencement of the last working season, at this work were lost in consequence of the absence of the superintending engineer, who was withdrawn from his command to meet a pressing demand elsewhere. The work was prosecuted however, with great efficiency during the remainder of the season, and the progress has been such as to give satisfaction. 14. *Fort Marion, St. Augustine, Florida.*—Operations have for some time, been directed to the repairing of the sea wall connected with this work, with a hope of accomplishing the object of the law on the subject, by the middle of January or February, 1834. 15. *Fort Pickens, Pensacola Harbor, Florida.*—The condition of this work is in a high degree satisfactory. The masonry, with the exception of a very small portion, is completed, and the entire work will, in all probability, be finished by the end of March, 1834. 16. *Fort at Foster's Bank, Pensacola Harbor, Florida.*—It was hoped, in the early part of the year, that the nature of the service would be such as to permit a convention of the Board of Engineers to revise, among others, the project for this work, and to fix its precise locality. This hope was, however, disappointed, and the funds have in part been, and

the balance will be, applied to the collection of materials, and to making such preparations as will enable the constructing engineer to commence the work under the next appropriation to advantage, as soon as the plans shall be matured. 17. *Fort Morgan, Mobile Point, Alabama.*—This work is completed. 18. *Fort Livingston, Grande Terre, Louisiana.*—The land on which it is to be located is private property; and much time has, unavoidably, been consumed in effecting a purchase. It is expected that the negotiation with the owner will soon be brought to a satisfactory termination, when the purchase and collection of materials will be made preparatory to commencing the work. 19. *Contingencies of fortifications.*—A considerable portion of the appropriation under this head has been applied, during the year, to the repairs of Fort Jackson, Battery Bienvenu, Tower Dupre, and Fort Wood, Louisiana, and Fort Washington, Maryland.

I INTERNAL IMPROVEMENTS

1. *Chicago Harbor, Illinois.*—It being impossible to command the services of an engineer officer at this place, the works were given in charge to the commanding officer at Fort Dearborn. Owing to the position of Chicago, considerable difficulty was experienced in the early part of the season in procuring suitable materials and workmen to commence, as almost every thing, except timber and stone, had to be drawn from Buffalo. But little has been done therefore, further than to collect some materials and workmen, and to construct a small portion of one of the piers. A commencement in a position like this is, however, of great value, and hopes are entertained of being able to prosecute operations with advantage during the next working season. 2. *La Plaisance Bay, Michigan.*—Eight hundred and forty feet of new pier work were sunk at this place within the year; piles were driven the whole length of the pier, and secured by caps. Considerable stone has been deposited in the pier, and, as far as the appropriation extended, the work has been prosecuted satisfactorily. 3. *Black Rock Harbor, New York.*—The money which has been applied to the works, has been principally in procuring stone for the mole on Bird Island, and in repairing the traverse pier. 4. *Buffalo Harbor, New York.*—The public works for securing the harbor at Buffalo have the appearance of great strength and durability. The whole front wall of the mole on the south side of the harbor, together with the coping and flagging, are completed. The new light-house on the mole head is complete in every part. 5. *Dunkirk Harbor, New York.*—This harbor is formed by two points projecting into the lake: the western pier extends into the lake 416 yards. The works which have been already constructed stand well and in good condition: the piers are filled in with stone, level with the top timbers, based upon solid rock, and planked. The pier has been extended this season 113 yards. This harbor has at its entrance 12 feet of water, and from 12 to 15 on the anchorage. 6. *Presqu' Isle Harbor, Pennsylvania.*—The north breakwater of this harbor is now connected with the main land of the peninsula, and filled in with brush and stone; it has been extended this season 400 yards. The stone in the piers have settled about 2 feet on an average, the planks have been taken off, and the piers filled to a level with the top timbers, and re-planked as far as the old ones would answer; the whole will be covered as soon as plank can be obtained. The depth of water has been increasing in the channel every year from the commencement of the works, 12 feet of water may be carried the whole length of the channel to the entrance of the bay, and then 9 1-2 feet to the borough pier, which is one and a half miles from the entrance. This harbor is capacious, when compared with others on this lake, and very important to the country. It is the most suitable point for a naval station on the south shore of the lake.

7. *Conneaut Creek, Ohio.*—These piers extend into the lake 415 yards. The depth of the water in the channel at its shoalest place is eight and a half feet. The stone in the piers have settled very considerably, and must be filled in even with the top timbers; some large stone are required around the head of the piers, and on the outside mixed in with brush; 202 yards of pier have been constructed since the 30th of September, 1832. 8. *Ashtabula, Ohio.*—These piers extend into the lake 428 yards. A rock lies across this channel, about 200 yards from the head of the pier, extending 200 feet in length, six and a half feet below the surface of the water, the whole width of the channel. The machinery for cutting up this rock works to good advantage. 9. *Cunningham's Creek, Ohio.*—This is an open pier extending into the lake, and bridged. The appropriation of $500 last winter was insufficient to complete the work or pier head. 10. *Grand River, Ohio.*—These piers extend into the lake 480 yards, and will admit vessels drawing 12 feet of water, a greater depth than could have been wished, as greater quantities of stone are required to fill in the piers, and to secure them in their place against the effects of the current. 11. *Cleaveland, Ohio.*—The piers at this harbor extend into the lake 525 yards, giving a depth of water in the channel of eleven and a half feet at its shoalest place. This harbor is one of great importance; it must, from its local situation, be the great centre for business on the lake shore for the State of Ohio. The Erie and Ohio canal enters this harbor, extending 330 miles to Portsmouth, at the mouth of the Scioto river. 12. *Black River, Ohio.*—These piers are extended into the lake 417 yards, with an opening of 200 feet; the shoalest place in the channel is seven and a half feet. The works stand well; the stone in the piers have settled nearly two feet on an average. The western pier has been extended 30 yards, filled in with stone and planked, and 150 yards of the eastern pier, which was in an unfinished state, have been completed. The eastern pier is to be

extended 30 yards further, agreeably to the original plan. A dredging machine has been constructed for deepening the channel, by removing the hard clay pan at its bottom, and works to good advantage.

13. *Huron Harbor, Ohio.*—The depth of watter in this harbor atits shoalest place is eight feet; the works are in good condition. The entrance to this harbor is only 140 feet.

14. *Gennessee River.*—The quantity of work finished in 1833, amounts to 28 piers or cribs, each 30 feet in length and 20 feet wide, sunk and extending from the existing range of piers into the lake at the mouth of the river, in a depth of 12 feet water, the extreme crib being 30 feet square, the average height of these cribs from the bed of the lake to the top of the piers being 17 feet. The whole length of the pier amounts to 4,712 feet. 15. *Big Sodus Bay.*—There have been constructed and sunk, during the past year, 27 similar cribs, or piers, of the dimensions of 30 feet by 18, in 12 and 13 feet of water, the cribs averaging a depth of 18 feet from the bed of the lake to the top of the pier. The whole length of the pier amounts to 5,378 feet.

16. *Oswego Harbor, New York.*—The mouth of the Oswego river is an open roadstead having no shelter from the dangerous winds which blow from the northern quarter; all winds from the west, round through the north to the northeast, driving the waves directly into the roadstead. Two opposite, low, sandy points make out from the shores at the immediate embouchure, narrowing the channel somewhat, and affording a partial shelter within. This sheltered space is, however, very circumscribed, quite shallow, and the access to it against a current that is, at times, rapid; so that this inner space very imperfectly answers the purpose of a harbor. To obtain a quiet and sufficiently capacious anchorage, a pier, beginning about 1,200 feet from the mouth of the river, has been run out from the western shore, first north 230 feet, then north about 55° east, 1,555 feet, to the channel. The channel begins 250 feet broad, a pier to the east thereof continues on the prolongation of the west pier (North 55 East) 644 feet, and thence, in a southeasterly direction, 222 feet, to the shore near old Fort Oswego. These may be designated *harbor piers.* From near the eastern extremity of the west harbor pier, and at right angles thereto, *a channel pier* runs a distance of 126 feet into the lake. These piers vary in their width at top, according to their situation, from 24 to 27 feet. They are built of side and central timbers, running longitudinally, and connected by numerous cross ties; the sides next the lake, and the top, being covered with planks, and the interior space being filled with stones. A number of buttresses, similar in construction to the piers, have been placed against the inneside of the harbor piers, to strengthen them against the shock of waves; and, with a similar object, stones have been thrown against the lake side of the west harbor pier, so as to form a mass, rising, next the pier, near to the surface of the water, and having a base of from twice to twice and a half the altitude. The effects of these works just described is to give a capacious harbor, perfectly safe in all winds, of easy access, and deep channel and anchorage.

17. *Kennebunk River, Maine.*—The means provided for the works at the mouth of this river have been faithfully applied: the Hardin pier, so called, having been thoroughly repaired, with the exception, perhaps, of a small quantity of stone that may yet be required for the greater security of the work, which has been considerably extended, and which is much exposed to ice and drift wood. 18. *Eerwick Branch of the Piscataqua.*—The improvement in this river at Quamplegan rapids has been completed. There is now an unobstructed passage over the rapids, of nearly six feet at mean high water. 19. *Merrimack River, Massachusetts.*—Some additions have been made within the year to the breakwater in course of construction, to improve the navigation of the river at Newburyport. The work is represented as being in good condition. 20. *Deer Island, Boston Harbor.*—The works for the preservation of this island have been prosecuted with much success. Four thousand tons of rough stone have been placed in the breakwaterin front of the sea wall during the year: 2,000 tons more will be added during the present season, leaving only 4,000 tons to complete that work and the connecting breakwater between the principal walls. 21. *Plymouth Beach, Massachusetts.*—The operations at this place have been of the same character as those of the previous year. They have been directed to the extension (about 510 feet) of the stone wall to the west of the breakwater, and to repairing the beach by planting grass. The grass is represented as doing well, and the condition of the beach, generally, as being good. 22. *Provincetown, Massachusetts.*—About 220 acres of ground were planted with beach grass during the last spring, besides repairing many places previously planted, but which had been injured by the encroachments of the sand. 23. *Hyannis Harbor, Massachusetts.*—The breakwater at this place has been much improved. The additional length constructed within the year is about 230 feet, giving a length of 320 feet completed. Its entire length, when finished, will be 1,320 feet. 24. *Mill River, Connecticut.*—The additions to this work have been completed, and are represented as having accomplished the objects for which they were made. 25. *Harbors of New Castle, Marcus Hook, Chester, and Port Penn, Delaware River.*—The operations at the harbors on the Delaware river have been confined to the harbor of Marcus Hook, from which, by means of a steam dredging machine 15,360 cubic yards of earth have been excavated and removed, forming a safe and secure retreat for about twenty sail of vessels. Some progress has been made in repairing one of the piers forming this harbor, using stone for all that part above the low water mark.

26. *Ocracock inlet.*—The operations at this place have been attended with considerable success. A dredging machine has been kept at work when the weather would permit in Wallace's channel, from which about 34,000 cubic yards of earth have been removed within the year. A navigation of eight feet has been obtained through this channel. 27. *Cape Fear river.*—The jettee near Barnhard's creek, on the eastern side of the river, and the one near Old Town, on the western side, have been completed: that near Barnhard's creek continued to wash up during the last winter; and nearly the whole of the labor applied this year has been for the purpose of keeping these two jettees in repair. 28. *Savannah river, Georgia.*—An officer has been engaged during the year in making an examination of this river between its mouth and Savannah, with a view to obtain the data necessary to enable the superintending engineer to apply the funds appropriated therefor to the best advantage. This examination is nearly brought to a close, when active operations will be commenced for the removal of obstructions, suitable preparations in the way of boats and machinery being in the course of preparation for the purpose. 29. *Inland navigation between the St. John's and St. Mary's.*—The improvement contemplated here requires the agency of a steam dredging machine. To have purchased one from the small appropriation placed at the disposal of the department, would have so far exhausted it as to have left little or nothing for the prosecution of the work. Under these circumstances, it was thought advisable to do nothing till the improvement of the Savannah river, and that at the St. Mark's or Appalachicola, would admit of the boats employed at these places being transferred to the St. John's and St. Mary's. Nothing, therefore, has as yet been done. 30. *St. Mark's harbor and river, Florida.*—A canal has been opened through the natural bridge on the St. Mark's. Owing, however, to the unexpected appearance of rock at this place, much of the money which it was hoped might be applied to the improvement of the river above, has been expended on it. 31. *Ochlochney river, Florida.*—The appropriation for the improvement of this river has been applied to the removal of the logs and trees which obstruct its navigation from its channel. 32. *Appalachicola river and harbor.*—The improvements at this place have been prosecuted under many disadvantages, yet, what has been done is of a character altogether satisfactory. The part of the channel that was deepened to ten feet has been increased by the action of the current to from 12 to 14. 33. *Escambia river Florida.*—This river was surveyed in July last. In August the work was let out on contract, and has been completed. 34. *Harbor of Mobile, Alabama.*—The progress here has been satisfactory. The breadth of the bar at Choctaw pass, or length of channel to be cut through it, is 620 yards; 580 were executed with a width of 100 feet, on the 30th September; and the remaining 90 yards have been since finished. 35. *Pascagoula river Mississippi.*—Owing to a difficulty with the contractor, the operations at this place have not been of a satisfactory character. The work was not resumed till the 17th June last, since which time nothing has been done further than to make some repairs of boats, machinery, &c.

36. *Red river, Louisiana.*—The removal of the great Raft from the bed of this river has been shown, by the operations of Capt. H. M. Shreve, during the last summer to be perfectly practicable. The navigation is now good for Steam Boats, as high up as the Cado Agency, seventy one miles above the point to which the Raft extended in April last, when the mass of timber covered nearly one third the whole surface of the water, and in many places was quite solid to the bottom of the river, which was found to be on an average twenty five feet deep. There yet remains about seventy miles in length of the Raft to be removed. 37. *Arkansas river, Arkansas Territory.*—The examination of this river was made by an officer of the engineers early in the spring, and the boats, machinery, &c. under the personal direction of Captain Shreve, commenced the removal of obstructions to its navigation in the early part of August last. At the latest advices, not much had been done, however, owing to the unfavorable state of the water. 38. *Mississippi river.*—In the months of October, November and December, 1832, January, February and March, of this year, the steam snag boats Heliopolis and Archimedes removed from the bed of the Mississippi river 1,293 snags. The same boats, in August and September, 1833, removed from the bed of that river 667 snags, in all 1,960 snags during the year. The crews of the same boats have within the year felled from the falling in banks of the Mississippi (at times when the water was too high to remove snags, and when the engines of the boats were out of repair) about 10,000 trees. 39. *Ohio river.*—There was a dam built in the fall of 1832, at French island, one at Three Mile island, nearly completed: the dams commenced at the Sceuffle town bar and the Three Sister islands are finished. They were formerly the most difficult and shoalest bars on the Ohio river, at which no difficulty is now experienced by any boat that passes. At the head of Cumberland island a dam which was commenced in September, 1832, is nearly completed. The rock of which it is constructed has been quarried out of a solid lime stone rock. The length of the dam is about half a mile, the average depth of water at its lowest stage about twelve feet; the top of the dam is raised four feet above the surface of low water; its base will average thirty feet. The advantage gained by its construction is to make the Ohio river navigable on that side of the island in which the Cumberland river enters, which has heretofore been obstructed by sand bar several feet above the level of low water. 40. *Cumberland river Tennessee.*—Operations were commenced on this river 16th October and continued till the 7th December, 1832. The work was resumed on the 1st of January 1833, since which time the operations have been directed with much success to improving the river at Harpeth shoals and their

vicinity, to the cutting away of the hanging timber from the banks, and to the removal of logs, &c. from the sand bars.

41. *Road from Memphis, on the Mississippi, to William Strong's house, on the St. Francis.*—An examination and survey have been made of the country between the two points above named, with the view to the location of this road; but the reports and drawings thereon not having been received, nothing has been done by this department.

42. *Cumberland road in Ohio*— The affairs of this part of the national road have been managed in a manner highly satisfactory. The operations on it, though much influenced by the prevalence of the cholera in the section of country through which it passes, have been prosecuted with a zeal and ability highly creditable to the officer charged with their direction. 43. *Cumberland road in Indiana.*—The western division, beginning at Indianapolis, will soon be in a traveling condition for a distance of 33 miles west. The contracts for 1833, embraces the entire distance from the 34th to the 71st mile, inclusive; and the works provided for by them have progressed in a manner altogether satisfactory to the superintendent. When these contracts shall be completed, carriages will be able to travel, with but trifling interruption, from Indianapolis to the eastern boundary of Illinois. 44. *Cumberland road in Illinois.*—A belief was induced in the early part of 1833, that the affairs of this part of the road were conducted in a manner not likely to be productive of results desired by the Government; and, upon investigation, it was ascertained that a state of things existed which rendered any progress in the way of extension, during the year, totally inconsistent with a proper regard for the public interest. 45 *Cumberland road east of the Ohio.*—The repairs of this part of the national avenue have progressed well. *In Maryland*, three thousand two hundred and thirty-seven rods have received the entire covering of stone, and are completed; two thousand eight hundred and thirty-four rods have received a covering of nine, sixteen hundred and ninety-seven of six, and twenty-seven of three inches of metal. Three thousand nine hundred and eleven rods have been graded and are ready to receive the covering; and for which there are, on the line of the road, six thousand one hundred and thirty-eight perches of broken or prepared, and upwards of seven thousand perches of rough stone. *In Pennsylvania*, six thousand nine hundred and ninety-three rods of the road have been completed; ten thousand and ten rods have received a covering of nine inches, six hundred and ninety-two of six, and three thousand five hundred and ninety-five of four and a half inches of metal. Four hundred and ninety-four rods of the road are graded and ready to receive its cover; and there are near the road side 7,611 perches of prepared, and 2,236 perches of rough stone. *In Virginia*, eight hundred and twelve rods have been covered with four and a half inches of metal, and one hundred and seventy six with three inches. Eighteen hundred and fifty-five rods of the road have been graded, and are ready for receiving the metal; and for which, there are, on the line of the road eight thousand three hundred and fifty perches of prepared, and twelve thousand six hundred and forty-five perches of rough stone. Besides this, there is a considerable quantity of stone out at the different quarries, which will be hauled to the road and prepared during the winter. Five thousand four hundred and fifty-three cubic yards of masonry have been constructed on different parts of the entire road The new location to turn Wills's mountain has been opened, and considerable progress made in the bridge to cross Wills's creek.

46. *Road from Columbus, Georgia, to Line creek, Alabama.*—This road has been located after a careful examination of the country through which it passes; and its construction will be prosecuted with as much despatch as circumstances will permit The greater part of the road is in a district of country entirely uninhabited. 47. *Road from Detroit to Chicago, Michigan.*— The contracts in 1832, for the construction of this road, extended as far as the 132d mile west from Detroit. Upon examination, it was found that between the 150th and 157th mile the country is extremely broken, and the traveling not only difficult but dangerous: it was, therefore, deemed advisable to contract for this part of the road in 1833, and to postpone, until 1834 the portion between the 132d and the 150th mile. 48. *Road from Detroit to Saganaw.*—No doubts are entertained of the contractors being able to comply with their engagements on this and the Chicago road. 49. *Road from La Plaisance bay to meet the Chicago road from Detroit.*—Twenty-seven miles of this road have been put under contract; and hopes are entertained that all will be done by the 31st January, 1834. 50. *Road from Detroit to the mouth of Grand river.*—On ten miles of this road, the first class of operations consisting of clearing and grubbing, excepting on one mile, will be completed by the close of the season. 51. *Road from Detroit to Fort Gratiot* — This road was put under contract last season to its termination, and would have been completed before the close of this, had not some sections of it been under water for a great portion of the time..

51. *Northern boundary of Ohio.*—The officer charged with collecting data preparatory to the adjustment of this line, has been engaged with an assistant in a reconnoissance to determine the stations and points where the more important instruments are to be used and to ascertain more accurately the extent and nature of the duty required by the law creating this service. This was deemed necessary before ordering all the instruments; and, accordingly, complete sets of observations were made for the determination of the latitude and longitude at and near the four principal points, viz. on Gull or Ship island, in Lake Erie; at the north point of Manmee bay or Bay point; the south bend of Lake Michigan; and near the same parrallel on the Mississippi.

Officers and Agents, Civil and Military, not named in the Army Register employed under the Engineer Department.

J. G Swift, Improvements at Big Sodus Bay, and Gennesse River, New York, $6 per day and 2½ pr ct. on disbursements, not to exceed $2 pr day
Ezra Crowell, Hyannis Harbor, Mass $2 per day and 2½ per cent on disbursements, not to exceed $2 per day.
T. M Clark, Merrimack River, Massachusetts, 5 per cent on disbursements
Thomas Buntin, do do $2 50 per day for superintending
B. W. Hall, do do do do
Joseph Bradford, Plymouth Beach, 5 per cent on disbursements.
A. S. Bowley, Provincetown, do do
E Young, do do do
S. Dickerson, jr. do do do
T B. Smith, Preservation of St George's and Deer Islands, $4 per day and 2½ per cent on disbursements, not to exceed $2 per day.
Gurdon Trumbull, Stonington Harbor, 5 per cent on disbursements.
Jer Sturges Mill River, do do
Timothy Ferguson, Piscataqua River, do do
Peter Grant, Kennebeck River, do do
B. Palmer, Kennebunk River do do
Ashbel Dart, Conneaut Creek, 2½ per cent on disbursements.
M. Hubbard, Ashtabula Creek, do do
H. Phelps, Grand River, do do
A. W Walworth, Cleaveland Harbor, do do
J Wright. Huron River, $2 per day.
H. M. Shreve, Ohio, Miss., Red and Arkansas Rivers, $6 per day and 2½ per cent on disbursements, not to exceed $2 per day.
John Milroy, Cumberland Road east of Indianopolis, $1200 per annum.
Homer Johnson, do west of do do
Wm. C. Greenup, do in the state of Illinois, $1250 per annum.
Wm. McKnight, Cumberland River, Tenn., $1200 per annum and 2½ per cent on disbursements, not to exceed $2 per day.
John Martin, Sup. Road from Line Creek, Alabama, to Chattahoochie river Georgia, $1000 per annum.
J. D. Selden. Gen. Sup. works in N. Y. Pa. and Ohio, $6 per day and 2½ per cent on disbursements, not to exceed $2 per day.

Civil Engineers, employed under the Topographical Bureau, with the amount of Compensation, pay and emoluments allowed to each.

Wm. Howard, Civil Engineer, Surveys in Penn and Ark. Territory, $6 per day and 12 cents per mile while traveling under orders.
De Witt Clinton, do Surveys in Vermont. do do
G. W. Hughes, Assistant Civil Engineer, Washington City, $3 50 per day and $3 while on office duty, and 10 cents per mile while traveling, &c.
H Stansbury, Civil Engineer Sur's in Ohio, $110 p mon. and 10 cts pr mile.
W. B Gunon, Surveys in Mississippi, $3 50 cents per day, and $3 while on office duty, and 10 cents per mile while traveling under orders.
C. V. Hagner, Assistant to Dr. Howard, do do do
V. Van Antwerp, Assistant to H. Stansbury, do do do
John P Bailey, do do do do
E. Stansbury, do do do do
J W Smith, Assistant to Dr. Howard, do do do
Wm Beckwith, do do do do
M. H. Stansbury, do do do do
E. W. Robinson, do $1 50 per day, and 10 cents per mile while traveling under orders.

Operations of the Ordnance Department, during the past year.

During the year between the 1st of October, 1832, and the 30th September, 1833, among other articles of ordnance and ordnance stores, which have been fabricated or procured at the several Arsenals and Armories, are the following, viz.

Of artillery, 212 32-pounder cannon; 1 42-pounder casemate carriage; 1 32-pounder casemate carriage; 9 24-pounder casemate carriages; 17 24-pounder barbette carriages; 5 10-inch seacoast mortar beds; 17 field artillery carriages, complete.

Of small arms manufactured at the national armories, 25,291 muskets, complete; 3,290 Hall's rifles.

Of accoutrements for small arms, about 4,550 sets for infantry, 2,031 sets for riflemen, and 1,260 sets for cavalry.

The operations at the national armories, and at the various arsenals of construction and deposite, during the past year, have been conducted with improved ability and economy, and have been followed by the most satisfactory results. This may be also said with regard to the business of collecting the materials and erecting the necessary workshops, storehouses and magazines on the sites adopted for the arsenal in Florida, on the Appalachicola, and for the arsenals in the Territory of Michigan, near the city of Detroit, which were authorized by the acts of the 5th of April and the 28th June, 1832.

The former of these arsenals will occupy a healthful eminence on the left bank of the Appalachicola, near the junction of the Flint and Chattahoochie, and at the distance of about sixty-five miles from the mouth of the Appalachicola.

The new arsenal in the Territory of Michigan will be situated upon a high sandy ridge, on the right bank of the river Rouge, and on the great road from the city of Detroit to Chicago, at the distance of ten miles from Detroit. These two arsenals are principally intended as places of deposite and repair; but they will be constructed in such a manner as to enable their operations to be so extended (whenever any emergency shall require it) as to make them also places of construction.

The arsenal on the river Rouge will be a source for supplying munitions of war to the militia and military posts of the Northwest and Michigan Territories, and to the militia of the northern parts of the States of Illinois, Indiana, and Ohio. It is intended to replace the old depot of munitions of war, hitherto inconveniently situated in the city of Detroit, and which will be abandoned so soon as the new arsenal buildings are sufficiently advanced to receive the munitions now in depot

The arms, &c., procured under the act for arming and equipping the militia, are—

Muskets, complete, 11,180; Rifles, (Hall's) do., 1,500; Sets of Infantry accoutrements, 4,549; sets of rifle accoutrements, 1,901; rifle flasks, copper, 6,251; belt plates, 3,611; Artillery swords, 1,100; Artillery sword belts, 3,016; sabre belts, 1,720; cavalry cartridge boxes, 307; holsters, pairs, 1,085; hides of buff leather, 800; six pounder iron cannon, 1; six pounder cannon balls, 6,435; six pounder field carriages, with equipments, complete. 63; Twelve pounder, do, 4; six pounder field carriages, timber, sets. 47.

Apportionment of Arms to the Militia, for the year 1832, *under the Act of* 1808.

STATES AND TERRITORIES.	Date of the return.	Number of Militia.	No. of arms apport'nd.

INDIAN AFFAIRS

Operations under Indian Departmen', during the year.

In accordance with the policy of the Government. measures have been taken for the due execution of the treaties concluded with the Shawnees and Delawares, late of Cape Girardeau, with the Kaskaskias and Peorias, the Kickapoos, the Piankeshaws, and Weas, and with the Winnebagoes; all of which were ratified at the last session of Congress; and those tribes, excepting a portion of the Winnebagoes, are now located on the lands set apart for their permanent residence.

The treaty concluded with the Chickasaw nation, also ratified at the last session of Congress, has been put in the course of execution, and an exploring party, conducted by their agent, Col. Reynolds, has gone to the West for the purpose of procuring land for the future accommodation of their tribe

Measures have also been set on foot for the execution of the several treaties made with the Pottawatamies, with the Ottawas of the Maumee, with the confederated tribes of the Sac and Fox Indians, and with the united nation of the Senecas and Shawnees Indians, which were ratified at the last session of Congress.

Suitable steps have likewise been taken to carry into effect the treaty concluded with the Menomonees, to which the New York Indians were also parties, and ratified at the last session of Congress. A delegation has been despatched to examine the country designated for the residence of the latter, and on their report a final decision may be expected, to remove either to Green Bay, or west of the Mississippi. Their emigration to the West may possibly be induced by the cordial invitation of those of their nation, already settled in that region, to join them, and by their favorable representation of the fertility of the soil and delightfulness of the climate.

The Cherokees continue, in the midst of increasing embarrassments, to evince the same pertinaciousness on the subject of removal, that has hitherto marked their counsels, and warred with their best interests. An unfavorable influence on this question is exercised by some of the chiefs, with no very laudable motives, maintained by the rigorous discipline which their despotic structure of internal government authorizes. Notwithstanding this, it is understood that the spirit of emigration is active among the great body of the nation, under the proffers made to them for exchange of residence; and the belief is entertained that at least fifteen hundred will emigrate in the ensuing spring, to seek better fortunes in more fertile domains, and under auspices favorable to their prosperity and increase.

Recent communications from the agent of the remaining band of Wyandots in Ohio furnish good reason to conclude that their emigration will soon take place. They have lately been invited in most cordial terms by their brothers in the West to join them, with such a description of the climate and country, as to have produced a great change of sentiment, and a strong inclination to be re-united to their tribe.

Col. James Gadsden has succeeded in making treaties with the two remaining bands of the Appalachicola Indians, and, upon their removal, Florida will cease to possess an Indian population.

The provisional treaty communicated to the Senate at its last session, concluded by Col. Gadsden with the Seminole Indians, will be obligatory, on its ratification by that body. The deputation of their chiefs, which went to Arkansas to examine their destined country, has returned, and reported favorably upon it for their future residence. The want of an appropriation to defray the expense, prevented the removal of most, if not all of them during the past season.

In the progressive execution of the late Creek treaty, an unfortunate circumstance took place, which has occasioned considerable excitement in the State of Alabama. By a provision of that treaty, all intruders were to be removed from the ceded land, until the country was surveyed, and the stipulated selections were made. This has not yet been done, and in the interim repeated complaints of gross injustice and cruel treatment towards the Creeks were received by the department. It was represented that in many instances they were driven from the lands they had cultivated, that they were unmercifully beaten, that their dwellings were burnt, and that they were compelled to flee to the woods for safety Under these circumstances of provocation and outrage, the persecuted Indians applied to the Government for that protection guarantied to them by the treaty. Instructions were accordingly issued to the marshal of the southern district of Alabama, couched in conciliating language, to expel the intruders, after giving them reasonable notice to leave the ceded land, and so to execute the order as to occasion them the least possible loss and inconvenience. They had put themselves in the wrong and it devolved upon the Government to right the injured party. In the discharge of that duty by the marshal, an intruder, named Owen, lost his life by resisting the law of the land. It has been officially represented to the department that, previously to the catastrophe, on his evincing a determination not to yield to authority, he had been expostulated with, and cautioned to forbear resistance: also, that he was armed, and, while in the act of firing at one of the men on duty, was shot in that hostile position. The occurence, however much to be deplored, seems, from the above representation, to have been avoidable only at the extreme peril of life; and that to the reckless rashness of the individual can alone be imputed the unhappy result of his original trespass.

Under an act of the last session of Congress, to enable the President to extinguish the Indian title to land within the States of Indiana and Illinois, and the Territory of Michigan, commissioners were appointed, and a treaty has been concluded with the united nation of Chippewa, Ottowa, and Pottawatomie Indians, by which they have relinquished to the United States all their land within the said States, and all that was held or claimed by them jointly in the said territory. The treaty comes particularly commended in the fact of total cession without any reservation, thereby ensuring the prompt emigration of the Indians, and serving as a prevention of unjust speculation in their lands.

The commissioners appointed by the act of July 14, 1832, to adjust difficulties in the location of the land of the emigrating Indians, and for other purposes, have happily succeeded in concluding a treaty with the Creeks and Cherokees, whereby the boundaries of the lands of the two nations have been definitively and permanently established, and a long existing controversy has been terminated to their mutual satisfaction.

They have also concluded a treaty with the Quapaws, and assigned them land west of the Mississippi, to induce their removal from the Territoty of Arkansas.

The commissioners represent the Indians west of the Mississippi to be advantageously situated, and progressing towards civilization with a steady pace.

Few hostilities have been committed during the past year among the Indian tribes. Tendency to civilization, and the presence of a military force among them, have, in a great degree, repressed their spirit for violence and rapine.

INDIAN SCHOOLS.

As reports have been received from only twenty of the fifty-three Indian Schools, during the past year, a full statement of their condition cannot be given in this Volume (See Vol xi. page 239.)

Statement showing the amount and disposition of the funds, provided by treaties, for purposes of education.

MILITARY ACADEMY.

REPORT OF THE BOARD OF VISITERS

UNITED STATES' MILITARY ACADEMY,
To the Secretary of War: *West Point, June*, 1833.

The Board of Visiters, who have been invited to be present at the general examination of the Cadets of the United States' Military Academy, in order that the War Department may be correctly informed of the condition and management of the Academy, have attended the examination of all the classes, and are perfectly satisfied with the progress made by the cadets in the several departments of their studies in which they were examined.

At the request of the superintendent, a committee, appointed by order of the Board, assigned the subject to each individual of the class, in order to avoid all suspicion of the examining professor having adapted the subject to the capacity and attainments of the cadets, so as to exhibit an appearance of greater proficiency that the class really possesses.

The first class was examined in military and civil engineering, in mineralogy, rheteric, ethics, and constitutional and national law, and in infantry and artillery tactics, and in each of these departments exhibited proofs of their application and attainments, and of the zeal, capacity, and industry of the professor and assistants. The cadets of this class will leave the academy well fitted to fulfil the great objects of the institution, viz: to introduce into the armies of the United States all the modern improvements in the art of war, and the high state of discipline which distinguishes the best armies of Europe; to disseminate throughout our country a knowledge of military tactics and engineering, so as to furnish the means of rendering our militia, as well as our regular army, an efficent arm of defence in time of war; and to provide officers properly instructed, and fully capable of superintending the construction of fortifications for the permanent defence of our maritime frontier, and of works connected with the internal improvement of the country.

The cadets of the second class were examined in chemistry and natural philosophy, and showed a degree of proficiency very creditable to the professors and assistants who have been charged with their instruction in these departments. The Board would here remark that, in their opinion, it would be expedient to establish a permanent professor of chemistry.—The important discoveries made and still making in this department of science, and its application to the useful arts, as well as its connexion with the means of preserving the health of the soldier in camps and barracks, render it important that it should be taught in this academy; and it is obvious that it requires great application, experience, and long practice to teach a science which must be illustrated by experiments made before the pupil. It is believed to be difficult to acquire the art of instructing youth in any department of literature or science, but it is especially so in those which require skill in demonstrating theories and principles by experiments. Instruction in such branches ought not to be entrusted to officers liable to be frequently removed.

The third class were examined in mathematics and French. There is no institution that we are acquainted with, where this department of science, in its higher branches, is more thoroughly taught than in this

academy. The high attainments and unwearied industry of the professors and assistants, together with the great application and capacity of the cadets of the third class, were exhibited throughout the course of this examination in a manner highly satisfactory to the Board.

The examination in French was very creditable to the teachers and cadets of this class. They appeared to be well instructed in the grammar of this difficult language, conjugating the regular and irregular verbs very correctly, and they translated it into English with great facility, which is all that is deemed requisite; the principal object of this course being to enable the cadet to consult the best French authors on military science.

As there are at least 160 students to be taught in this language, it is believed by those best acquainted with the subject, that another teacher in this branch ought to be added to those already employed.

The fourth class were examined in mathematics and French. The cadets of this class evinced a degree of proficiency in the elementary branches of mathematics, highly creditable to the gentleman who is charged with this department of their studies. Whatever may be the talents and application of the student, he cannot make any proficiency in this essential department of study, which may be considered as the foundation of all military education, unless his studies are directed by a person not only profoundly versed in the science, but possessed of great experience in the art of instructing youth; and the Board would take this opportunity of remarking, that to remove such an instructor from the academy for the purpose of substituting another, who, whatever his talents and acquirements may be, does not possess the same experience and practice in teaching, cannot but be prejudicial to the interests of the academy, and would be unjust to the cadets.

The Government exacts from them, especially in the department of mathematics, a degree of proficiency, which they cannot obtain without the assistance of competent instructors; and they may be exposed to be turned back as deficient, or to be dismissed as incapable of going through the course of studies in the academy, because the instructor provided for them is incompetent or inexperienced.

The Board is induced to make these remarks, from having had before them a late order of the Commander in Chief, containing regulations sanctioned by you, which, if applied to this academy, would seem calculated to affect very materially the instruction of the cadets. It appears to them that the regulation requiring all officers who have not served with their regiments for three years to join their respective corps, as it will remove nearly all the assistant professors from the academy, would be attended with very great inconvenience at any time, and at this period, when the superintendent, who has so long presided over this institution with such signal ability and success, is about to retire, such a change would seriously embarrass his successor. This embarrassment will be increased by the effect of the regulation, which takes from the superintendent the power of nominating the officers to be detached for that service. He is supposed, from his situation, to be better acquainted than any one else with the acquirements and moral character of the graduates; and as the responsibility rests with him it appears but just that he should have the power of selecting his assistants. It is deemed important

that the course of studies should be steady, and keep peace with the improvements which daily take place in the progress of science. This would be impracticable if the assistant professors were frequently changed, and selected from officers who had graduated prior to the introduction of the improvements now taught in this institution throughout every department of science. Indeed, it would appear adviseable that the professors, who have evinced so much capacity in imparting instruction to youth, should be offered every inducement to remain, by being permanently attached to the institution, and receiving some additional allowance for services materially affecting the future character and efficiency of the army, and which, if they were rendered in any literary institution in the country, would command much higher pecuniary rewards.

The Board attended the battalion, light infantry, and artillery drills, and had every reason to be satisfied with the instruction of the cadets in their field exercises. They were present likewise in the laboratory when the cadets exhibited their proficiency in pyrotechny, and they subsequently saw them throw shells, and fire at the target with light and heavy pieces of artillery; all which they executed with a precision rarely equalled, and not surpassed in any school of practice in Europe.

This is the more remarkable, from the state of the pieces used for practice. They are very defective, and the Board recommend that the several pieces of ordnance which are required for the instruction of the cadets by their able and scientific instructor, should be furnished of the best quality and most approved constructions.

Much credit is due to the officer charged with the instruction of the cadets in this department. He has compiled a practical treatise on military pyrotechny, and translated an excellent elementary treatise on the forms of cannon, and various systems of artillery, and another on the theory and practice of gunnery, from the French of Professor Persy, of Metz, all of which, with numerous plates illustrating the subjects, have been published in the lithographic press in the academy.

The cadets are encamped two months in every year, and during that period are instructed in all the duties of the soldier in active service, in the use of instruments, and in the application of the different branches of science necessary to a knowledge of their profession. Whether this practical course of the application of science to the purposes of military and civil engineering may not be usefully extended, is worthy of consideration.

The library of the academy contains a very valuable collection of works adapted to the peculiar objects of this institution. It is rich in works on military science and on civil engineering, and contains a valuable series of military history, and the best geographical and topographical maps of the States of Europe, to illustrate this important study It is true that in works on polite literature it is as yet rather deficient, although the selection has been very judicious; but, however desirable it may be to augment the number of volumes on miscellaneous subjects, the real object of the institution must be kept steadily in view; and it will continue to be the duty of the superintendent to purchase, in preference to all others, books relating to the sciences taught in this academy, and to supply the necessary works on architecture, chemistry, geology, mineralogy, and moral science, in which the library is still very deficient.

The philosophical apparatus and astronomical instruments are of the best kind and of the latest invention, but many more are required fully to illustrate the course of natural philosophy.

The building which contains the library and philosophical apparatus is both unsafe and unstable, and the rooms are so small and inconvenient as not to admit of the necessary arrangement and display of them for useful purposes. Many instruments of the philosophical apparatus, which are delicate in their structure and uses, and require to be very nicely and accurately adjusted, are exposed to be injured by the constant and violent shaking of the edifice; and the finer astronomical instruments cannot be used, from the same reason, and from want of space. A large telescope is placed in a detached building entirely unsuited to its uses.

For these reasons, and from the intrinsic value of the books and instruments, the Board recommend the erection of a fire proof building, with an observatory annexed to it.

Upon a careful and minute examination of the public buildings of the academy, it has been found that they are inadequate to the purposes of the institution, and are not only badly constructed, but entirely too limited to afford comfortable or proper accommodations for the cadets who are lodged in them.

A number of cadets are from necessity crowded into a small room, which must produce a prejudicial effect upon their studies, their morals, and their health. That they have been exempt hitherto from the diseases which are engendered in confined and crowded apartments, is due altogether to the admirable system of internal police and strict attention to cleanliness which distinguish every department of this institution.

There is, besides, a want of accommodations for the assistant professors, and the quartermaster, paymaster, and adjutant are without offices. For all these purposes nearly fifty new rooms are required. The Board would recommend that the superintendent be instructed to furnish a plan of a building, capable of uniting all the accommodations required by the officers and cadets now at the academy, and of being extended whenever the Government may think it expedient to enlarge this institution, and render it proportionate to our vast territories and rapidly increasing population; and that, whenever it may be thought proper to erect the building now called for, it may be so constructed as to form part of an edifice hereafter to be completed with more extensive accommodations.

On examining into the fiscal concerns of the academy, the Board have every reason to be satisfied that great economy has been exercised in the administration of this department of the institution, and cheerfully bear testimony to the order and regularity with which the books are kept, and the receipts and disbursements accounted for, as well as to the integrity and judicious economy with which the finances of the academy are administered.

There are several subjects, the importance of which is fully understood and acknowledged by the superintendent and academic staff, but which are not taught in this institution, for want of time. In military and civil engineering, it is thought that the following might be introduced with great advantage to the cadets: A course of applied mechanics on the investigation and description of some of the most useful machines employed in the construction of public works. Some practical exercises in the

field, such as laying out and throwing up some of the works of a campaign, which are most ordinarily used; batteries, trenches, cavaliers, the manner of conducting saps, the construction of gabions and fascines, &c &c, and a course of topography as applied to military reconnoissances; indeed, such is the vast importance of this branch, that a new department, embracing the whole subject, could not fail to be very advantageous to the military student.

In the department of natural philosophy many important practical illustrations might be advantageously introduced. At present the experimental part of the course is principally confined to the illustration of such facts and general principles as may be established by experiments exhibited in the presence of the entire class. These illustrations are attended with the most beneficial effects, as they serve to make a very forcible impression on the mind of the student; but they are alone insufficient. It is frequently important that the student should not only be acquainted with the name and use of an instrument, but that he should be able to employ it himself. This can only be done when sufficient time is allowed for each student to make frequent use of such instruments, under the immediate direction of the professor.

This deficiency is particularly felt in the course of astronomy, where an intimate acquaintance with the use of instruments and the habit of submitting the data furnished by observation to the process of calculation are essentially necessary to enable the student to apply his theoretical knowledge to useful purposes. The instruction in practical astronomy is altogether too limited; the time which can be devoted to this object being scarcely more than sufficient to permit the professor to make the students acquainted with the objects of the few instruments in the possession of this department. This is certainly a great defect: important lines are frequently required to be established as boundaries between States and Territories of neighbouring nations, where the accurate use of instruments is of the last importance, and the cadets of this academy ought to be practically taught to use them with perfect correctness.

The principles of strategy or grand tactics might be taught with advantage.

It is true, that there is no work treating of those subjects which is sufficiently condensed, and at the same time perfectly unexceptionable in its principles and illustrations; but the same industry and talent which has furnished text books in other departments of military science, might be employed for this purpose with great success, and furnish a series of lectures embracing a definition of the technical terms employed, and such general principles as admit of the clearest and most exact illustration.

It appears always to have been desirable that cavalry tactics should be taught at a great national military academy. This branch has hitherto been totally neglected, but it has become more essentially necessary since this arm has been added to the regular army of the country. The service of cavalry and horse artillery ought to form a part of the practical instruction of this academy, and the Board respectfully recommend this subject to your consideration. As the cadets are now occupied sedulously every hour of the day in the prosecution of the studies now taught in this institution, it will be necessary, if these subjects are deemed of sufficient importance to be added to the present course, that the term

of the academic study should be extended, or the qualifications required on entering the academy should be made much greater than they now are. They are lower than is required by any literary institution in this country, and no doubt the frequent dismissal of those young men who cannot keep up with their class arises principally from this cause. Parents ought to be informed of the great advantage their sons would derive the first year of their course at this academy, by being well grounded in the classics in arithmetic and Algebra, and in rudiments of the French language

The manner in which the cadets are furnished with clothing was a subject of inquiry by the Board, who were satisfied that this was done in the most economical manner Their mess-room was inspected while the cadets were at their meals, and the Board were satisfied that the steward fulfilled his contract faithfully, and supplied the tables with abundance.

An inquiry having been made into the manner in which cadets are supplied with the class books and stationery, the Board are satisfied, after a complete investigation, that the cadets are supplied with all such articles at a lower price than they can be purchased for in New York, and in the most convenient, just, and economical manner, and that the arrangement made by the superintendent in this particular is marked by the same prudent economy, order and intelligence which characterized the management of the institution.

The Board having learnt that the present superintendent of the Military Academy, whose health has suffered from his close attention to the affairs of the institution, has been called to the performance of other duties, cannot forbear to express the very high sense they entertain of his merit and services, during the long period of his command at this station.

To the knowledge acquired with this view by Colonel Thayer, the Military Academy of the United States owes its present admirable organization; and to his zeal, capacity, and unwearied attention to his duties, is to be attributed the high state of discipline and improvement of the institution. To his exertions we owe, in a great measure, the success of this establishment, the extensive usefulnesss of which needs only to be understood by the nation to be fully appreciated.

Independently of serving to disseminate over the vast territories of the United States knowledge of a description which cannot enter into the usual course of studies in other academies, and furnishing the means of rendering most effective our army and militia, of securing our frontier, and improving the communication throughout the States, it is calculated to elevate the moral state of the military profession in our country, the importance of which to the general interests of the nation cannot be too much insisted upon.

The annals of history prove that success in arms is one of the most fruitful sources of personal popularity; and in a country where the soldier is still a citizen, and may be called upon to share in the civil government, or rise to the highest honors of the state, the standard of study and discipline cannot be too high, which develops his talents and forms his character. The same annals show that, at the close of successful wars, the liberties of a country depend, in a great measure, upon the character of the armies; at such a period, the fortunate soldier possesses

power, and great, and probably, well earned popularity; and if his character is not as elevated by nature or education as to lead him to prefer the solid fame of having preserved the liberties of his fellow citizens to the glitter of false ambition, and to sacrifice all personal views of aggrandizement to the good of his country, he may plunge the state into anarchy, or rivet upon his fellow citizens the chains of despotism. If ever the liberties of the states of Europe shall be recovered, it will be effected through the improved condition, character, and education of their officers and soldiers; and while we indulge the hope that the liberty of these States rests upon too firm a basis to be overthrown by the ambition of those who compose our armies, it cannot be concealed that, if they were not instructed, their ignorance and depravity might seriously endanger the peace of the country.

The Board have observed with some regret that the old works in the neighbourhood of the academy have been, in some instances, disturbed. They ought, in their opinion, to be preserved as monuments of the glorious struggle which secured our independence. The contemplation of such memorials cannot fail to have a beneficial effect. They are calculated to inspire all Americans with sentiments of exalted patriotism, and to remind them of the extraordinary efforts and great sacrifices made by our forefathers to achieve the liberty and independence of the country, and cannot fail to lead them to form virtuous resolutions, and to reflect that, as heirs of the immortal fame of their ancestors, they are bound to emulate their glorious career, and preserve their bright inheritance with the same inflexible courage and undeviating purpose.

An act to improve the condition of the non-commissioned officers and privates of the Army and Marine Corps of the United States, and to prevent desertion.

Be it enacted by the Senate and House of Representatives of the United States of America, in Congress assembled, That from and after the passage of this act, all enlistments in the army of the United States, shall be for three years; and that the monthly pay of the non-commissioned officers and soldiers, shall be as follows, viz: to each sergeant major, quarter master sergeant, and chief musician, sixteen dollars; to the first sergeant of a company, fifteen dollars; to all other sergeants, twelve dollars each; to each artificer, ten dollars; to each corporal eight dollars; and to each musician and private soldier, six dollars; and that all enlistments in the marine corps, shall be for four years; and that the monthly pay of the non-commissioned officers and soldiers in said corps, shall be

as follows, viz: to each sergeant major and quartermaster sergeant, seventeen dollars; to the drum major, fife major, the orderly sergeants of posts, and first sergeants of guards at sea, sixteen dollars each; to all other sergeants thirteen dollars; to each corporal, nine dollars; to each musician, eight dollars; and to each private, seven dollars.

SEC. 2. *And be it further enacted*, That one dollar of the monthly pay of every musician and private soldier, shall be retained until the expiration of the two first years of their enlistment, when each shall receive the twenty-four dollars retained pay which shall have so accrued: *Provided*, He shall have served honestly and faithfully that portion of the term of his first enlistment.

SEC. 3 *And be it further enacted*, That every able bodied musician or private soldier, who may enlist into his company or regiment, within two months before, or one month after, the expiration of his term of service, shall receive two months' extra pay, besides the pay and other allowances which may be due to him on account of the unexpired period of any enlistment.

SEC. 4. *And be it further enacted*, That every able bodied musician or soldier who shall re-enlist into his company or regiment, as specified in the third section of this act, shall receive his full pay, at the rate of six dollars per month, without any temporary deduction therefrom.

SEC. 5. *And be it further enacted*, That no premium to officers, for enlisting recruits, nor bounties to recruits for enlisting, shall be allowed after the passage of this act.

SEC. 6 *And be it further enacted*, That no person who has been convicted of any criminal offence, shall be enlisted into the army of the United States.

SEC. 7. *And be it further enacted*, That the seventh section of the act entitled "an Act making further provision for the army of the United States," passed on the sixteenth of May, one thousand eight hundred and twelve, be, and the same is hereby repealed, so far as it applies to any enlisted soldier, who shall be convicted by a general court martial, of the crime of desertion. [*Approved March* 2, 1833]

Act for the more perfect defence of the frontiers. Approved March 2, 1833.

Be it enacted by the Senate and House of Representatives of the United States of America, in Congress assembled, That in lieu of the battallion of mounted rangers authorized by the act of the fifteenth of June one thousand eight hundred and thirty two, there be established a regiment of dragoons, to be composed and organized as follows, to wit: one colonel, one lieutenant colonel, one major, one quartermaster sergeant, and two chief buglers, one adjutant, who shall be a lieutenant, one sergeant major, one chief musician, and ten companies; each company to consist of one captain one first lieutenant, and one second lieutenant, exclusive of the lieutenant who is to be the adjutant of the regiment; four sergeants, one of whom shall act as quartermaster sergeant to the company, four corporals, two buglers, one farrier and blacksmith, and sixty privates.

SEC. 2 *And be it further enacted*, That the officers, non commissioned officers, musicians, and privates, when mounted, be entitled to the same pay and emoluments as was allowed to dragoons, during the war

and when on foot, the same pay and emoluments as are now allowed to the officers, non-commissioned officers, musicians and privates of a regiment of infantry; and that the farrier and blacksmith be allowed the same pay and allowances as are allowed to an artificer of artillery.

SEC. 3. *And be it further enacted*, That the said regiment of dragoons shall be liable to serve on horse, or foot, as the President may direct; shall be subject to the rules and articles of war, be recruited in the same manner and with the same limitations; that the officers, non-commissioned officers, musicians, farriers and privates shall be entitled to the same provisions for wounds and disabilities, the same provisions for widows and children, and the same allowances and benefits in every respect, as are allowed the other troops constituting the present military peace establishment.

SEC 4. *And be it further enacted*, That the President of the United States be authorized to carry into effect this act, as soon as he may deem it expedient, and to discharge the present battalion of mounted rangers, on their being relieved by the said regiment of dragoons.

SEC. 5. *And be it further enacted*, That the sum required to carry into effect the provisions of this act, is hereby appropriated, in addition to the appropriations for the military establishment for the year 1833.

An Act for the payment of horses and arms lost in the Military service of the United States against the Indians on the frontiers of the Illinois and Michigan Territory. [*Approved February* 19, 1833.]

Be it enacted by the Senate and House of Representatives of the United States of America, in Congress assembled, That any mounted militiaman or volunteer whilst in the service of the United States, in the late expeditions against the Indians, on the frontiers of Illinois and the Territory of Michigan, who sustained damage by the loss of any horse which was killed in battle, or died in consequence of a wound received therein, or in consequence of a failure on the part of the United States, to furnish such horse sufficient forage whilst in the service, or in consequence of the owner being dismounted, or separated and detached from the same, by order of the commanding officer, or in consequence of the rider being killed or wounded in battle, shall be allowed and paid the value of such horse at the time of going into service: *Provided*, Such loss was not the result of negligence on the part of the owner; the time employed in going to the place of Rendezvous, and returning home after being discharged, to be taken and considered as actual service.

SEC. 2. *And be it further enacted*, That any person in the aforesaid service of the United States, as a volunteer or drafted militiaman, who furnished himself with arms and military accoutrements, and has sustained loss by the capture or destruction of the same, without fault or negligence on his part, shall be allowed and paid the value thereof.

SEC. 3 *And be it further enacted*, That all claims arising under this act shall be examined, allowed, and paid in the same manner by the Third Auditor that similar claims were under "an act to authorize the payment of property lost, captured or destroyed by the enemy, while in the military service of the United States, and for other purposes," passed April 9, 1816, and the act in amendment thereof, passed March 3, 1817, this act to be and remain in force three years from and after its passage.

Statement Exhibiting, the amount expended from the 4th of March, 1789 to 31st Dec. 1791, and in each year, (ending 31st Dec.) from 1791 to 1831, under the following heads of the Military establishment of the U. States; viz.

I. Pay of Officers, and Pay, Rations, and Clothing of Soldiers, and Recruiting
II. Fortifications, Arsenals, Armories, and Buildings of all kinds relating to the Army.
III. Cannon, Gun Carriages, Stores of all kinds, Arms, Ammuntion, Balls, &c
IV. Invalid Pensions.
V. Revolutionary Pensions, Half Pay, and Pay per act of 18 March, 1828.

THE NAVY.

REPORT OF THE SECRETARY OF THE NAVY.

NAVY DEPARTMENT, *November* 30, 1833.

To the President of the United States.

SIR: In submitting to your consideration a review of the operations of the naval branch of the public service during the past year, I would first invite attention to its administration in this place.

The separate organization of the Navy Department in the manner originally established by Congress, and the change since made by the addition of a Navy Board, have, with the several clerks now allowed, furnished a sufficient number of persons for the suitable discharge of all ordinary duties immediately connected with this office. So far as my knowledge extends, those duties have generally been performed with promptitude and accuracy; but some changes in the present laws respecting them would probably prove beneficial. Though the number of clerks, and the aggregate amount of salary paid to them, are deemed sufficient, yet more substantial justice could be enforced if that amount was so appropriated as to permit the department to divide it in conformity to the usefulness of their respective services. It has happened that some of them receiving large salaries perform no greater or more difficult duties than those receiving less pay, and no power exists here to equalize their compensation, except by an occasional transfer of duties, not always convenient, appropriate, or useful.

A different arrangement of the Navy Board has, for a few years, been a subject of consideration by Congress. The Board itself, and the head of this department, once united in recommending such a change as to apportion its ordinary business among the several members, with a view to greater convenience, despatch, and responsibility. This could be accomplished without any material increase of expense, and it seems, on many accounts, very desirable. The reasons for the change have been so fully detailed in former reports as not to need at this time further explanation.

There might be some useful alterations connected with the administration of the naval branch of the service in the office of the Fourth Auditor, whose duties, though nominally belonging to the Treasury Department, are intimately allied with, and very essential in most of, the operations of the navy. The great amount of property which is in charge of this department, and which is yearly increasing, seems to require that a regular account of it should be opened in that office, and kept in such manner as to ensure safety and responsibility. In another particular, improvement could be made. The old balances on his books, due from defaulters who were once in the naval service, are large, and though few such balances have occurred lately, yet the collection of all of them would doubtless be promoted if it were devolved upon him as the person who, from his official station, is best acquainted with the situation of the claims, and the means of payment possessed by the debtors, and who could act with the most promptitude in securing the public.

Auxiliary to the central administration of the naval service, the in-

spection of our ordnance was a few years since assigned to an officer of rank residing in this neighborhood, and authorized to receive the usual extra allowances while engaged in actual duty. His employment during the past season has been much extended, having embraced the inspection of all our ordnance and ordnance stores in depot at all the naval stations. The result it is hoped may prove highly beneficial in our future operations. Under a similar arrangement, the custody and correction, as well as occasionally the purchase of charts, chronometers, compasses, and nautical instruments generally, were devolved on two intelligent officers stationed at this place. The system has worked favorably; and the small increase of expense attending it, has been amply paid in the better preservation and quality of those articles, and in the probable increase of safety to our vessels afloat, and to the lives of their gallant officers and crews. A specific estimate [$1,000] for the purchase and maintenance of a lithographic press is submitted as a means of saving, under charge of these officers, still more to the public in the procurement of charts, circulars, and blank forms, of such kinds as are employed, not only in this office, but at the several yards and on board vessels in commission Its various conveniences and usefulness in other respects, and especially in the drawings and plans connected with the survey of our coast, now in progress, are more particularly detailed in the reports annexed. To prevent any nominal or real increase of appropriations in consequence of the purchase of this press, it will be seen in the general estimates that a corresponding, or, indeed, a larger reduction has been made in what is asked for the general contingent appropriations for this office and for the service, and out of which appropriations most of the above articles are now provided.

It was formerly recommended to organize at this place a naval medical bureau, and a bill is now on the files of Congress reported for that purpose. As that bill was not finally disposed of, I did not deem it proper to adopt any different system for attaining in a different manner most of the benefits expected to be accomplished by that measure. But if nothing be done during the ensuing session of Congress, regulating this subject, it is intended, under our present laws, that one of the older surgeons, in connexion with other services, either at the barracks or navy yard in this city, shall be detailed and employed in performing many of the duties contemplated for a surgeon general.

The whole expenses, the past year, for all persons situated here, and belonging to the administration of this department, as well as the expenses for the care and repair of our furniture, buildings, and the grounds appurtenant, were about $48,000. This amount, I trust, will be thought to bear a favorable comparison with the same class of expenses at former periods, or in other similar establishments, when the large increase and extent of duties at this place are duly considered.

Passing from the central administration of this department, to that of persons connected with its operations elsewhere, I would next submit to your consideration a few remarks on the situation of such of those persons as fill official stations, but are not technically denominated naval officers They are a large and useful class, belonging to what may be considered our civil list, and consist of agents, storekeepers, constructors, builders, schoolmasters, secretaries to commanders, clerks of yards, engi

neers, live oak superintendents, and some others attached to stations and hospitals.

In an establishment growing like the navy in a few years from so small a beginning to its comparatively great size at the close of the late war, and at the present moment, it was perhaps unavoidable that many measures and appointments, considered as incidental to other important objects expressly authorized, should be left to the discretion of the department. In this way most of the above persons have been employed and paid, usually by virtue of estimates and general appropriations, without any specific provision in any act of Congress regulating the manner of their appointment, or the amount of their compensation. Indeed, a system similar in some respects has been extended to others; as the only limit, which now exists, to the number of every class of naval officers is the same discretion, restrained solely by estimates and appropriations, and by the confirmation required from the Senate in the case of commissioned officers. These practices have not, in my opinion, been the safest; though the custom of this department to submit to Congress, through the Executive and otherwise, full communications of its doings in relation to most of these subjects, enables the Government to exercise any control deemed necessary over any supposed abuse. My own desire has been, whenever convenient and practicable, to impose still further limits on that discretion. With this view, on a former occasion, the estimates for the contingent appropriations were made by me more specific, and settled rules of allowances and compensation in most cases were established or collected, and then digested and published. The revision of our whole naval regulations by the Board heretofore appointed for that purpose, will, when finished and adopted, probably introduce greater system and certainty in relation to some of these matters. But it still deserves consideration, whether additional legal provision might not judiciously be made concerning the appointment and wages of some of the classes before named. All the persons on the civil list now under consideration are believed to have conducted, during the past year, with fidelity to their duties. The only essential changes in relation to them have been the following. There has been a discontinuance of two naval constructors, whose services were no longer needed; and new and more economical arrangements have been made as to the duties of some of our agents and storekeepers abroad. The few live oak agents, appointed for certain districts, who remained in office last December, have been dispensed with; and no salary is now paying on that account, except to one person, in temporary employ for a few months, in the examination of our unfinished district. In some cases in which we have had warranted officers, competent to perform the labors assigned to persons belonging to civil life, and hired at some of the yards, it has been deemed sound economy to order the former upon such duty, and to discontinue the services of the latter. It has not yet been found necessary to select a permanent engineer, as the superintendents of the dry docks and of the erection of the hospitals have been able, for the present, to perform such duties as would have been required of him. But the additional schoolmasters, authorized at the last session, have been employed, and it is hoped with increased benefit to the class of younger officers. A general order has recently been issued with a view to improve the education of these officers, by requiring

all midshipmen, whether passed or not, after suitable relaxation under leaves of absence, to attend on one of the naval schools for further instruction in the studies, and proficiency in the duties, belonging to their profession. It is intended to employ them there not only in appropriate reading, nautical observations and recitations, but in forming a more practical acquaintance with the several materials used in the construction and equipment of vessels, and with the manner of preserving them, and of applying them in building and repairs. A due portion of their leisure will also be devoted to the performance of such services, connected with our most important naval stations where the schools are established, as will be useful to the public, and at the same time advance them in a more thorough knowledge of the active duties which may soon devolve on them in higher and more responsible situations. Excepting these variations, the civil establishments at the yards, and abroad, have not been materially altered during the year. It will be seen that the whole expenses of the persons connected with them have been considerably reduced, and are now annually about $130,000. This does not include the wages of ordinary laborers, as these are more properly charged, according to their employment, under other heads, which will hereafter be considered—such, for example, as repairs of vessels, improvements at yards, or building of hospitals.

The only material change proposed in the civil list for the ensuing year, is a small addition to the very low compensation of some of the clerks at a few of the yards.

The remaining persons belonging to the naval establishment are the various officers and seamen of the navy. The general conduct of these, the past year, has been highly commendable. The very small number of courts martial, it is believed, have arisen from an improving spirit of harmony in the service, and from a mild but firm and uniform system of discipline. Seldom has the health enjoyed on every station been better; and the superior condition of the medical corps, as well as of the hospitals, exercises on this subject a very salutary influence.

The number of officers in the different classes has generally been kept within the estimates. It is proposed to continue the number much as it now exists. There are now quite as many captains and surgeons as can be usefully employed; the former having been increased about one-third, and the latter one-fourth, during the last ten years. There are somewhat more lieutenants and midshipmen than might be deemed indispensable, the former within that time having been increased about one-half, and the latter one-fourth; though, in making this comparison, it is proper to state that, previous to 1824, all these classes had occasionally been more numerous than they were at that period. But, in relation to the two last classes, no reduction from the estimates of last year is contemplated. It is considered that, on a peace establishment, they ought to possess ample and valuable materials for any sudden or large increase of the higher classes, which any national emergency may at any time require; while nothing is found to prove more injurious to older officers, than to be placed in a condition where no further incentives to improvement by anticipated promotion exist, and where the classes they already fill contain so large a number as to permit many years to elapse without the possibility of putting them all on active duty, unless at the expense, inconveni-

ence, and injury of more frequent changes of the superior officers in stations and squadrons, than the public interests appear to justify.

The whole number of naval officers ar this time, including those under warrants as well as commissions, are about 1,000 and our whole annual expenses of every kind, for their maintenance, is about $850,000, or, on an average, about $850 for each officer. These expenses have not been increased during the last ten years, except what has been caused by the addition before mentioned to the numbers of some classes of officers, and the augmentation in pay in 1827 to passed midshipmen, in 1828 to surgeons and their assistants, and in 1830 to lieutenants. In the mean time, of late years, more useless officers have been placed on half pay, and some large allowances reduced. But no further essential reductions in these particulars can, in my opinion, be effected, without injury either to individual officers or to the naval service. Whatever has been accomplished by myself on this subject, and on the requirement of a more equal portion of laborious duty from all officers of similar rank and date, who were not invalids, has often caused to me much pain; but it has been prompted by a strong sense of the equal justice due to the officers themselves, and of the manifest propriety in this department of seeing that all those under its administration perform services for the public, when practicable, in some degree proportionate to the compensation they receive.

It is hoped that I may not be deemed importunate in once more urging on your attention a topic far more grateful to my feelings. I have long entertained a decided opinion that the compensation to some classes of officers ought to be increased. It is certain that more equal justice would be awarded to all, that services at sea could more easily be obtained, that greater cheerfulness and alacrity in the performance of duty would be evinced, and a higher grade of qualifications in some subordinate stations could be commanded, if the whole subject of pay was revised, and the compensation graduated in a fairer proportion among different ranks in the navy, and to similar ranks in the army; and if there was provision made for a larger and marked discrimination between duty afloat, and leave of absence or waiting orders on shore. Such a discrimination formed a prominent feature in the act of Congress, passed April 21, 1806, and which regulated pay as now established. But that discrimination, amounting to one half of the whole pay, was virtually abolished by a rule of this department in 1819. During the continuance of the small compensation to some classes of officers, and after so long a practice under that rule, with the yearly sanction of Congress, by means of the estimates and corresponding appropriations in conformity to the rule, I have not felt at liberty to alter it. Further details on this subject, at this time, are not deemed necessary, as they have fully and recently been laid before you in a special report from this department, on a resolution of the Senate, passed at the last session of Congress.

The whole number of seamen in the navy, including all the different grades, does not vary much from 5,000; and the annual expenses of their pay, rations, and enlistment, are not far from $1,130,000, or, on an average, about $226 for each seaman. These expenses are small, and indicate great popularity in the service, when we advert not only to our facility in obtaining good seamen, but to the high rate of wages, the last year, in merchant vessels, and to the great cost of this class of per-

sons in the navies of some countries, where labor is generally much lower than in the United States. These expenses have not been increased the last ten years, except by an augmentation of about one third in the whole number of seamen, arising chiefly from an increase of our force in commission. The complement of men to each vessel might advantageously, in some respects, be lessened, and the whole expenses, on account of them, be thus reduced, were it not considered of vital importance, in so small a navy, to have all our ships afloat as perfect as possible in every particular conducive to their efficiency, and to the reputation of the Government. It is expected that a laudable pride will then be felt and encouraged by all connected with the service, on a comparison of the condition of our own ships with those of other nations; and that the moral force of our navy, as a mdoel for a larger one when wanted, as likely to vindicate its country's rights and honor in war, and protect its commerce in peace, will always be much greater with a small number of vessels afloat, built of the best materials and in the best manner, supplied with the most approved equipments, commanded by well educated and well disciplined officers, and navigated by full crews of hardy and contented seamen, with the whole ready on any emergency for immediate and efficient action, than with double the number of vessels half manned, and in other respects defectively provided. Every improvement in our materials, whether timber, cordage, or cannon, in our yards, docks, or harbors, in our hospitals or asylums, will add strength to this moral force, and better prepare us for any future conflict in which the violence or injustice of other nations may involve us.

In connexion with this part of the service, it is deemed proper to present some remarks concerning the condition of the marine corps. The subject of its allowances, in addition to pay, was not specially noticed by Congress the last year; though in that way it has of late been customary to regulate them. But under a belief that the omission probably arose from accident, I have not interferred to revise the difficulties which have so long existed under that head. It will, however, be considered my duty, the ensuing year, to investigate, and attempt to adjust them, if not otherwise provided for.

The commutation of the whiskey part of the ration while the marines are at sea, has been extended to this corps; and the army regulation entirely abolishing that part has been applied to their rations while on shore. The whole expenses of the corps, independent of the erection of barracks and officer's quarters, are yearly about $190,000. The expenditures for such erections, on an average for the last ten years, have been about $5,000 annually. The quarters, authorized at Philadelphia, have been completed; but the comfort and proper accommodation of the men require new barracks at New York. The estimates for this purpose, and for the support of this corps are herewith submitted.

The examination of the state of the pensioners upon the navy pension fund, as those enjoying its privileges, who have been, or are now, in the service, or where connected with those once in it, may also be deemed to come properly under the head of persons attached to the navy. Though the annual expenditures from that fund are about $33 000, yet the fund itself did not spring from the public treasury, except as derived from prizes captured by our public vessels. It was not till lately that its dis-

bursements were classed with the navy expenditures: and now the only yearly expense this fund and its administration here impose on the Treasury, is the portion of time they occupy of the head of this department, and of one clerk. Its annual income now exceeds the annual expenses about $20,000; and, during the past year, rules have been prepared, and the benefits of this surplus extended, as originally contemplated by the act of Congress creating the fund, so as to embrace those officers and seamen who, without being wounded, have during long and faithful services, been visited by infirmities entitling them to relief. Five persons, coming under this description, have been added to the pension list, and are allowed suitable clothing, food, and medical attendance. The number of pensioners, under this and the other provisions, is 298.

The condition of the privateer pensioners, placed under the exclusive administration of this department, has not essentially changed during the year. The fund for their relief, like that for navy pensioners, does not come from the Public Treasury, and its management is no charge upon that treasury, except in the particulars before mentioned. As the whole of this fund was derived from captures by privateers, it has been deemed expedient to exhaust it in the support of those disabled, and of proper persons connected with those whose bravery and enterprise made the captures. It has, therefore, become gradually reduced to $44,667. The annual charge on it at this time is about $3,000, exceeding considerably the annual income, and thus, in due time, carrying into effect the original policy of the system. For further particulars about these two funds, reference can be had to the annexed statements.

On a review of the entire personal branch of our naval establishment, it will be seen that its annual cost, not including the marine corps, is about $2,000,000, and of that sum about $1,964,000 is an annual charge on the public treasury. Considering the size and usefulness of the whole naval establishment, it is believed that this part of it, at the present time, bears a judicious and economical proportion to the whole, except in the particulars heretofore enumerated. Should improvements be made in these particulars, I am satisfied that the number and compensation of the persons employed both on the civil list and in the navy, will be found to be such as to ensure the due care and preservation of the public property, to furnish officers and men sufficient for the present protection of our commerce and rights abroad, and to maintain among all classes a state of discipline and activity indispensable to efficiency in the discharge of ordinary duties, and to a supply of suitable candidates for promotion in the extraordinary exigencies of the future.

The deaths, dismissions, and resignations in the service, since my last report, may be seen in the tables annexed.

When we advert to the other subjects connected with the navy, and more especially to what may be considered as belonging to its materials, it is deemed proper to notice first the employment and condition of our public vessels. Those in commission have consisted of one ship of the line, four frigates, eleven sloops, and seven schooners. They have been distributed as usual on four foreign stations, keeping up a greater intercourse than formerly with the western coasts of Portugal and Africa, and with the adjacent Islands, extending our cruises into various parts of the Indian Ocean, and making the West India squadron act somewhat more

as a home squadron, by requiring a portion of it to visit twice annually some of our Atlantic ports. By properly regulating these visits, much exposure in the two most dangerous months in a tropical climate is avoided, and great facilities are obtained to furnish necessary supplies, to relieve parts of their crews, and exchange officers, as well as to have nearer at hand, during those visits, vessels in commission, which if any emergency should occur, may be despatched at once on any distant or important service. Efforts have been made to relieve seasonably all our vessels which have been more than two years abroad. The Fairfield and Vincennes have been sent to the Pacific to succeed the Potomac and Falmouth; the Natchez and Ontario to the Brazilian station, in place of the Lexington and Warren; the Experiment to the West Indies, in place of the Shark; and the Shark and Delaware to the Mediterranean, in place of the Concord, Boston, John Adams, and Brandywine. In making these changes so early as to prevent the expiration abroad of the service of our seamen, much discontent has been avoided, though this system has necessarily subjected the department to some additional expense, by having occasionally, for short periods, double sets of vessels afloat attached to the same station. But it has enabled us to perform our engagements faithfully with their crews, and to keep up a more regular and constant force on each station for protection. At the same time caution has been taken to guard against an increase of our whole expenditure for the current year beyond the appropriations connected with this subject.

All these squadrons have been actively and efficiently employed, and it gives me great satisfaction to state that our commerce in all quarters of the globe was probably never known to be more free from menaces, danger, or actual violence.

The estimates for the ensuing year are for the same amount of force as was authorized the past year, consisting of about 530 guns, and distributed in such a proportion among vessels of every class belonging to our service, as to combine the greatest efficiency, for naval purposes during peace, with the soundest economy. Few will deem that force either too large or extravagant, when it is considered that our foreign commerce, exposed on the ocean, exceeds $100,000,000 in imports, and almost an equal amount of exports, with vessels exposed in their transportation of over half a million in tonnage, and probably twenty millions in value, and when it is remembered how much the security, not only of those vessels and their cargoes, but of their numerous crews, and of other classes of our citizens resident in some countries abroad, depends upon our navy being actively and widely distributed. On this point it may be well to reflect further how safely that navy enables us, not only to send to new and the most distant markets, and thus to give increased value to the surplus proceeds of our agriculture, manufactories, and fisheries, and to obtain in return whatever may conduce to comfort, improvement, or wealth; but what protection and enhanced worth it confers on most of our immense coasting trade, how much our national reputation abroad is every where known and appreciated by it, the respect it inspires, the security it yields, and the weight it affords in all our claims of justice, and negotiations with semi barbarous nations, and how justly it may be apprehended that new perils will ere long await a portion of our trade, and the tranquillity of a part of our maritime frontier, from the operations of

a new course of legislation by some foreign Powers concerning an unfortunate portion of their population, and against which perils, as well as against the ordinary aggressions and piracies in peace, and much of the depredations which may threaten us in war, the navy, from the insular situation of our country as to most of the world, must always be regarded as our great safeguard.

The facilities for the examination and repair of our vessels have been much increased the past year by the completion, in most respects, of the two dry docks, and the expenses in refitting the classes of larger vessels will thereby become sensibly reduced.

The present policy of this department is to launch no more vessels of the same size with those in ordinary, until the latter are worn out. But it is proposed to build from time to time, and protect on the stocks till wanted, such new vessels as Congress may authorize to be constructed, because in that condition their timber will improve rather than decay, and the expense of taking care of them will be trifling compared with that of vessels in ordinary. This course has been adopted the past year with the Macedonian, now building. It is recommended as sound policy that authority should be given to procure the frame for another sloop to be called the Levant, after the consort so gallantly captured with the Cyane; and the frame for another frigate to be called the Paul Jones, in grateful memory of one of the earliest, bravest, and most distinguished commanders in our naval service during the revolution The estimates for the purchase of these are submitted, ($50,000)

Frames could not be bought for vessels of these names, under any existing laws; and the timber, if procured and seasoned, whether soon set up or not, would become more valuable, being sheltered under either our present excellent sheds or ship houses, and live oak probably becoming scarcer and dearer as our southern frontier is cleared for cultivation.

The vessels in ordinary, and on the stocks as well as the frames for them in depot, have all been examined, and found to be in a good state of preservation, except a few of those in ordinary. Some of these are defective, by their long continuence afloat before being covered, some by their great age, snd some by their original imperfection of their timber. Those unworthy of being refitted, are used at times for receiving ships, and the rest, as wanted, are placed in a proper state to go into commission for the relief of other vessels returning from long cruises, and needing extensive repairs. As vessels afloat grow older, their repairs must of necessity become more expensive. The cost of all repairs of all our vessels the past year has been about $580,000 During the last ten years, the repairs have been on an average about $500,000 annually.

A table showing the vessels in commission, with their commanders and stations, is submitted. The names and condition of those in ordinary and on the stocks may be seen in the documents annexed.

Proceeding from the vessels to the materials used in their construction and equipment, not much has occurred the passed year deserving notice. Some additions of valuable and durable articles have been made to our various stores on hand at the time of my last annual report. All these stores, and especially the timber in the docks and under sheds, are in good condition, and means have been taken to ascertain and supply any deficiency in any article not perishable which may be wanted for the

building and perfect equipment of every vessel on the stocks, and every frame in depot As more timber may be needed, or thought proper to be purchased in advance, our means for the supply of live oak, it being the most important species, have been fully investigated and discussed in a special report to Congress from this department during the last session. Referring to that for detailed information on this point, I would only add that subsequent examinations in some of the then unfinished districts have fully confirmed the impressions entertained concerning the great quantity of live oak timber on portions of the public lands in those districts. In respect to the other kinds of timber needed in shipbuilding, the Government has made little public provision, and doubts exist whether it willbe necessary to make any further puplic provision for its growth or preservation while the prices continue so moderate, and the resources of the country in such timber are likely for many years to remain so very abundant.

The erection of two new magazines where none before existed, is proposed the next season, and an estimate for that purpose is submitted, ($24,000.) Connected with this, a thorough inspection has been made, not only of our present ordnance stores, but, as previously mentioned, of all our arms on hand, with a view to the sale of such as is defective or unsuitable, and to the procurement of what may be found necessary to produce uniformity and the greatest power in our future armaments. The usual sum of about $10,000 has been expended for the purchase of such ordnance and ordnance stores as the current wants of the service required. The buying and manufacture of iron tanks for all our vessels in commission are in rapid progress under the late appropriation for that purpose; and should Congress sanction the making of our own cordage, as heretofore asked, and as now again proposed in the general estimates, the equipment of our vessels would soon become, throughout, all which the friends of the service could desire, for health, safety, efficiency, and national reputation.

After much deliberation, the department has become convinced that the bnilding or purchase of two store ships for the Pacific station, to be used in the transportation and the preservation there of supplies of all kinds, would promote sound economy, and increase the comforts of our seamen. An estimate for the procurement of one tne ensuing year is submitted, ($40,000) We are obliged to pay freight for these supplies, heavy duties either on their being landed or reshipped, and large rent for storehouses. The duties are a burden from which we are almost entirely exonerated under similar circumstances in other quarters of the world. The proposed measure would relieve us from them as well as the other charges, and the store ships, by going out and returning separately and alternately, would afford great facilities to exchange or bring home invalid officers and seamen, without incurring the expense of their passages in merchant vessels from so distant a station.

The construction of two or three small steam batteries, for reasons heretofore recommended, is still deemed highly important to our future interests; and too long delay in making further experiments, and in acquiring further science on this subject, in our naval service, may on the sudden occurrence of hostilities, place us in a position not a little mortifying to our pride, and hazardous to our welfare.

The different navy yards are essential portions of our naval establishment, connected with its materials. The condition of most of them has been improved the past year, either by new buildings for officers' quarters, or new store houses and timber sheds, or new wharves and other conveniences.

The two dry docks at the yards near Norfolk and and Boston having been successfully completed in all essential particulars, the details on that subject will be found in the report annexed. This report shows the whole expenditure the last year, not only on that subject, but on all others under the head of gradual improvement. From the great advantages already realized in the ease and rapidity of repairs in vessels at the yards where these dry docks are situated, I am satisfied that others would be found very beneficial. Surveys were formerly had for two more, one at New York, and one at Portsmouth; and a report in favor of those two was once made and approved in the House of Representatives. Much can be urged in favor of the former place, on account of its central position, and great resources for repairs, stores, seamen, and workmen; and of the latter place, on account of the low price of labor, small cost of constructing a dock, and the easy access to it by vessels of all classes at all seasons of the year. But whether one, or both, or neither, shall be selected at this time, is submitted to the proper authority, on a review of the whole subject It must be obvious that the relative importance of different stations must undergo changes as the capacities of different quarters of the country become more fully developed; and that some places now employed as naval depots can be of very little use on the occurrence of war, while the positions of others, when that event may happen, will greatly increase their usefulness. Among the new places which, on such an occasion, if not earlier, the interests of the country may require the Government to occupy for naval purposes, will undoubtedly be Newport harbor on the north, and one or more positions on the long range of coast to the south, between Norfolk and Pensacola. Whether last selection should be made near Charleston or Savannah, at Key West or the Dry Tortugas, each of which possesses advantages for such purposes, can be better decided when the time and circumstances occur rendering immediate action necessary The continuance of Pensacola, as a naval station seems to me judicious. This opinion arises not only from its convenient position as to the whole Gulf of Mexico, but its proximity to the mouths of the Mississippi and Mobile rivers, whose great and growing commerce is so amply entitled to the best protection. In the depth and size of its bay, in the excellent defences at its mouth, in its healthy situation, in its easy access to all our vessels except of the two highest classes, Pensacola has no prominent rival in that neighbourhood. The correspondence and documents annexed are submitted, to aid yourself and Congress to judge of the practicability and propriety of deepening the entrance to the bay, so as to admit vessels of the largest class. This it is supposed, can be effected at a small expense compared with the importance of such a measure to the full operations of our navy on that coast, and to the greater security and strength of our southern maritime defences.

The exchange of lands at the yard near New York, authorized at the last session of Congress, has been carried into effect. The controverted

claim of the heirs of Mr. Harris to a part of the navy yard near Boston, has once been laid before Congress, and a new action having been instituted by them against the commander of that station, as will be seen by the letter annexed, such course will be pursued in its defence as Congress may be pleased to direct.

Some new pretensions have been set up to different parcels of land included in our possession and purchases at Norfolk, but their justice cannot be recognised on the facts known to the department; and those making them have been informed that no steps can be taken for their adjustment, unless the parties previously obtained the sanction of Congress, or a judgment in their favor by the courts of law.

The expenditures on all the yards the last year, exclusive of the dry docks, but including houses, sheds, stores, wharves, enclosures, workshops, marine barracks, and incidental labor, have been about $360,000. The expenditures on the dry docks are chargeable to a distinct appropriation for gradual improvement, and were about $180 000. The other expenditures under the last head were about $150,000. The estimates for the usual objects at the yards, the ensuing year, are about the average amount for the last two years. Besides those objects, they include an extra sum towards the erection of ropewalks, in conformity with the plan adopted by Congress in 1827, and yet the whole amount requested towards these and all other improvements at all the yards is only $354,000

Immediately connected with the subject of our yards, is that of our naval hospitals and the naval asylum. Under the appropriations lately made by Congress, new hospitals have been commenced near Pensacola, New York, and Boston, on retired and healthy sites, combining great convenience and beauty. The plans of these have been formed on a scale suited only to the present wants of the service, but capable of easy and appropriate enlargement hereafter, whenever our necessities may require it. An additional sum will be needed to finish them in the manner proposed, and to make further progress in the hospital before built at Norfolk. Such expenditures have been made the past year on the latter from the general hospital fund, as could well be spared, and as the comforts of its inmates seemed most urgently to demand. It is much larger than our present necessities require, and therefore it is not proposed to finish the whole interior of it; but the exterior of this hospital is now chiefly completed, and has become one of the most beautiful and useful public buildings belonging to the Government. The naval asylum at Philadelphia has been finished, and partly furnished. But it is much regretted that the department has not been able to obtain a cession of jurisdiction over it without reservations that render the cession wholly nugatory. Besides retaining the usual power in the State to execute criminal and civil process, the reservations subject it to, and it actually is burdened by, the assessment of large taxes, which are paid from the hard earnings of our seamen, and an unlimited right is retained to cut up the property by new streets. Further efforts are now making by the department to obtain relief from these onerous taxes and liabilities, so disadvantageous, if not fatal to the success of this public and charitable institution. Should these efforts fail, all the correspondence and documents in the case will be submitted, in order that such legislation may be had as the whole circumstances connected with the subject shall be thought to require.

The general condit on of the hospital fund may be seen in the statement before referred to.

The ordinary purchases of medicines and surgical instruments for use in hospitals and yards, and in vessels afloat, are included under a specific appropriation, and are about $35,000 yearly The pay and subsistence of the surgeons and assistant surgeons attached to the hospitals, are provided for under the general appropriation for navy officers. The other annual expenses of our hospital establishment, independent of buildings, furniture and repairs, are about $1,000. These are defrayed wholly from assessments on the seamen and officers. From the same quarter come all other resources for the establishment, with the exception of such appropriations as Congress have made, from time to time, to aid in erecting and furnishing buildings These last appropriations have been made but seldom, and have within ten years amounted to a sum which would be on an average about $22,150 annually: and for the same purposes during that period, the fund has furnished, from its annual increase and former accumulations, about $45,000 annually. Should Congress grant what is now asked, more will probably not be wanted for many years. An immediate connexion with the yards, hospitals, and other real estate, belonging to our naval establishment, is the live oak plantation Being situated only seven miles from our most Southern yard, it has the past year been placed under the same general superintendence. The purchase of the land, and the cutting and removal of the underwood and common timber from about 200 acres of the plantation, had been accomplished before the charge of this department was placed in my hands. It seemed to me judicious, in that state of things, to attempt to preserve any benefits aleady attained or fairly anticipated, by continuing to destroy, a few years longer, the annual growth of other wood injurious to the young live oak trees, to trim and train the thriftiest new ones appearing, and to employ merely the leisure of the hands so engaged, in extending this process to more of the land, From 200 acres of land, and 22,000 live oak trees, to which, in 1829, the above system had been applied, it has since 1831 been so continually extended, that the nursery has become enlarged to 225 acres, and includes over 60,000 trees The expense attending this has been about $1,200 a year: but should any considerable portion of the trees ever reach maturity, and attain a size suitable for ships building, the government will be amply repaid. As the trees grow larger, the annual expense concerning the same number will rapidly diminish. Doubts exist whether some of them, from the poverty of the soil, and their apparently dwarfish character, will ever attain a valuable size. But it is now too early for forming a decisive opinion on the extent to which the operations of these causes may affect the whole plantation: and, under existing circumstances, sound policy appears to require that the experiment, having gone so far, should be allowed a further and full trial The nearness of the plantation to the Pensacola yard, and to water transportation, enhances much the value of any timber it may produce. Lately, I have not only placed this land under the general superintendence of the commander of that yard, but required his particular and constant vigilance over the live oak reservations in all that region of country.

The whole agencies, heretofore connected with our live oak, have, as

before suggested, been discontinued; all the districts, except small portions of two, having been explored as fully as is deemed useful till the surveys of the land into townships and sections shall be completed. As fast as they may be completed, arrangements have been made for additional reservations of public land, on which live oak has been ascertained to abound; and the prospect of a sufficient supply of that kind of timber in future is flattering, if that on private lands, as these are wanted to be cleared for cultivation, be, from time to time, purchased at moderate prices, and placed in depot for the frames of vessels specially authorized or collected under the head of gradual improvement. On this whole subject, I have so recently and at such length submitted to Congress, the views of this department, that further observations here are not deemed necessary. (See report on live oak to House of Representatives, December 14, 1832.)

Some miscellaneous matters connected with the navy deserve a brief notice. The usual attention has been bestowed on the suppression of the slave trade. The colony of Liberia has been visited by the schooner Porpoise, while in pursuit of a piratical vessel; and which vessel, it is gratifying to add, is supposed to have been since captured by a British brig, and her criminal career terminated near the island of St. Thomas, on the coast of Africa. One-half of the usual appropriation on the subject of the slave trade will probably be sufficient for the ensuing year, as may be seen by the state of the account herewith submitted.

The renewal of an appropriation for the relief of Alexander Claxton, made in May, 1830, has become necessary, in consequence of its having been transferred to the surplus fund before all the persons entitled to it were able to procure the necessary vouchers. The proceedings of the Board appointed under a resolution of Congress to revise the naval regulations, will be soon submitted in a separate report.

The survey of our seacoast having been placed in charge of the Treasury Department, it is not in my power officially to state its progress; but officers have been detailed, and all available facilities provided, whenever the wishes of those superintending the subject have been communicated.

Some expenses under the contingent appropriation for enumerated objects, have not been included under any of the amounts already mentioned; but they belong to courts martial, to pilotage of vessels, to transportation of materials, to the purchase of charts and books, and various other small items, forming an aggregate of about $80,000.

On a review of the whole affairs of this department, it appears that its expenditures, on all naval subjects, the past year, have been somewhat less than four millions of dollars. It will be seen how this result compares with former periods, by adverting to the fact that, during the last twenty years, these expenditures, except during five years of that time, have never fallen so low as three millions; and, except during six years of that time, have never exceeded four millions. The whole estimates made the past year for the general wants of what is technically considered the navy, were only $3,176,766. Those for the year previous were $3,227,383. Those for the present year are $3,292,224. But it is to be remembered that, under the head of naval expenditures, besides what is paid from the amount voted on the annual naval estimates, it is custom

ary to class what is paid from half a million appropriated for a term of years to gradual improvement; almost $200,000 for the marine corps; the payments from the navy pension, hospital, and privateer pension funds; and several miscellaneous sums voted by Congress on motions, resolutions, and petitions; and part of which sums, though charged under this head, have little or no concern with our naval establishment. On the contrary, some of the expenses connected with the administration of the department at this place are included in the general appropriation bills for the support of Government, and are not usually classed under the head of naval expenditures.

It is a high gratification to be able to state that, since 1827, nearly half a million a year has been disbursed for gradual improvement: that within ten years a larger number than formerly, of seamen and officers, with increased pay to four classes of the latter, have been maintained; very great and valuable improvements, besides the dry docks, have been begun and accomplished at many of the yards; and our force in commission considerably augmented; and yet that all our ordinary naval expenditures are, and probably can be kept within four millions of dollars annually.

The smaller appropriations originally made for the navy, served to maintain the few officers and seamen then employed, and supplied us with several fine vessels, four of which are still in existence The subsequent appropriations on a more extended scale, besides supporting the current expenses of our force in its infancy, furnished the purchase money for most of our present yards, and defrayed the expenses of our brilliant hostilities with France, and afterwards with Tripoli; till, a few years of comparative inactivity having ensued, the commencement and progress of the last war with England led to a great addition to the naval establishment, and to expenditures much larger than at present. The liberal appropriations that were continued for some years after that war, aided in laying a good foundation for the gradual increase of the navy, and helped to build not only many of the vessels now in commission and ordinary, but most of those upon the stocks The appropriations for some years past have been similar in amount, and have enabled the department to enlarge its policy, and widen the sphere of its operations. Besides building some additional vessels, and defraying all the current expenses of an increased force, both personal and material, it has been able to erect hospitals, to construct dry docks, to improve greatly the old yards, to add and maintain a new one on our southern frontier, and to collect in depot a large amount of valuable stores as a part of the due preparation in peace for the various contingencies of war. With a careful regard to system and economy, and with strict accountability in agents and officers, this policy can long be pursued and extended without making the ordinary annual demands for this branch of the service often exceed four millions: and if, without essential changes by Congress, increasing our present expenses, and without any unforeseen and extraordinary wants, our fiscal operations can usually be confined within that amount yearly, it is confidently hoped the naval establishment will not be considered wasteful or burdensome beyond its benefits to the country.

In disbursing between three and four millions the past year, it is not known that a single instance of any loss has occurred

The balances on hand, unexpended, are about $1,400,000, but most of them will probably be wanted to close the different accounts, on all the different subjects, when finally adjusted. Connected with our financial concerns, is one other circumstance of urgent importance. The period of time at which the annual appropriations for this branch of the service are usually made, is a source of great inconvenience and injury. The estimates and appropriations are known generally not to extend beyond the current year; consequently, it happens that, after the 1st of January, there is nothing on hand under some heads to meet the daily demands of the service, amounting on an average to $10,000 per day, unless a new appropriation has been made, or there happen to be some balances of the former year not called for. Under some heads such balances always exist, because some disbursements, by means of absence, distance, and other causes, are not completed within the year. But they seldom exist under other important heads, and ought not to, if the accounts are seasonably settled and the estimates were accurate, and the appropriations, as is usual, conformed to the estimates. The power now vested in the President to transfer a balance from one appropriation to another, is confined to certain classes of claims, small in amount, and hence as to all others no transfer can legally be made; and, if no balance remain at the end of the year, and the new naval appropriation bills have not passed, payment is entirely stopped, or the whole operations of this department dependent on them are suspended. Considering how large a part of these operations and of our expenditures necessarily takes place in distant quarters of the world, it will be seen that the embarrassment in this branch of the service must often be peculiar and aggravated. In the case of bills of exchange drawn abroad, chargeable to the appropriations already exhausted, the public faith, under the above circumstances, is sometimes in danger of being violated; our credit in foreign countries becomes injured; and the Treasury, as actually happened during the last winter, is exposed to large losses, if the holders choose to resort to protests and claims for the mercantile rate of damages.

Under the present system of passing so late the naval appropriation bills, it happens that, unless money voted under one head, is without authority as was once the practice, applied under other heads, this unfortunate condition continues in every short session of Congress about two months, and every long session about four months. It can easily be remedied in two methods: one of them is, to make, previous to the 1st of January, new appropriations for a quarter or half of the year towards all permanent objects. By limiting them to such a time and to such objects, and by taking the estimates of the former year as a guide, no inconvenience will interpose, and no error can occur, which may not be readily corrected when the residue of the appropriations for the whole year is voted at a later period in the session. Another mode is, to authorize the President to make necessary transfers from one head to another, in all cases where the new naval appropriation bills do not pass by the commencement of the year, and to require from him a report to Congress of the amount and causes of such transfers. If the authority be thus restricted, it is difficult to discover any danger likely to result from its exercise; and it is believed that the surplus or balances on hand under some of the appropriations would usually prove sufficient to supply the wants

under others. The detail and earnestness with which legislation on this subject is now urged, must find their excuse in my strong convictions that no measure whatever, requiring, like this, no increased expenditures, could be more conducive to the reputation and efficient operations of our naval establishment. Thus, sir, under an examination of its central administration, of its personal, or civil and navy list, of its materials, with the appurtenants thereto, and of its miscellaneous concerns, I have submitted a review of all its transactions and expenditures during the past year, that possess any degree of importance. This has been accompanied by suggestions for such improvements as observation and reflection have convinced me might be useful; and should they meet with the approbation of yourself and Congress, I look forward with confidence to a long continuance of prosperity in the affairs connected with this department. With great respect, yours, &c. LEVI WOODBURY.

VESSELS IN ORDINARY.

Names, distribution, and condition of the vessels of the Navy in ordinary, 1st November, 1833.

AT PORTSMOUTH, N. H.

Concord, sloop of war, requiring slight repairs.

AT CHARLESTOWN, MASS.

Columbus, ship of the line requiring moderate repairs.
Independence, ship of the line, requiring a thorough repair.
Constitution, frigate, undergoing a thorough repair.
Erie, sloop of war undergoing a thorough repair.
Boston, sloop of war, requiring considerable repairs.

AT BROOKLYN, N. Y.

Ohio, ship of the line, requiring extensive repairs.
Washington, ship of the line, requires thorough repairs.
Franklin, ship of the line, requires thorough repairs.
Hudson, frigate, requires rebuilding.
Brandywine, frigate, has just been coppered, and is nearly repaired for sea service.

AT PHILADELPHIA.

Cyane, sloop of war, to be replaced.
Warren, sloop of war, just arrived, requires slight repairs.
Sea Gull, unfit for repairs.

AT GOSPORT, VA.

North Carolina, ship of the line, requires considerable repairs.
Java, frigate, to be replaced.
Guerriere, frigate, requires extensive repairs.
Congress, frigate, requires extensive repairs.

VESSELS ON THE STOCKS.

Vessels building at the several Navy Yards under the law of the gradual increase of the Navy.

At *Portsmouth*, N. H. one ship of the line. One frigate. At *Charlestown*, Mass. two ships of the line. One frigate. At *Brooklyn*, N. Y. two frigates. At *Philadelphia*, one ship of the line. One frigate. At *Washington*, one frigate. At *Gosport*, one ship of the line. One frigate. All these vessels are under cover, and in a good state of preservation

There is building, at the navy yard, Gosport, a frigate of the second class, to replace the Macedonian, condemned and broken up under a special act of Congress.

Statement showing the progress made under the law for the gradual improvement of the Navy.

Frames of live oak have been delivered at the different navy yards, as follows:—

For two ships of the line, two frigates, and one sloop of war, at Charlestown, Mass.

For one frigate, at Brooklyn, N. Y.

For two frigates and one sloop of war, at Philadelphia.

For one frigate and one sloop of war, at Washington.

For two ships of the line, one frigate, and one sloop of war, at Gosport, Va.

Contracts for the frame of a frigate and sloop of war, at Portsmouth, have been made, but a small part only has been delivered; and upon a contract for the frame of ship of the line, at Brooklyn, N Y. none has been delivered.

Total quantity of live oak received, cubic feet . .	365,435
There is also on hand, at the different navy yards, belonging to this appropriation, of white oak plank, board measure .	206,837
White oak timber, cubic feet	198,652
Yellow pine timber, for plank, cubic feet . . .	188,204
Yellow pine, mast and spar timber, do. . . .	44,560
White oak knees, in number	5,500

There have also been built, from this appropriation, at the different navy yards, for the preservation of timber, *five substantial timber sheds.*

Of the dry docks authorized under this apporpriation, that which was constructed at Charlestown, Mass. was so far completed on the 24th June last, as to receive the frigate Constitution for repairs. It is now completed. The total cost, including the engine and pump h use, which will be available for other useful purposes, and all other incidental expenses, has been $677,089 78⅛ The cost in detail is shown in the annexed Table. That which was constructed at the navy yard, Gosport, was so far completed on the 17th of June last, as to admit the ship of the line Delaware, and subsequently the North Carolina.

The only objects yet unfinished are the floating gate, necessarily delayed to admit the above mentioned ships, and to deepen the entrance a little from the channel to the gate. The expenditures to the 31st of October were $943.676 73, and the engineer estimates that it will require $7,000 to complete it. This, as at Charlestown, includes the engine and pump house, and all other incidental expenses. It is expected it will be finally completed in the course of the present year. The detailed expenditures on this dock, are exhibited in the annexed Table From the test given by the actual occupation of both docks, the Board feel confirmed in the opinion that they are constructed in the most substantial and durable manner, and will prove highly useful to the nation, and permanent testimonials of the ability and attention of Col Baldwin, the superintending engineer.

About $150,000 have been expended for the purchase and reception of timber, and for the preservation and cultivation of live oak timber.

Statement of the Total cost of the Dry Dock at Boston, Massachusetts.

NAVY PENSIONS.

Number of Pensioners on the Navy Pension roll from each State, respectively, other than those authorized to be placed upon it by the act of 28th June, 1832.

Maine	9	Maryland	23
Massachusetts	56	District of Columbia	13
Rhode Island	8	Virginia	25
Connecticut	6	Ohio	2
New Hampshire	9	Kentucky	1
New York	79	South Carolina	2
New Jersey	1	Louisiana	2
Pennsylvania	38	Missouri	1
Delaware	2	Total	277

Number of Pensioners on the Navy Pension roll under the act of 28th June, 1832.

Maine	1	District of Columbia	1
Massachusetts	2	Virginia	3
New York	4	Georgia	1
Pennsylvania	3		
Maryland	1	Total	16

The number of pensioners under the act of 23d April, 1800, for long and faithful services, is, from New Jersey 1; Pennsylvania 2; Maryland 2. Making the whole number of pensioners on the roll 298.

The number of Pensioners on the Privateer Pension roll is—From the State of Maine 3; Massachusetts 15; New York 9; Pennsylvania 1; Maryland 5. Whole number at this time on the roll 33.

An ACT for the relief of Widows and Orphans of the Officers and Seamen who were lost in the United States' Schooner, the Sylph. [*Approved, March* 2, 1833.]

Be it enacted by the Senate and House of Representatives of the United States of America, in Congress assembled, That, the widows, if any such there be, and in case there be no widow, the child or children, and if there be no child, then the parents or parent, and, if there be no parent, then the brothers and sisters, of the officers and seamen who were in the service of the United States, and lost in the schooner Sylph, shall be entitled to, and receive, out of any money in the Treasury not otherwise appropriated, a sum equal to six months' pay of their respective deceased relatives aforesaid, in addition to the pay due to the said deceased on the fifteenth day of August, one thousand eight hundred and thirty-one, to which day the arrears of pay due the deceased shall be allowed and paid by the accounting officers of the Navy Department.

Officers and Crew of Sylph, Foundered at Sea, August 15, 1831.

H. E. V. Robinson, Lt. Commanding	Samuel Abbott, Seaman
Wm. C. Selden, acting Lieutenant	John Maccabee, Seaman
John A. Coyle, Midshipman	John Bland, ordinary Seaman
L. W. P. Summers, Midshipman	Thomas Barrott, ordinary Seaman
John Holmes, Seaman,	Charles Burrows, Boy
William Barnes, Seaman	Alfred Hearsey, Boy
John Chears, Seaman	James Bell, Cook
John H. Rosche, Seaman	

An Act in addition to the Act for the gradual improvement of the Navy of the United States.

Be it enacted by the Senate and House of Representatives of the United States of America, in Congress assembled, That for the gradual improvement of the Navy of the United States, the sum of five hundred thousand dollars, out of any money in the Treasury not otherwise appropriated, be, and the same is hereby appropriated, annually, for six years, from and after the third day of March, eighteen hundred and thirty-three, when the present appropriation expires.

SEC. 2. *And be it further enacted,* That the President of the United States be, and he is hereby, authorized and empowered to cause the aforementioned appropriation to be applied, as directed and prescribed by the act of the third of March, eighteen hundred and twenty-seven, to which this is in addition, the provisions whereof are hereby, continued in force for the term abovementioned, and to be applied also to the purchase of other necessary materials as well as timber suitable for the construction of vessels of war.

SEC. 3. *And be it further enacted,* That, in addition to the provisions now in force on the subject of the live oak growing on the public lands, it shall be the duty of all collectors of the customs within the Territory of Florida, and the States of Alabama, Mississippi, and Louisiana, before allowing a clearance to any vessel laden in whole or in part with live oak timber, to ascertain satisfactorily that such timber was cut from private lands, or, if from public ones, by consent of the Navy Department. And it is hereby, made the duty of all officers of the customs, and of the land officers within said Territory and States, to cause prosecutions to be seasonably instituted against all persons known to be guilty of depredations and or injuries to, the live oak growing on the public lands.

[*Approved March* 2, 1833.]

An act to amend an act entitled "An act supplementary to the act for the relief of certain surviving officers and soldiers of the revolution."

Be it enacted, &c. That the second section of the act entitled, "An act supplementary to the act for the relief of certain surviving officers and soldiers of the revolution," approved June 7, 1832, shall not be construed to embrace invalid pensioners; and that the pensions of invalid pensioners shall not be deducted from the amount receivable by them under the said act. (See Vol. XI. p. 232.) [*Approved February* 9, 1833.]

Resolution in relation to the execution of the act supplementary to the Act for the relief of certain surviving officers and soldiers of the revolution." (*Vol. XI. p.* 232.) [*Approved March* 2, 1833.]

Resolved, &c. That in the execution of the act supplementary to the act for the relief of certain surviving officers and soldiers of the Revolution," approved June 7, 1832, wherever it shall be made to appear that any applicant for a pension under said act, entered the army of the Revolution in pursuance of a contract with the Government, made previous to April 11, 1833, and continued in service until after that period, it shall be the duty of the Secretary of War to compute the period of any such applicant's service, from the time he then entered the army, and until the date of the definitive treaty of peace, and to allow him a pension accordingly.

Statement exhibiting the Amount expended during each year from 1789 *to* 1831 *under the following heads, on account of the Naval Establishment of the United States, viz.*

I Pay Rations, and Clothing.
II. Repairs of Vessels.
III Contingent Expenses.
IV. Building Ships. Preserving and Procuring Timber, Guns, and permanent equipments;—(including the whole expenditures on account of the Navy up il 1831, inclusive.)
V. Marine Barracks, Docks, Rail Ways, and Navy Yards.

REPORT OF THE POSTMASTER GENERAL.

GENERAL POST OFFICE DEPARTMENT, *Nov.* 30, 1833

To the President of the United States:

SIR: When, in 1829, the functions of this department devolved upon me, the annual transportation of the mail amounted to 13,700,000 miles. The contracts then in existence, with the other expenses of the department, had, within the year ending the 30th June, 1829, diminished its surplus revenue $101,256 03; and those contracts were still in force from one to four years in prospect.

The surplus available revenue had been reduced to the nominal amount of - - - - - $230,849 07

But it has subsequently been ascertained, that there had been expenses incurred for transportation performed prior to the 1st July, 1829, which were not embraced in that account, to the amount of - - - - 64,248 76

Which reduced the real surplus to - - $166 600 31

The annual transportation of the mail was, on the 1st July, 1833, 26,854,485 miles.

The annual amount of the transportation of the mail in stages and steamboats, on the 1st of July, 1829, was 6,507,818 miles

The annual amount of the transportation of the mail in stages and steamboats, on the 1st of July, 1833, was 18,322,576 miles

The expense of transporting the mail for the year ending 30th June, 1829, was $1,153,646 21.

The expense of transporting the mail for the year ending 30th June, 1833, was $1,894,688 08.

The gross amount of postages constituting the revenues of the department, was, for the year ending 30th June, 1829, $1,707,418 42.

The gross amount of postages for the year ending 30th June, 1833, was $2,616,538 27

The incidental expenses of the department for the year ending 30th June, 1829, amounted to $69,249 08.

The incidental expenses of the department for the year ending 30th June, 1833, amounted $87,701 61.

The number of post offices in the United States on the 1st of July, 1829, was 8,004.

On the 1st of July, 1833, the number of post offices in the United States was 10,127.

The increase of the annual transportation of the mail within the four years ending the 30th June, 1833, is 13,154,485 miles, nearly equal to the whole amount of transportation in 1829.

The increase of the annual amount of postages within the same period is $909,119 85, and the whole amount is more than the double of what it was in 1825

The average expense of transporting the mail in 1829, was eight cents and four tenths of a cent per mile.

The average expense of transporting the mail in 1833, is seven cents and fifty-seven hundredths of a cent per mile; making a difference in the rate per mile, of eighty-three hundredths of a cent, equal, for the whole

service, to $222,892 22 per year less, in proportion to the service performed, than the expense of transportation in 1829, besides a great increase in expedition between the principal commercial cities, and a much greater proportion of the whole performed in stages.

After carrying into effect the law of the last Congress establishing new mail routes, the present length of mail roads in the United States, amounts to 119,916 miles, viz:

Maine.. ... *miles* 3,824	Maryland ..*miles* 2,102	Tennessee....*miles* 6,761
New Hampshire..2,460	Virginia.... 10,589	Kentucky.... 5,993

Total. miles	17,693,839	628,737	8,531.909	26 854 485

The increase of transportation from the 1st July, 1832, to the 1st July, 1833, has been,

In stages,	1,471,096	miles.
In steamboats,	129,436	miles
On horse back and in sulkies,	1,628.932	miles.
Making together,	3,229.464	miles.

The method in which the accounts of the expenses of transporting the mail have always been kept in this department, has led to a misapprehension of the means of extending improvements in mail facilities It appears from the earliest records of the department, to have been a rule not to enter to the credit of a contractor, nor to charge to the account of transportation the expense of carrying the mail on his route, till after he had signed his contract and bond, and returned them to the department with proper security, though the service may have been regularly performed, and in many instances the moneys actually paid. It has sometimes happened that contracts of the greatest magnitude have, from various causes, remained for more than a year unreturned. In such cases though the expenses have been incurred, they do not appear in the transportation account, and though the moneys may have been paid to the contractors, they stand on the books as balances to that amount due from them to the department, constituting a part of its surplus fund ; when, in fact, they constitute a part of the actual expense incurred for the transportation of the mail. The consequence has been, that the expenses for transporting the mail within any given period of time, as shown in the accounts, and reported annually through the Executive, have been always calculated to exhibit an amount considerably less than what has actually been incurred. This is an imperfection not of recent origin, but one which appears to have been coexistent with the department. When the number of contracts was few, and the surplus revenue bore a large ratio to its whole annual amount, the effect was unimportant ; but in the increased number of mail routes, and the diminution of its surplus revenue, it was calculated to produce serious inconvenience From the statements growing out of this system, thus illusory in their results, together with the great expense of carrying into effect the law of the last Congress establishing new mail routes, and a disposition to gratify the wishes of the public in the improvement of mail facilities, I was led to carry those improvements to an extent which it was found the resources of the department would not well sustain.—When the inconvenience was felt, the cause was carefully investigated, and the following result was disclosed. Prompt directions were given for the correction of the error in future. It is not possible to determine, to an exact certainty, the whole expense incurred for transportation within any recent period ; because it will often happen that improvements will become necessary, even for the fulfilment of existing laws, the expenses of which, for want of proper evidence, must be reserved for subsequent adjustment, and so come into the account for a later period than that in which the services were performed. But these variations are of an inconsiderable amount compared with the differences resulting from the system heretofore observed.

On the 30th of June, 1829, which was the close of the first quarter in which I had assumed the functions of the department, the expenses which

had been incurred for transporting the mail were $64,248 76 more than the amount stated in my report to that day

On the 1st day of July, 1832, the day to which my last report reaches, there was stated to be a surplus of available funds, after defraying all the expenses of the department up to that day, of - - $202.811 40

It is however now ascertained, that the expenses incurred for transportation which had actually been performed prior to the 1st July, 1832, beyond the amount stated in that report, were - - - - - 205,656 07

So that, instead of a surplus on that day, the department was actually indebted on the 1st day of July, 1832, beyond the whole amount of its available funds, admitting that no losses of postages should be sustained, - 2.844 67

The gross amount of postages for the year ending the 30th June, 1832, was - - - - - 2,258,570 17

The gross amount of postages for the year ending the 30th of June, 1833, was - - - - 2,616,538 27

Making an increase for the year over the former year of $357,968 10

The nett proceeds of postages, after deducting commissions to postmasters and the contingent expenses of their offices, for the year ending the 30th June, 1832, was - - - - $1,543.093 49

For the year ending June 30, 1833, it was - 1,790,254 65

Making an increase of nett proceeds for the year, of $247,156 16

The expenses of the department, incurred for the year ending June 30, 1833, were as follows, viz.

Compensation to postmasters, including the contingent expenses of their offices—

3d quarter, 1832, - -	$202.431 26	
4th quarter, 1832, - -	200,151 51	
1st quarter, 1833, - -	214,935 50	
2d quarter, 1833, - -	208,765 35	
		$826,283 62
Transportation of the mail—		
3d quarter, 1832, - -	435,892 95	
4th quarter, 1832, - -	441,183 01	
1st quarter, 1833, - -	499,185 96	
2d quarter, 1833, - -	518,426 16	
		1,894,688 08
Incidental expenses for the year - - -		87,701 61
Making together, - - - -		$2,208,673 31
The gross amount of postages for the same period was—		
3d quarter, 1832, - -	642,689 22	
4th quarter, 1832, - -	630,464 47	
1st quarter, 1833, - -	673,957 67	
2d quarter, 1833, - -	669,426 91	
		2,616 538 27
Leaving a deficit of - - - -		192,135 04

Brought Forward, - - - -		$192,135 04
Add this sum paid into the Treasury by irregular deposites, having been placed by the receiving officer to the credit of that department instead of this, -		223 69
The balance due by the department on the 1st July, 1832, as above stated. - - - -		2,844 67
And the department was indebted on the 1st July, 1833, beyond the amount of available balances due to it, in the sum of - - - - -		$195,208 40
The annual expense of transporting the mail under existing contracts, with all their improvements, is -		$2,033,289 42
The incidental expenses of the department, estimated at		90,000 00
Making the aggregate expense for a year - -		$2,123,289 42
The net proceeds of postages for the year ending the 30th June, 1833, amounted to -	$1,790,254 65	
The nett increase for that year over the preceding year, and which may be safely estimated as continuing, was - -	247,156 16	
Making the nett revenue for the current year -		$2,037,410 81
Leaving a deficit of - . - -		$85,878 61

The former method of keeping the accounts of the expenses of transportation would have left out of this report expenses for transportation, as if they had not been incurred, because not entered under their proper dates, the sum of $91,658 82, viz.

For services performed prior to July 1, 1832,			-	22,294 44
For services performed during	3d	quarter, 1832,	-	9.420 50
Do	do	4th quarter, 1832,	-	9,932 21
Do	do	1st quarter, 1833,	-	22,872 70
Do	do	2d quarter, 1833,	-	27,138 97
Making, together,		- - - -		$91,658 82

This, had the imperfection of that system remained unobserved, would have made the department appear to be less indebted, by that amount, than what it is in reality.

The discovery of the excess of expenditures beyond its revenues, at once showed the necessity of retrenchment.

The only practicable means of doing this, was the withdrawal of some of the improvements which had been made, and on such routes as would be least injurious to the public, and least prejudicial to the revenues of the Department.

This has been done with great care and attention to these two points The reductions have been directed on the transportation to take effect from the 1st of January next, to the annual amount of - - - - $202,370

The contracts have been renewed for the southwestern section, comprising the States of Louisiana, Mississippi, Alabama, Tennessee, Missouri, Illinois, and Indiana, and the Territory of Arkansas, with a greater amount of improve-

Brought Forward, - - - -	$202,370
ments than curtails, at an annual saving of - -	71,893
Making together an annual retrenchment in the expenses of the department, of - - - -	$274 263

In making these retrenchments, many of the principal contractors who were to be affected by them, seeing the necessity which induced the measure, have readily declared their cordial acquiescence in it; and with a patriotic spirit becoming their character, have shown a determination to sustain the department, as a paramount object, at any sacrifices which it may require on their part.

After the reductions shall take effect, the annual transportation of the mail will still be 25.527.957 miles, viz.

STATES.	In stages.	In steam-boats.	Horseback and sulkies.	Total.
In Maine.....	635,402	3,328	271,274	910,004
New Hampshire	622,238	-	111,854	734.092

Pennsylvania....	2,080 929	-	764,329	2,845.258
Delaware.....	104.010	-	17,264	121,274
Maryland	570,726	58,380	161,588	790,694
Virginia	1,044,246	46,900	778,906	1,870,052
North Carolina..	733.423	15,288	413,660	1,162,371
South Carolina.	602.256	-	275,548	877,804
Georgia	278,024	-	498.626	776 650
Florida	47,112	41,600	86,612	175 324
Alabama	429,978	96,360	353,652	879,990
Mississippi.... ..	78.002	-	282,756	360.758
Louisiana.....	48,516	15,704	156.676	220,896
Arkansas	- -	-	231,556	231,556
Tennessee.....	513,453	-	502,320	1,015 773
Kentucky.....	586,992	45,000	526,824	1.158,816
Ohio.....	1,005,369	47,150	617,358	1,669.877
Michigan..	112.088	-	97,416	209,504
Indiana	196,268	21,000	487.814	705,082
Illinois.....	236,522	-	293,278	529,800
Missouri	79,508	-	184,184	263,692
Total miles	16,400,651	587,137	8,540,169	25,527.957

Thus, it will appear, that but part of the improvements will be withdrawn to enable the department still to rely exclusively on its own resources, as the annual transportation will still be, after the 1st January next, 1,902.936 miles more than it was on the 1st July 1832.

I have the honor to be, very respectfully, Your obedient servant,

W. T BARRY.

REPORT OF THE SECRETARY OF THE TREASURY ON THE STATE OF THE FINANCES.

TREASURY DEPARTMENT, *December* 17, 1833.

In obedience to the directions of the "Act supplementary to the act to establish the Treasury Department," the Secretary of the Treasury respectfully submits the following report.

1. OF THE PUBLIC REVENUE AND EXPENDITURES.

The receipts into the Treasury, from all sources during the year 1831, were		$28,526,820 82
The expenditures for the same year, including payments on account of the public debt, were		$30,038,446 12
The balance in the Treasury on the 1st of January 1832, was		$4,502,914 45
The receipts from all sources during the year 1832, were		31,865,561 16
Viz:		
Customs,	$28,465,237 24	
Lands,	2,623,381 03	
Dividends on bank stock,	490,000 00	
Sales of stock in the Bank of the United States	169,000 00	
Incidental receipts	117,942 89	
Making, with the balance, an aggregate of		$36,368,475 61
The expenditures of the same year were		34,356,698 06
Viz:		
Civil list, foreign intercourse, and miscellaneous	$4,577,141 45	
Military service, including fortifications, ordnance, Indian affairs, pensions, arming the militia, and internal improvements,	7,962,877 03	
Naval service, including the gradual improvement of the Navy,	3,956,370 29	
Public debt,	17,840,309 29	
Leaving a balance in the Treasury on the 1st of Jan. 1833, of		$2,011,777 55
The receipts into the Treasury during the first three quarters of the present year are estimated at	$24,355,317 95	
Viz:		
Customs,	$21,256,039 77	
Lands,	2,219,957 35	
Dividends on bank stocks	474,935 00	
Sales of stock in the Bank of the United States	91,000 00	
Third instalment under the convention with Denmark	221,315 17	
Incidental receipts	91,970 66	
The receipts of the fourth quarter are estimated at	$7,675,000 00	
Making the total estimated receipts of the year		$32,030,317 95
And, with the balance on the 1st of January, 1833, forming an aggregate of		$34,042,095 50

The expenditures for the first three quarters of the present year, are estimated at $18,248,388 15—Viz:		
Civil list, foreign intercourse, and miscellaneous, including $667,160 87, duties refunded under the 3d section of the act of 2d March, 1833, and $661,160 95 awards under the convention with Denmark -	$4,951,462 84	
Military service, including fortifications, ordnance, Indian affairs, pensions, arming militia, and internal improvements -	9,950,349 29	
Naval service, including the gradual improvement of the Navy - - -	3,076,051 39	
Public debt - - -	270,524 63	
		18,248,388 15
The expenditures for the fourth quarter, including $2,301,716 36, on account of the public debt, are estimated, on data furnished by the respective departments, at -		$6,409.916 45
Making the total estimated expenditures of the year -		$24,658,304 60
And, leaving in the Treasury on the 1st of January, 1834, an estimated balance of - - - -		$9,383,790 90

This balance, however, includes the funds, estimated at $1,400,000, heretofore reported by this department, as not effective.

The appropriations remaining unsatisfied at the close of the year are estimated at $5,964,571 23, but of this amount it is estimated by the proper departments—

1. That the sum of $5,190.287 62 only will be required for the objects for which they were appropriated :—

2 That the sum of $449,424 04 will not be required, and may, therefore, be considered as an excess of appropriation, and is proposed to be applied, without being re-appropriated, in aid of the service of the year 1834, as will more fully appear when the estimates of the appropriations for that year are presented.

3. That the sum of $324,859 57 will be carried to the surplus fund either because these moneys will not be required for, or can no longer be applied to, them.

2. OF THE PUBLIC DEBT.

Notice has been given of the intended reimbursement of the residue of the exchanged 4½ per cent, stock on the 1st of May, 1834. This stock was subject to redemption, at the pleasure of the United States, at any time after the 31st of December, 1833, upon six months' public notice of such intended reimbursement. The time at which the notice was given, does not enable the United States to insist on reimbursing it so as to stop the interest before the 1st of May, 1834. A small portion of it was, however, purchased for the United States, in the months of September and October, by an agent employed for that purpose; and on the same day that notice was given of the intended reimbursement, on the 1st of May next, an offer was made to the holders, by public advertisement, to pay them the whole amount of the principal, with interest to the day of payment, upon their making the proper transfers of the certificates Many of the holders have already accepted this offer, and portions of it continue almost daily to be presented for payment. It is believed that the greater part, if not the whole of this stock, will be redeemed by the end of the present year. Under these circumstances, it seemed proper to charge the whole amount to the expenditures of the present year, rather than to the next. The account is accordingly stated on this

principle, and the interest calculated to the 1st of January; and if a part of it should not come in by that time, it will make no material difference in the result, because the interest saved upon the stock paid before the end of the year will, it is expected, be equal, or nearly so, to the amount of interest which may afterwards accrue on the portion remaining unpaid. And if the whole of it should be reimbursed within the present year, the interest saved will increase the estimated balance in the Treasury in but a very small degree. In the following account, therefore, the whole of this stock is charged to the expenditure of 1833, and the interest on it calculated as if it would be reimbursed on the 1st of January, 1834.

The disbursements on account of the public debt during the year 1833, will amount, as has already been shown, to		$2,572,240 99
Of which there will have been applied to the payment of the principal	$2,240,950 80	
And to interest	331,290 19	

The stocks which will have been redeemed, by the application of this sum, during the year, are as follows:

The residue of the exchanged four and a half per cent. stock, issued under the act of the 26th May, 1824	$2,227,363 98
A part of the 5 per cent. stock issued under the act of 3rd March, 1821	13,036 01
Also, certain portions of the old registered debt, which have been presented for payment; being part of the unfunded debt of the revolution,	50 81
And Treasury notes	500 00

On the 1st of January next, it is estimated the public debt will be reduced to $4,760,082 08 Viz:

1. The funded debt, consisting of the residue of the 5 per cent stock issued under the act of 3rd March, 1821, and redeemable after 1st January, 1835		$4,722,260 29
2 The unfunded debt, amounting to		37,821 79
Consisting of the registered debt, being claims regist red prior o the year 1798, for services and supplies during the revolutionary war	$27,476 70	
Treasury notes issued during the late war	6.025 00	
And Mississippi stock	4,320 09	
		4,760.082 08

These three last sums, composing the unfunded debt, are payable on the presentation of the certificates.

3. OF THE ESTIMATES OF THE PUBLIC REVENUE AND EXPENDITURES FOR THE YEAR 1834.

According to the best judgment the department is able to form on the subject, the receipts into the Treasury from all sources, during the year 1334, may be estimated at		$18,500,000 00
Viz:		
Customs	$15 000,000	
Public lands	3,000,000	
Bank dividends, and miscellaneous receipts of all kinds	500.000	
To which add the balance estimated to be in the Treasury on the 1st of January, 1834, after deducting the unavailable funds		7,983,790 90
Making together the sum of		$26,483,790 90

The expenditures for the year 1834, including the reimbursement of the whole of the public debt, are estimated at		$23,501,994 85
Viz:		
Civil, foreign intercourse, and miscellaneous	$2,800,897 33	
Military service, including fortifications, ordnance, Indian affairs, pensions, arming militia, and internal improvements	8,654,942 25	
Revolutionary pensions under act of June, 1832, including arrearages from 4th March, 1831, in cases in which payment has not been made	3,000,000 00	
Naval service, including the gradual improvement of the navy	4,051,073 19	
Public debt, principal $4,760,082 08		
Interest 235,000 00		
	4,995,082 08	
Which will leave in the Treasury on the 31st of December, 1834, a balance estimated at		$2,981,796 05

The value of the exports of the year ending on the 30th of September last, is estimated at $90,663,403, of which $70.642,030 were of domestic, and $20,021,373 of foreign articles, showing an increase in the exports of domestic produce of $7,504,560 over the exports of the same character for the year ending 30th of September, 1832, and a diminution in foreign articles of $4,018,100. The value of the imports, for the year ending on the 30th of September last, is estimated at $109,000,000, being greater, by the sum of $8,000,000, than the imports for the year ending 30th of September, 1832. Of the imports for the year ending the 30th of September last, it is estimated that $34,000,000 were in articles free from duty.

It will be seen from the foregoing statement of the receipts of the present year, that they very much exceed the amount at which they were estimated in the last annual report. The excess has been derived chiefly from customs, which are estimated to produce more than $28,000,000. The large receipts of this year have been principally occasioned by the act of July 14, 1832, which abolished the system of long credits on revenue bonds, and required the duties on woollen goods to be paid in cash, and on other articles in three and six months. The new regulations took effect on the 4th of March last, and the cash duties and shortened credits have brought into the Treasury, during the present year, a large amount of revenue, which, under the former system of credits, would not have been payable until 1834, and would have formed a part of the receipts of that year. The income of 1833 has, therefore, had the advantage of the new system, as well as the former one; and the receipts are much greater than they would have been, under either of them, according to the established rate of duties.

The expenditures for the present year have also been unusually large, and are estimated at $22,036,063 61, exclusive of the expenditure on account of the public debt.

The appropriations for the year were heavy, and exceeded, by $3,000,000 the appropriations for the year 1832; and the balances of unexpended appropriations at the close of that year have been for the most part, applied, during the present one, to the various objects authorized by law, and therefore enter into the account of its expenditures. Several items of appropriation, however for the present year, cannot be considered as forming a part of the ordinary expenditures of the Government. Without enumerating all objects of this description, it may be sufficient to mention some which have contributed materially to enhance the amount actually expended. The duties refunded at the Treasury, under the law of the last session, and the awards under the convention with Denmark, are included in this account; and the expen-

ses occasioned by the Indian aggressions in 1832, have been, for the most part paid in this year. These three items amount to nearly two millions of dollars. But when this sum is deducted from the whole annual expenditure, it shows that more than twenty millions of dollars have been expended, during the present year, for the various other objects authorized by law, exclusive of the amount set apart for the reimbursement of the four and a half per cent. stock. The pensions for life, granted under the acts of 1818 and 1832, to the officers and soldiers of the revolution, have increased considerably the annual expenditure. More than four millions of dollars have been already paid, on that account, during the present year. There is, indeed, no item in the list of appropriations, which our citizens generally more cheerfully contribute to pay, than the one last mentioned; but, in the order of nature, it must be annually decreasing; and in the estimates of the coming year, those payable under the act of June, 1832, are set down at three millions of dollars. The different sums, above mentioned, therefore, show six millions of dollars paid for purposes which cannot be considered as entering into the ordinary and regular expenses of the Government, and form no rule by which its future annual expenditure ought to be estimated.

The receipts of 1834 must be very much below those of the present year. A large portion of the receipts from customs, as already stated, has been derived from the importations of previous years. But, from the change in the system of credit, only a small part of the duties accruing in this year will go into the receipts of the next; and the diminished rate of duties, which take effect on the 1st of January next on some of the most productive articles, and the entire exemption of others, will contribute still more to reduce the receipts of the coming year, as compared with the present.

In estimating the receipts from customs for the year 1834 at fifteen millions of dollars, I have assumed that the imports of that year will nearly equal those of 1832. This estimate is higher than the average of the last five or six years, but is believed to be a safe one; for although the importations of each of the two last years were unusually large, yet the imports of the present one have gone still higher, and the general state of our commerce and the situation of the country justify the belief that there will be no serious diminution in the coming year. The condition of the mercantile classes does not indicate any excess of importations; indeed, the short credits and cash duties will be found to contribute greatly to prevent overtrading in that respect. Moreover, many articles in common use are admitted free from duty. This will produce an increased ability in the community to buy those which pay duty, and consequently a greater consumption. There appears, therefore, to be no reason to apprehend any serious diminution in the importations of 1834, and it will be safe to estimate its receipts by the standard above mentioned. Yet any material excess beyond that estimate cannot, I think, be counted on. The produce of the public lands can hardly fall short of the sum at which it has been stated, and will perhaps exceed it.

In this view of the receipts of 1834, the income of the year will about equal the estimated expenditure; and, with the aid of the balance in the Treasury on the 1st of January next, it will be sufficient for all the wants of the Government, including the amount necessary to pay off the residue of the national debt. It must, however, be observed that, in addition to the appropriations now asked for, there will be an unexpended balance of former appropriations amounting to the sum of $5,190,237 62, which will probably be required, in the course of the ensuing year, for the objects for which it has been appropriated. And if the entire amount of appropriations, proposed in the estimates for 1834, were also to be required within the year, there would not be money enough in the Treasury to meet them, after satisfying the balances above stated, and paying off the public debt. But the experience of former years shows that a portion of the appropriations may always be expected to remain unexpended at the end of the year; and the average of these unexpended balances for the last four years is about $5,300,000. In estimating

the balance in the Treasury at the close of 1834, I have therefore assumed that a portion of the estimates of expenditures, herewith submitted will not be used during the year; and that balances of appropriations, equal to the amount at the close of the present year, will in like manner remain in the Treasury at the end of the year 1834 and go into the expenses of the succeeding year; and it is not necessary to raise money for the public use sooner than it will probably be needed. But the balance stated at the end of 1834 is not to be considered as a clear surplus. It will still be chargeable with the amount of appropriations estimated to remain unexpended at that time.

From this state of the finances, and of the proposed appropriations, it is evident that a reduction of the revenue cannot at this time be made, without injury to the public service. Under the act of the last session, the receipts of 1835 will be less than those of 1834, as a further reduction in the rate of duties will take effect on the 1st of January, 1835; and if the appropriations should be kept up to the amount authorized for the present year, the charge upon the Treasury in 1835 would be more than it could probably meet. But the debt will then have been entirely paid; and if a guarded rule of appropriation is at once commenced, there will be no difficulty in bringing down the expenditure, without injury to the public service.

If the revenue is not to be reduced more than the existing laws provide for, there seems to be no sufficient reason to open at this time the vexed question of the tariff. The manner in which duties are now apportioned on different articles, would be liable to insuperable objections, if it were to be considered as a settled and permanent system. But the law is temporary on the face of it, and was intended as a compromise between conflicting interests; and unless the revenue to arise under it should hereafter be more productive than is anticipated, it will be necessary in two years from this time to impose duties on articles that are now free, in order to meet the current expenses of the Government. There would seem, therefore, to be no advantage in agitating the question at the present moment. Yet, some modifications of the existing laws will be necessary, in order to carry into effect the intentions of the Legislature, and to guard against attempts to evade its provisions, without, in any degree, affecting its principles.

It is, however, respectfully recommended that the appropriations for 1834 should be regulated by a proper regard to economy. Heretofore, the receipts to be expected could be ascertained with some degree of certainty, because they were principally derived from the imports of previous years; and the bonds taken for the duties on such imports showed the amount of receipts which might safely be counted on. But, under the new system of cash duties and short credits, each year must mainly depend for its income on its own imports. And as commerce is always more or less liable to fluctuations, the public interest requires that there should be at all times in the Treasury a sufficient sum to provide for unforeseen contingencies, and to guard against disappointment in the estimated receipts. The calculations on the income of a succeeding year are necessarily more uncertain under the present system, than under the former one of long credits. And if the anticipations of the receipts of 1834 and 1835 should be fully realized, there will not be more than ought to be provided in the estimated scale of expenditures. At the last session of Congress, the appropriations exceeded twenty one million five hundred thousand dollars, being nearly three million five hundred thousand dollars above the estimates presented at the beginning of the session. A similar amount of expenditure, authorized at the present session, might render it necessary to provide additional revenue earlier than is now contemplated.

It is understood to be conceded on all hands that a tariff for protection merely is to be finally abandoned, and that the revenue is to be reduced to the necessary wants of the Government. Various causes have contributed to enlarge the proposed expenditures for 1834, as will be seen by the particular estimates from the different departments. But it is believed that all

the objects for which this Government was established, can be effectually attained at much less annual expense hereafter; and the harmony and mutual good feeling of this extensive country will be best secured and perpetuated by rigidly confining the operations of the General Government to its appropriate sphere.

If this is done, and its expenditures are regulated by a strict economy, the burdens it imposes will scarcely be felt by our citizens, while its blessings are inestimable.

As the public debt will soon be extinguished, it is proper that the books and papers, which belong to the various loan officers, should be transmitted to the seat of Government, and placed among the archives of the nation. It is believed that the outstanding debt can be purchased on favorable terms, in the course of the ensuing year, and that it can be most conveniently purchased at the Treasury. It appears, therefore, desirable that provision should be made by law for immediately transmitting to this department all the books and papers relating to the national debt. The money can readily be remitted to the public creditor, without charge to him, or to the Government, and he can be paid at any place where he may wish to receive it.

The act of March 3d, 1817, abolished the office of Commissioner of loans, and transferred the duties to the Bank of the United States. The money necessary to pay the public creditors has, from time to time, been advanced to the Bank by the Treasury; and it appears that large sums have remained for a considerable time in the Bank, without being applied to the purposes for which they were intended. The amount has been reduced within a few months past. But the statement from the Register's office, herewith presented, will show that $773,111 98 still remained in their hands on the 1st of October last. A portion of this sum, as appears by the paper referred to, was advanced some years ago; and there is no reason why this money should continue in the hands of the Bank, where it is useless to the Government as well as to the creditor. The delay in the payment has probably, in some instances, been caused by the death of the party entitled, and the ignorance of his representatives as to his claim on the United States. The situation of these outstanding claims renders it still more necessary that the books and papers relating to the public debt should be forthwith transmitted to this department, where the proper inquiries could be made as to the cause of the delay, and measures taken to ascertain who is entitled to receive the money. As the amount is justly due from the United States to some one, and may belong to persons who are ignorant of their rights, justice seems to require that the Government should take measures to apprise them of their claims, and of the readiness of the United States to discharge them.

The destruction of the building occupied by the Treasury Department has occasioned the loss of some valuable papers. But it is believed that none have been destroyed, that can materially affect the public interest. It will become necessary to provide another building, and the loss already sustained in the documents and records of this office shows the propriety of erecting it upon a different plan from the former one, and of placing the archives of the Government in a situation less exposed to danger.

The inconveniences which are felt from the present situation of the offices connected with this department, as well as the more exposed condition of the papers, induce me to invite the early attention of Congress to this subject.

The report from the Commissioner of the General Land Office is herewith presented, showing the condition of that branch of the public service, and containing suggestions for its improvement.

All of which is respectfully submitted,

R. B. TANEY, *Secretary of the Treasury*

Hon. ANDREW STEVENSON,
Speaker of the House of Representatives of the United States.

A statement exhibiting the values and quantities, respectively, of merchandise on which duties actually accrued during the year 1832, *(consisting of the diffecence between articles paying duties imported and those entitled to drawback re-exported,) and also of the nett revenue which accrued that year from duties on merchandise, tonnage, and light money.*

OPERATIONS OF THE MINT, IN 1833

The coinage effected within the year 1833, amounts to $3,765,710; comprising $978,550 in gold coins, $2,759,000 in silver, $28,160 in copper, and consisting of 10,307,790 pieces of coin, viz.

Half eagles	193,630	pieces,	making	$968 150
Quarter eagles	4,160	do	do	10,400
Half dollars	5,206.000	do	do	2,603,000
Quarter dollars	156,000	do	do	39,000
Dismes	485,000	do	do	48,500
Half dismes	1,370,000	do	do	68,500
Cents	2,739,000	do	do	27,390
Half cents	154,000	do	do	770
Total No. of pieces,	10,307,790	Total value,		$3,765.710

Of the amount of gold coined within the past year, about $85,000 were derived from Mexico, South America, and the West Indies; $12,000 from Africa; $868,000 from the gold region of the United States, and about $13,000 from sources not ascertained.

The annexed statement exhibits the quantity of Gold received from the several districts of the United States, which have thus far produced it in quantities sufficient to be an object of regard, commencing with the year 1824. Previously to that period, gold had been received at the Mint only from North Carolina, from which quarter it was first transmitted for coinage in 1804. During the interval, however, from that date to 1823 inclusive, the average annual amount had not exceeded $2,500.

In the report of 1st January, 1833, it was remarked that the quantity of gold of the United States, brought to the Mint in the year 1832, was regarded, according to estimates entitled to great respect, as not much exceeding one-half of the quantity produced from the mines within that year; nearly an equal amount being supposed to have been exported uncoined, or consumed in the arts. Nothing has since occurred to create a doubt of the correctness of that conjecture. It is altogether probable that the remark is equally true in regard to the last year, and that the amount of gold derived from the United States within that period has exceeded one million and a half of dollars. This sum, it is believed, is not less than about one-fifth of the amount of gold produced, within the same period, from all other sources, in Europe and America, estimated according to the best authorities.

OFFICERS OF THE CUSTOMS.

The principal officer employed in the collection of the duties on imports and tonnage, is the Collector, to whom the Naval Officer is at once an aid and a check. The Surveyor superintends and directs the inferior officers of the customs, and all three are appointed by the President and Senate. They formerly held their offices for an indefinite period; but, by an act of 15th May, 1820, their appointment is now limited to four years. Weighers, Gaugers, Measurers and Inspectors are appointed by the Collector with the approbation of the principal officer of the Treasury Department For the duties of these several officers, see the act of Congress, of the 2d of March 1799. Public Appraisers are authorized by an act of the 20th of April, 1818. Their business is to appraise imported goods subject to duty ad valorem, when they are suspected to have been invoiced below the true value. They are appointed by the President and Senate, and hold their commissions during the pleasure of the President. Assistant Appraisers are authorized by the act of the 28th of May, 1830.

REVENUE CUTTERS.

The Revenue Cutters of the United States are at present nineteen in number They are under the general direction of the Treasury Department, and are employed for securing the collection of the duties imposed upon goods, wares, and merchandise imported into the United States, and on the tonnage of ships or vessels. But whenever the President shall so direct they are required to co-operate with the Navy, and they are then under the direction of the Secretary of the Navy.

Each Cutter has one Captain, not more than three Lieutenants, and not more than Seventy men, including warrant officers, gunners and seamen. The act of March 2, 1799, provides that the officers of Revenue Cutters shall, respectively, be deemed officers of the customs, and shall be subject to the direction of such collectors of the revenue, or other officers thereof, as, from time to time, shall be designated for that purpose; they shall have power and authority, and are required and directed, to go on board all ships or vessels which shall arrive within the United States, or within four leagues of the coast thereof, if bound for the United States, and to search and examine the same, and every part thereof, and to demand, receive and certify the manifests required to be on board certain ships or vessels, and to affix and put proper fastenings on the hatches and other communications with the hold of any ship or vessel, and to remain on board the said ships and vessels until they arrive at the port or place of their destination. It shall, likewise, be the duty of the master, or other person having at any time the command of any of the said revenue cutters, to make a weekly return to the collector or other officer of the district under whose direction they are placed, of the

transactions of the cutter under their command, specifying therein the vessels that have been boarded, their names and descriptions, the names of the masters, and from what port or place they last sailed, whether laden or in ballast, whether ships or vessels of the United States, or to what other nation belonging, and whether they have the neeessary manifest or manifests of their cargoes on board, and generally, all such matters as it may be necessary for the collectors, or other officers of the customs, to be made acquainted with; and the officers of the said cutters shall, likewise, execute and perform such other duties, for the collection and security of the revenue, as, from time to time, shall be enjoined and directed by the Secretary of the Treasury, not contrary to law.

The same act further directs that the Cutters and Boats, employed in the service of the revenue, shall be distinguished from other vessels by an ensign and pennant, with such marks thereon as shall be prescribed and directed by the President of the United States,* and, in case any ship or vessel, liable to seizure or examination, shall not bring to, on being required, or being chased by any cutter or boat, having displayed the pennant and ensign prescribed for vessels in the revenue service, it shall be lawful for the captain, master, or other person having command of such cutter or boat, to fire at or into, such vessel which shall not bring to, after such pennant and ensign shall be hoisted, and a gun shall have been fired by such cutter or boat as a signal; and such captain, master or other person, as aforesaid, and all persons acting by or under his direction, shall be indemnified from any penalties, or actions for damages, for so doing; and if any person shall be killed or wounded by such firing, and the captain, master, or other person aforesaid, shall be prosecuted, or arrested therefor, such captain, master or other person, shall be forthwith admitted to bail. And if any ship, vessel, or boat, not employed in the service of the revenue, shall, within the jurisdiction of the United States, carry or hoist any pennant or ensign prescribed for vessels in the service aforesaid, the master, or commander, of the ship or vessel, so offending, shall forfeit and pay one hundred dollars.

3d Lieutenants	$542 00 per annum.

LIGHT HOUSE ESTABLISHMENT.

The erection and support of Light Houses devolves on the Government of the United States, as incidental to commerce. They are provided for by an annual and specific appropriation; and are placed under the direction and control of the Secretary of the Treasury; but all the contracts for building and repairing Light Houses, supplying them with oil, placing beacons and buoys, all the accounts incidental to the establishment, as well as the salaries of the Superintendents and Keepers, and all the correspondence connected with the whole establishment is attended to in the office of the Fifth Auditor of the Treasury.

For every Light House, or Floating Light, there is a Keeper, who receives a stated salary, per annum, each of the Superintendents have, generally, several Light Houses under their direction, and receive, as a compensation for their services, a commission of two and a half per cent on the amount of their disbursements.

* Return of amount standing to the credit of Public Officers, not received.

PUBLICATION OF THE LAWS.

It is made the duty of the Secretary of State, by act of 11th May, 1820, to cause all Resolutions and Laws passed by Congress, (except such as are of a private nature) to be published in a number of newspapers, not exceeding one in the District of Columbia, and in not more than three in each State and Territory; all public Treaties are to be published in the same manner, except Indian Treaties, which are published in one paper only, and that within the State or Territory to which the subject matter of the Treaty belongs. For publishing the Laws, Resolutions, and Treaties, the Proprietors of newspapers receive, by the act of 20th April, 1818, at the rate of one dollar per page (estimated according to the act of 1820) of the pamphlet edition, published by the Secretary of State.

The following are the Newspapers authorized to publish the Laws passed at the 1st Session, of the 23d Congress.

REVENUE LAWS.

Acts relating to the Customs passed at the 1st and 2nd Sessions of the 22nd Congress.

An ACT concerning Tonnage duty on Spanish Vessels.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That no other or greater duty of tonnage be levied in the ports of the United States on vessels owned wholly by subjects of Spain, coming from a port in Spain, than shall by the Secretary of the Treasury be ascertained to have been paid on American vessels in the ports of Spain previous to the twentieth of October, one thousand eight hundred and seventeen.

Sec 2. *And be it further enacted*, That vessels owned wholly by Spanish subjects, coming from any of the colonies of Spain, either directly or after touching at any other port or place, shall pay, in the ports of the United States, the same rate of duty on tonnage that shall be levied on American vessels in the Spanish colonial port from whence such Spanish vessels shall have last departed; the said amount to be ascertained by the Secretary of the Treasury, who is hereby authorized, from time to time, to give directions to the officers of the customs of the United States for the collection of such duties, so as to conform the said duties to any variation that may take place in the duties levied on American vessels in such Spanish ports.

Sec. 3. *And be it further enacted*, That whenever the President shall be satisfied that the discriminating or countervailing duties of tonnage levied by any foreign nation on the ships or vessels of the United States, shall have been abolished, he may direct that the tonnage duty on the vessels of such nation shall cease to be levied in the ports of the United States; and cause any duties of tonnage that may have been levied on the vessels of such foreign nation, subsequent to the abolition of its discriminating duties of tonnage to be refunded.

Sec. 4. *And be it further enacted*, That the second and third sections of this act shall be in force and take effect from and after the first day of January next. [*Approved, July* 13, 1832.]

An ACT to alter and amend the several acts imposing duties on Imports.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That from and after the third day of March, one thousand eight hundred and thirty three, so much of the act entitled "An act in alteration of the several acts imposing duties on imports," approved the nineteenth May, one thousand eight hundred and twenty-eight as is herein otherwise provided for, shall be repealed, except so far as the same may be necessary for the recovery and collection of all duties which shall have accrued under the said act; and for the recovery, collection, distribution, and remission of all fines, penalties, and forfeitures, which may have been incurred under the same.

Sec. 2. *And be it further enacted*, That, from and after the third day of March, one thousand eight hundred and thirty three, in lieu of the duties now imposed by law, on the importation of the articles hereinafter mentioned, there shall be levied, collected, and paid, the following duties, that is to say:

First: Wool, unmanufactured, the value whereof, at the place of exportation, shall not exceed eight cents per pound, shall be imported free of duty; and if any wool so imported shall be fine wool mixed with dirt or other material, and thus reduced in value to eight cents per pound, or under, the appraisers shall appraise said wool at such price as in their opinion it would have cost had it not been so mixed, and a duty thereon shall be charged in conformity with such appraisal; on wool, unmanufactured, the value where-

of, at the place of exportation, shall exceed eight cents, shall be levied four cents per pound, and forty per centum ad valorem: *Provided*, That wool imported on the skin shall be estimated, as to weight and value, as other wool.

Second. On all milled and fulled cloth, known by the names of plains, kerseys, or kendal cottons, of which wool shall be the only material, the value whereof shall not exceed thirty-five cents a square yard, five per centum ad valorem; on worsted stuff goods, shawls and other manufactures of silk and worsted, ten per centum ad valorem; on worsted yarn, twenty per centum ad valorem; on woollen yarn, four cents per pound, and fifty per centum ad valorem; on mits, gloves, bindings, blankets, hosiery, and carpets and carpeting, twenty-five per centum, except Brussels, Wilton and treble ingrained carpeting, which shall be at sixty-three cents the square yard, all other ingrained and Venetian carpeting, at thirty-five cents the square yard; and except blankets, the value whereof, at the place from whence exported, shall not exceed seventy-five cents each, the duty to be levied upon which, shall be five per centum ad valorem; on flannels, bockings, and baizes, sixteen cents the square yard; on coach laces thirty-five per centum; and upon merino shawls made of wool, all other manufactures of wool, or of which wool is a component part, and on ready made clothing, fifty per centum ad valorem.

Third. On all manufactures of cotton, or of which cotton shall be a component part, twenty-five per centum ad valorem, excepting cotton twist, yarn, and thread, which shall remain at the rate of duty fixed by the act to amend the several acts imposing duties on imports, of twenty-second May, one thousand eight hundred and twenty-four; *And provided*, That all manufactures of cotton, or of which cotton shall be a component part, not dyed, colored, printed, or stained, not exceeding in value thirty cents the square yard, shall be valued at thirty cents per square yard, and if dyed, colored, printed, or stained, in whole or in part, not exceeding in value thirty-five cents the square yard, shall be valued at thirty-five cents per square yard; and on nankeens, imported direct from China, twenty per centum ad valorem.

Fourth. On all stamped, printed or painted floor cloths, forty-three cents a square yard; on oil cloths of all kinds, other than that usually denominated patent floor cloth, twelve and a half cents the square yard; and on floor matting, usually made of flags and other materials, five per centum ad valorem.

Fifth. On iron, in bars or bolts, not manufactured in whole or in part by rolling, ninety cents per one hundred and twelve pounds.

Sixth. On bar and bolt iron, made wholly or in part by rolling, thirty dollars per ton: *Provided*, That all iron in slabs, blooms, or other form less finished than iron in bars or bolts, and more advanced than pig iron, except castings, shall be rated as iron in bars or bolts, and pay duty accordingly.

Seventh. On iron in pigs, fifty cents per one hundred and twelve pounds; on vessels of cast iron, not otherwise specified, one and a half cents per pound; on all other castings of iron, not otherwise specified, one cent per pound.

Eighth. On iron or steel wire, not exceeding number fourteen, five cents per pound; exceeding number fourteen, nine cents per pound; on silvered or plated wire, five per centum ad valorem; on cap or bonnet wire covered with silk, cotton, flaxen, yarn or thread, manufactured abroad, twelve cents per pound.

Ninth. On round iron or braizer's rods, of three-sixteenths to eight-sixteenths of an inch diameter, inclusive, and on iron in nail or spike rods, or nail plates, slit, rolled, or hammered, and on iron in sheets, and hoop iron, and on iron, slit, rolled, or hammered for band iron, scroll iron, or casement rods, three cents per pound; on iron spikes, four cents per pound; on iron nails, cut or wrought, five cents per pound; on tacks, brads, and sprigs, not exceeding sixteen ounces to the thousand, five cents per thousand; exceeding sixteen ounces to the thousand, five cents per pound; on square wire used for the manufacture of stretchers for umbrellas, and cut in pieces not

exceeding two cents, and therefor, twelve per centum ad valorem; on anvils and anchors, and all parts thereof, manufactured in whole or in part, two cents per pound; on iron cables or chains, or parts thereof, manufactured in whole or in part, three cents per pound; and no drawback shall be allowed on the exportation of iron cables or parts thereof; on mill cranks and mill irons of wrought iron, four cents per pound; on mill saws, one dollar each; on blacksmith's hammers and sledges, two and a half cents per pound; on muskets, one dollar and fifty cents per stand; on rifles, two dollars and fifty cents each; on all other fire-arms, thirty per centum ad valorem.

Tenth. On axes, adzes, hatchets, drawing knives, cutting knives, sickles or reaping hooks, scythes, spades, shovels, squares of iron or steel, plated brass and polished steel saddlery, coach and harness furniture, of all descriptions, steelyards and scalebeams, socket chisels, vices and screws of iron, called woodscrews, thirty per centum ad valorem; on common tinned and japanned saddlery of all descriptions, ten per centum ad valorem; *Provided*, That said articles shall not be imported at a less rate of duty than would have been chargeable on the material constituting their chief value, if imported in an unmanufactured state.

Eleventh On steel, one dollar and fifty cents per one hundred and twelve pounds.

Twelfth. On japanned wares of all kinds, on plated wares of all kinds, and on all manufactures, not otherwise specified made of brass, iron, steel, pewter, or tin, or of which either of these metals is a component material, a duty of twenty-five per centum ad valorem: *Provided*, That all articles manufactured in whole of sheet, rod, hoop, bolt, or bar iron, or of iron wire, or of which sheet, rod, hoop, bolt, or bar iron, or iron wire, shall constitute the greatest weight, and which are not otherwise specified, shall pay the same duty per pound that is charged by this act on sheet, rod, hoop, bolt, or bar iron, or on iron wire, of the same number, respectively *Provided also*, That the said last mentioned rates shall not be less than the said duty of twenty-five per centum ad valorem

Thirteenth. That all scrap and old iron shall pay a duty of twelve dollars and fifty cents per ton; that nothing shall be deemed old iron that has not been in actual use, and fit only to be re-manufactured: and all pieces of iron, except old, of more than six inches in length, or of sufficient length to be made into spikes and bolts, shall be rated as bar, bolt, rod, or hoop iron, as the case may be, and pay duty accordingly; all manufactures of iron, partly finished, shall pay the same rates of duty as if entirely finished; all vessels of cast iron, and all castings of iron, with handles, rings, hoops, or other addition of wrought iron, shall pay the same rates of duty as if made entirely of cast iron.

Fourteenth On unmanufactured hemp, forty dollars per ton; sail duck, fifteen per centum ad valorem; and on cotton bagging, three and a half cents a square yard, without regard to the weight or width of the article: On felts or hat bodies made wholly, or in part of wool, eighteen cents each.

Fifteenth. On all manufactures of silk, or of which silk shall be a component part, coming from beyond the Cape of Good Hope, ten per centum ad valorem, and on all other manufactures of silk, or of which silk is a component part, five per centum ad valorem, except sewing silk, which shall be forty per centum ad valorem.

Sixteenth. On brown sugar and sirup of sugar cane, in casks, two and a half cents per pound; and on white clayed sugar, three and one-third cents per pound.

Seventeenth On salt, ten cents per fifty-six pounds.

Eighteenth On old and scrap lead, two cents per pound.

Nineteenth On teas of all kinds, imported from places this side of the Cape of Good Hope, or in vessels other than those of the United States, ten cents per pound

Twentieth. On slates of all kinds, twenty five per centum ad valorem.

Twenty-first. On window glass not above eight by ten inches in size, three dollars per hundred square feet; not above ten by twelve inches, three dollars and fifty cents per hundred square feet; and if above ten by twelve inches, four dollars per hundred square feet: *Provided*, That all window glass imported in plates, uncut, shall be charged with the highest rates of duty hereby imposed. On all apothecaries' vials and bottles, exceeding the capacity of six and not exceeding the capacity of sixteen ounces each, two dollars and twenty-five cents the groce; all perfumery and fancy vials and bottles, not exceeding the capacity of four ounces each, two dollars and fifty cents the groce; and those exceeding four ounces, and not exceeding sixteen ounces each, three dollars and twenty-five cents the groce: on all wares of cut glass not specified, three cents per pound, and thirty per centum ad valorem: on black glass bottles not exceeding one quart, two dollars per groce: on black glass bottles exceeding one quart, two dollars and fifty cents per groce, on demijohns, twenty-five cents each, and on all other articles of glass not specified, two cents per pound, and twenty per centum; on paper hangings, forty per centum: on all Leghorn hats or bonnets, and all hats or bonnets of straw, chip, or grass, and all flats, braids, or plaits for making hats or bonnets, thirty per centum: on the following articles twelve and a half per centum ad valorem, namely, whalebone, the product of foreign fishing, raw silk, and dressed furs; and on the following articles twenty-five per centum ad valorem, namely, boards, planks, and walking canes and sticks, frames or sticks for umbrellas and parasols, and all manufactures of wood not otherwise specified; copper vessels, and all manufactures of copper, not otherwise specified; all manufactures of hemp or flax, except yarn and cordage, tarred and untarred, ticklenburgs, osnaburgs, and burlaps, not otherwise specified; fans, artificial flowers, ornamental feathers, ornaments for head dresses, caps for women, and millinery of all kinds; comfits and sweet meats of all kinds, preserved in sugar or brandy, umbrellas and parasols of whatever materials made; parchment and vellum, wafers and black lead pencils, and brushes of all kinds. And on the following articles thirty per centum ad valorem, viz: cabinet wares; hats, and caps of fur, leather, or wool; leather, whips, bridles, saddles, and on all manufactures of leather not otherwise specified; carriages and parts of carriages, and blank books; on boots and bootees, one dollar and fifty cents per pair; shoes of leather, other shoes and slippers of prunella, stuff, or nankin; also, porcelain, china, stone, and earthen ware; musical instruments; and manufactures of marble, shall pay the present rates of duties.

Twenty-second. On olive oil, in casks, twenty cents a gallon.

Twenty-third. On the wines of France, namely, red wines, in casks, six cents a gallon; white wines, in casks, ten cents a gallon, and French wines of all sorts in bottles, twenty-two cents a gallon; until the third day of March, eighteen hundred and thirty-four; and from and after that day one half of those rates respectively; and on all wines other than those of France one-half of their present rates of duty, respectively, from and after the day last aforesaid, *Provided*, That no higher duty shall be charged under this act or any existing law on the red wines of Austria than are now or may be, by this act levied upon red wines of Spain when the said wines are imported in casks.

Twenty-fourth On the following articles and ad valorem duty of fifteen per centum, namely, barley, grass or straw baskets, composition, wax, or amber beads; all other beads not otherwise enumerated, lamp black; indigo bleached and unbleached linens; shell or paper boxes, hair bracelets, hair not made up for head dresses, bricks, paving tiles, brooms of hair or palm leaf, cashmere of Thibet, down of all kinds, feathers for beds.

Twenty-fifth All articles not herein specified, either as free or as liable to a different duty, and which, by the existing laws, pay an ad valorem duty higher than fifteen per centum, to pay an ad valorem duty of fifteen per centum, from and after the said third day of March, one thousand eight hundred and thirty-three.

SEC. 3. *And be it further enacted*, That, in addition to the articles exempted from duty by the existing law, the following articles, imported from and after the third day of March, one thousand eight hundred and thirty-three, shall be exempted from duty; that is to say, teas of all kinds imported from China or other places east of the Cape of Good Hope, and in vessels of the United States, coffee, cocoa, almonds, currants, prunes, figs, raisins in jars and boxes, all other raisins, black pepper, ginger, mace, nutmegs, cinnamon, cassia, cloves, pimento, camphor, crude saltpetre, flax unmanufactured, quicksilver, opium, quills unprepared, tin in plates and sheets, unmanufactured marble, argol, gum arabic, gum senegal, epaulettes of gold and silver, lac dye, madder, madder root, nuts and berries used in dying, saffron, turmeric, woad or pastel; aloes, ambergris, Burgundy pitch, bark, Peruvian, cochineal, capers, chamomile flowers, coriander seed, cantharides, castanas, catsup, chalk, coculus indicus, coral, dates, filberts, filtering stones, frankincense, grapes, gamboge, hemlock, henbane, horn plates for lanthorns, ox horns, other horns and tips, India rubber, ipecacuanha, ivory unmanufactured, juniper berries, musk, nuts of all kinds, olives, oil of juniper, paintings and drawings, rattans unmanufactured, reeds unmanufactured, rhubarb, rotten stone, tamarinds, tortoise shell, tin foil, shellac, sponges, sago, lemons, limes, pine apples, cocoa nuts and shells, iris or orris root, arrow root, bole ammoniac, colombo root, annotto, annise seed, oil of annise-seed, oil of cloves, cummin seed, sarsaparilla, balsam tolu, assafœtida, ava root, alcornoque, canella alba, cascarilla, haerlem oil, hartshorn, manna, senna, tapioca, vanilla beans, oil of almonds, nux vomica, amber, platina, busts of marble, metal or plaster, casts of bronze or plaster, strings of musical instruments, flints, kelp, kermes, pins, needles, mother of pearl, hair unmanufactured; hair pencils, Brazil paste, tartar crude, vegetables such as are used principally in dyeing and in composing dyes, weld, and all articles used principally for dyeing, coming under the duty of twelve and a half per centum, except bichromate of potash, prussiate of potash, chromate of potash, and nitrate of lead, aquafortis, and tartaric acids; all other dyeing drugs, and materials for composing dyes, all other medicinal drugs, and all articles not enumerated in this act nor the existing laws, and which are now liable to an ad valorem duty of fifteen per centum, except tartar emetic and Rochelle salts, sulphate of quinine, calomel and corrosive sublimate, sulphate of magnesia, glauber salts: *Provided*, That nothing in this act contained shall be so construed as to reduce the duties upon alum, copperas, manganese, muriatic or sulphuric acids, refined salt petre, blue vitriol, carbonate of soda, red lead, white lead or litharge, sugar of lead or combs

SEC. 4 *And be it further enacted*, That, from and after the third day of March aforesaid, so much of any act of Congress as requires the addition of ten or twenty per centum to the cost or value of any goods, wares, or merchandise in estimating the duty thereon, or as imposes any duty on such addition, shall be repealed.

SEC. 5. *And be it further enacted*, That from and after the third day of March aforesaid, where the amount of duty on merchandise, except wool, manufactures of wool, or of which wool is a component part, imported into the United States, in any ship or vessel, on account of one person only, or of several persons jointly interested, shall not exceed two hundred dollars, the same shall be paid in cash, without discount; and if it shall exceed that sum, shall, at the option of the importer or importers, be paid or secured to be paid, in the manner now required by law, one-half in three, and one half in six calendar months; and that, from and after the said third day March, so much of the sixty second section of the act entitled "An act to regulate the collection of duties on imports and tonnage,"* approved the second day of March, one thousand seven hundred and ninety-nine, as authorizes the deposite of teas under the bond of the importer or importers, shall be repealed

* Laws of the United States, Vol. 3, Chapter 128, page 136.

and that so much of any existing law as requires teas, when imported in vessels of the United States, from places beyond the Cape of Good Hope, to be weighed, marked and certified, shall be and the same is hereby repealed.

SEC 6 *And be it further enacted*, That, from and after the third day of March aforesaid, the duties on all wool, manufactures of wool, or of which wool is a component part, shall be paid in cash, without discount, or, at the option of the importer, be placed in the public stores, under bond, at his risk, subject to the payment of the customary storage and charges, and to the payment of interest at the rate of six per centum per annum while so stored: *Provided*, That the duty on the articles so stored shall be paid one-half in three, and one half in six months from the date of importation: *Provided, also*, That if any instalment of duties be not paid when the same shall have become due, so much of the said merchandise as may be necessary to discharge such instalment shall be sold at public auction, and retaining the sum necessary for the payment of such instalment of the duties, together with the expenses of safe keeping and sale of such goods, the overplus, if any, shall be returned by the collector to the importer or owner, or to his agent or lawful representative: *And provided also*, That the importer, owner, or consignee of such goods, may, at any time after the deposite shall have been made, withdraw the whole or any part thereof, on paying the duties on what may be withdrawn, and the customary storage and charges, and of interest.

SEC 7. *And be it further enacted*. That in all cases where the duty which now is, or hereafter may be imposed on any goods, wares, or merchandise imported into the United States, shall by law, be regulated by, or be directed to be estimated or levied upon, the value of the square yard, or of any other quantity or parcel thereof; and in all cases where there is or shall be imposed any ad valorem rate of duty on any goods, wares, or merchandise imported into the United States, it shall be the duty of the collector within whose district the same shall be imported or entered, to cause the actual value thereof, at the time purchased, and place from which the same shall have been imported into the United States, to be appraised, estimated, and ascertained and, the number of such yards, parcels, or quantities, and such actual value of every of them, as the case may require; and it shall in every such case, be the duty of the appraisers of the Unied States, and every of them, and every other person who shall act as such appraiser, by all the reasonable ways or means in his or their power, to ascertain, estimate, and appraise the true and actual value, any invoice or affidavit thereto to the contrary notwithstanding, of the said goods, wares, and merchandise, at the time purchased, and place from whence the same shall have been imported into the United States, and the number of such yards, parcels, or quantities, and such actual value of every of them as the case may require; and all such goods, wares, and merchandise, being manufactures of wool, or whereof wool shall be a component part, which shall be imported into the United States in an unfinished condition, shall, in every such appraisal, be taken, deemed, and estimated by the said appraisers, and every of them, and every person who shall act as such appraiser, to have been, at the time purchased, and place from whence the same were imported into the United States, of as great actual value as if the same had been entirely finished: *Provided*, That in all cases where any goods, wares, or merchandise, subject to ad valorem duty, or whereon the duty is or shall be by law regulated by, or be directed to be estimated or levied upon, the value of the square yard, or any other quantity or parcel thereof shall have been imported into the United States from a country other than that in which the same were manufactured or produced, the appraisers shall value the same at the current value thereof at the time of purchase, before such last exportation to the United States, in the country where the same may have been originally manufactured or produced.

SEC 8 *And be it further enacted*, That it shall be lawful for the appraisers to call before them, and examine, upon oath, any owner, importer, consignee,

or other person, touching any matter or thing which may be material in ascertaining the true value of any merchandise imported, and to require the production on oath, to the collector, or to any permanent appraiser, of any letters, accounts, or invoices, in his possession, relating to the same, for which purpose, they are hereby authorized to administer oaths. And if any person so called shall fail to attend, or shall decline to answer, or to produce such papers when so required, he shall forfeit and pay to the United States fifty dollars; and if such person be the owner, importer, or consignee, the appraisement which the said appraisers may make of the goods, wares, or merchandise, shall be final and conclusive, any act of Congress to the contrary notwithstanding. And any person who shall swear falsely on such examination, shall be deemed guilty of perjury; and if he be the owner, importer, or consignee, the merchandise shall be forfeited.

Sec. 9. *And be it further enacted*, That it shall be the duty of the Secretary of the Treasury, under the direction of the President of the United States, from time to time, to establish such rules and regulations, not inconsistent with the laws of the United States, as the President of the United States shall think proper, to secure a just, faithful, and impartial appraisal of all goods, wares, and merchandise, as aforesaid, imported into the United States, and just and proper entries of such actual value thereof, and of the square yards, parcels, or other quantities, as the case may require, and of such actual value of every of them; and it shall be the duty of the Secretary of the Treasury to report all such rules and regulations, with the reasons therefor, to the then next session of Congress.

Sec. 10. *And be it further enacted*, That an addition of ten per centum shall be made to the several rates of duties by this act imposed, in respect to all goods, wares, and merchandise, on the importation of which, in American or foreign vessels, a specific discrimination has not already been made, which, from and after the third day of March aforesaid, shall be imported in ships or vessels not of the United States: *Provided*, That this additional duty shall not apply to goods, wares, and merchandise which shall be imported after said day in ships or vessels not of the United States, entitled by treaty, or by an act or acts of Congress, to be entered in the ports of the United States, on the payment of the same duties as shall then be paid on goods, wares, and merchandise imported in ships or vessels of the United States.

Sec. 11. *And be it further enacted*, That there shall be allowed a drawback of the duties by this act imposed, on goods, wares, and merchandise, which shall be imported from and after the said third day of March, upon the exportation thereof within the time and in the manner prescribed in the existing laws at the time: *Provided*, no drawback shall be allowed on a less quantity of cordage than five tons.

Sec. 12. *And be it further enacted*, That the existing laws at the time shall extend to, and be in force for, the collection of the duties imposed by this act, on goods, wares, and merchandise which shall be imported into the United States from and after the said third day of March; and for the recovery, collection, distribution, and remission of all fines, penalties, and forfeitures, and for the allowance of drawbacks by this act authorized, as fully and effectually as if every regulation, restriction, penalty, forfeiture, provision, clause, matter, and thing in the then existing laws contained, had been inserted in, and re-enacted by this act; and that so much of any act which is contrary to this act, shall be, and the same is hereby repealed.

Sec. 13. *And be it further enacted*, That whenever goods composed wholly or in part of wool or cotton, of similar kind, but different quality, are found in the same packages, charged at an averaged price, it shall be the duty of the appraisers to adopt the value of the best article contained in such package and so charged, as the average value of the whole; and that so much of the act entitled "An act for the more effectual collection of the impost duties,"*

*Acts 1st Session, 21st Congress, page 105.

a, proved the twenty eighth May, one thousand eight hundred and thirty, as requires the appraisers to adopt the value of the best article contained in a package as the average value of the whole, be, and the same is hereby repealed.

Sec 14. *And be it further enacted.* That whenever, upon the opening and examination of any package or packages of imported goods, composed wholly, or in part, of wool or cotton, in the manner provided by the fourth section of the act for the more effectual collection of the impost duties, approved on the twenty-eight day of May, one thousand eight hundred and thirty, the said goods shall be found not to correspond with the entry thereof at the custom house; and if any package shall be found to contain any article not entered, such article shall be forfeited; or if the package be made up with intent to evade or defraud the revenue, the package s all be forfeited; and so much of the said section as prescribes a forfeiture of goods found not to correspond with the invoice thereof, be, and the same is hereby, repealed.

Sec 15. *And be it further enacted*, That, from and after the said third day of March one thousand eight hundred and thirty-three, the ad valorem rates of duty on goods, wares, and merchandise, shall be estimated in the manner following: to the actual cost, if the same shall have been actually purchased, or the actual value, if the same shall have been procured other wise than by purchase, at the time and place when and where purchased, or otherw se procured, or to the appraised value, if appraised, shall be added all charges, except insuran e

Sec. 16. *And be it further enacted*, That from and after the said third day of March, one thousand eight hundred and thirty-three, in calculating the rates of duties, the pound sterling shall be considered and taken as of the value of four dollars and eighty cents

Sec. 17. *And be it further enacted*, That syrup imported in casks, and all syrup for making sugar, shall be rated by weight, and pay the same duty as the sugar of which it is composed would pay in its natural state; and that loaf or lump sugar, when imported in a pulverized, liquid or other form, sh ll pay the same duty as is imposed by law on loaf or lump sugar; and all fossil and crude mineral salt shall pay fifteen per centum ad valorem.

Sec. 18 *And be it further enacted*, That the several articles enumerated in this bill, whether imported before or after the passage thereof, may be put into the custom-house stores, under the bond of the importer or owner; and such of said articles as shall remain under the control of the proper officer of the customs on the third day of March, eighteen hundred and thirty-three, shall be subject to no other duty than if the same were imported, respectively, after that day. And if the duties or any part thereof on the articles deposited as aforesaid shall have been paid previous to the said third day of March, the amount so paid shall be refunded to the person importing and depositing the said articles: *Provided*, That this section shall apply to merchandise in original packages which may have been entered and taken into possession of the importer or owner; upon condition that the said merchandise be placed under the custody of the proper officer of the customs, and that the same shall remain under his control on the third day of March next: *And provided further*, That the Secretary of the Treasury be authorized to prescribe such rules and regulations as may be necessary to carry this section into effect.

[*Approved, July* 14, 1832]

An Act to modify the act of the fourteenth of July, one thousand eight hundred and thirty two, and all other acts imposing duties on Imports.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress Assembled, That from and after the thirty-first of December, one thousand eight hundred and thirty-three, in all cases where duties are imposed on foreign imports by the act of the fourteenth day of July, one thousand eight hundred and thirty-two, entitled "An act to alter

and amend the several acts imposing duties on imports," or by any other act, shall exceed twenty per centum on the value thereof, one tenth part of such excess shall be deducted; from and after the thirty-first day of December, one thousand eight hundred and thirty-five, another tenth part thereof shall be deducted; from and after the thirty-first day of December, one thousand eight hundred and thirty-seven, another tenth part thereof shall be deducted; from and after the thirty-first day of December, one thousand eight hundred and thirty-nine, another tenth part thereof shall be deducted; and from and after the thirty-first day of December, one thousand eight hundred and forty-one, one half of the residue of such excess shall be deducted; and from and after the thirtieth day of June, one thousand eight hundred and forty-two, the other half thereof shall be deducted

Sec. 2. *And be it further enacted*, That so much of the second section of the act of the fourteenth of July aforesaid, as fixes the rate of duty on all milled and fulled cloth, known by the names of plains, kerseys, or kendal cottons, of which wool is the only material, the value whereof does not exceed thirty-five cents a square yard, at five per centum ad valorem, shall be and the same is hereby, repealed. And the said articles shall be subject to the same duty of fifty per centum, as is provided by the said second section for other manufactures of wool; which duty shall be liable to the same deductions as are prescribed by the first section of this act.

Sec 3. *And be it further enacted*, That, until the thirtieth day of June, one thousand eight hundred and forty-two, the duties imposed by existing laws, as modified by this act, shall remain and continue to be collected. And from and after the day last aforesaid, all duties upon imports shall be collected in ready money; and all credits now allowed by law, in the payment of duties shall be, and hereby are abolished; and such duties shall be laid for the purpose of raising such revenue as may be necessary to an economical administration of the Government; and from and after the day last aforesaid, the duties required to be paid by law on goods, wares, and merchandise, shall be assessed upon the value thereof at the port where the same shall be entered, under such regulations as may be prescribed by law

Sec. 4. *And be it further enacted*, That, in addition to the articles now exempt by the act of the fourteenth of July, one thousand eight hundred and thirty-two, and the existing laws, from the payment of duties, the following articles imported from and after the thirty first day of December, one thousand eight hundred and thirty three, and until the thirtieth day of June, one thousand eight hundred and forty-two, shall also (be) admitted to entry, free from duty, to wit: bleached and unbleached linens, table linen, linen napkins, and linen cambrics, and worsted stuff goods, shawls and other manufactures of silk and worsted, manufactures of silk, or of which silk shall be the component material of chief value, coming from this side of the Cape of Good Hope, except sewing silk.

Sec. 5. *And be it further enacted*, That from, and after the said thirtieth day of June, one thousand eight hundred and forty-two, the following articles shall be admitted to entry, free from duty, to wit: indigo, quicksiver, sulphur, crude salt petre, grind stones, refined borax, emory, opium, tin in plates and sheets, gum Arabic, gum Senegal, lac dye, madder, madder root, nuts and berries used in dying, saffron, tumeric, woad or pastel, aloes, ambergris, Burgundy pitch, cochineal, camomile flowers, coriander seed, catsup, chalk, cocculus indicus, horn plates for lanthers, ox horns, other horns and tips, India rubber, manufactured ivory, juniper berries, musk, nuts of all kinds, oil of juniper, unmanufactured rattans and reeds, tortoise shell, tin foil, shellac, vegatables used principally in dying and composing dyes, weld, and all articles employed chiefly for dying, except allum, copperas, bichromate of potash, prussiate of potash, chromate of potash, and nitrate of lead, aqua fortis, and tartaric acids And all imports on which the first section of this act may operate, and all articles now admitted to entry is free from duty, or paying a less rate of duty than twenty per centum ad valorem, before the said

thirtieth day of June, one thousand eight hundred and forty-two, from and after that day may be admitted to entry subject to such duty, not exceeding twenty per centum ad valorem, as shall be provided for by law.

SEC. 6. *And be it further enacted*, That so much of the act of the fourteenth day of July, one thousand eight hundred and thirty two, or of any other act as is inconsistent with this act, shall be, and the same is hereby, repealed: *Provided*, That nothing herein contained shall be so construed as to prevent the passage, prior or subsequent to the said thirtieth day of June, one thousand eight hundred and forty two, of any act or acts, from time to time, that may be necessary to detect, prevent, or punish evasions of the duties on imports imposed by law, nor to prevent the passage of any act, prior to the thirtieth day of June, one thousand eight hundred and forty-two, in the contingency either of excess or deficiency of revenue, altering the rates of duties on articles which, by the aforesaid act of fourteenth day of July, one thousand eight hundred and thirty-two, are subject to a less rate of duty than twenty per centum ad valorem, in such manner as not to exceed that rate, and so as to adjust the revenue to either of the said contingencies.

[*Approved*, *March* 2, 1833.]

An ACT to explain and amend the eighteenth section of "An act to alter and amend the several acts imposing duties on imports," approved the fourteenth July, one thousand eight hundred and thirty-two.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That all articles upon which the duties were reduced by "An act to alter and amend the several acts imposing duties on imports," approved the fourteenth July, one thousand eight hundred and thirty-two, and which may not have been deposited under the provisions of the eighteenth section of the act aforesaid, whether the said articles were imported, or the duties thereon were secured or paid, before or after the passage of said act, may, to obtain the benefit of said act and this amendment thereto, be deposited at any time before the first of April, next in the custom house stores, or in the manner prescribed in the following section, by the importer, consignee, or any subsequent purchaser or owner, and all wines now in bond, or which may be imported at any time previous to the fourth day of March one thousand eight hundred and thirty-four, and which may remain in the custody of the customs on that day, shall be entitled to the benefit of this act, and of that to which it is an amendment: *Provided*, That no merchandise imported in packages, bales, or casks, shall be entitled to the benefit of this act, or of that to which it is an amendment, unless they are as originally imported: and that all articles placed in the custody of the customs under this act shall so remain, for inspection and examination, till the fourth day of March, next: *Provided, also*, That nothing contained in this act shall be so construed as to extend the provisions thereof to any merchandise, which under the existing laws would not be entitled to the benefits of drawback

SEC. 2. *And be it further enacted*, That, in all cases where the quantity of merchandise, entitled to the benefits of the acts aforesaid shall exceed ten packages, bales, or casks, or where the article may be in bulk, or otherwise than in packages, bales, or casks, the collector of the district where the same may be, is hereby authorized to direct that the said merchandise shall not be removed from the warehouse of the owner, but that the same shall be there placed in the custody of a proper officer of the customs, who shall examine the same, and keep them under the keys of the custom house, till the first of April, as aforesaid: *Provided*, The collector shall consider the same a safe place of deposite, and that application be made to him for that purpose on or before the twenty-fifth March next.

SEC. 3. *And be it further enacted*, That all articles remaining under the control of the proper officer of the customs, according to the provisions of this act, on the first of April, next, and all wines which shall remain in the

same manner after the fourth day of March, one thousand eight hundred and thirty-four, shall be subject to no higher duty than would be levied under the act aforementioned, approved the fourteenth of July last; and if any higher duty shall have been paid, such excess shall be refunded, out of any money in the Treasury not otherwise appropriated, to the person placing the same in the custody of the customs, and any outstanding bond or bonds which may have been given for duties on the same shall be cancelled; and if a sum equal to the amount of duties levied by the said act of the fourteenth July, shall not have been collected, and the bond or bonds given shall amount to more than the duties imsosed by said act, the Secretary of the Treasury shall direct that a debenture certificate or certificates, the form of which shall be prescribed by him, for such excess of duty, shall be issued to the persons placing the same in the custody of the customs, payable out of the bond, or bonds given for duties on the same, the collectors to give the debtors credit on their bonds for the difference below the high and low duties, and to cancel the bonds on payment of the balance.

Sec. 4. *And be it further enacted*, That the Secretary of the Treasury, shall cause the amount of excess of duties, as aforesaid, to be ascertained and paid, or the credit given as the case may be, as soon as practicable after the first of April next; and that he shall be authorized to cause all articles under the control of the proper officers of the customs to be examined; and where the merchandise may have passed out of the possession of the importer or consignee, to require satisfactory evidence of the transfer or transfers to identify the same; and to make all other rules and regulations which may be necessary and proper to carry this act into effect.

Sec. 5. *And be it further enacted*, That the Secretary of the Treasury is hereby authorized and directed to extend relief to all persons, whose cases are provided for in this act, who may have been deprived of the benefit thereof in consequence of the collectors not having received his instructions in pursuance of it, from the Secretary of the Treasury.

Sec. 6. *And be it further enacted*, That the seventeenth section of the aforesaid act of the fourteenth day of July, one thousand eight hundred and thirty-two as far as the same relates to the duty on pulverized or crushed sugar, shall take effect on the fourth day of March, of the present year.

[*Approved*, *March* 2, 1833.

An ACT to explain and amend the act to alter and amend the several acts imposing duties on imports passed July fourteenth, one thousand eight hundred and thirty two, so far as relates to hardware, and certain manufactures of copper and brass, and other articles.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the provisos of the tenth and twelfth clauses of the second section of the act to alter and amend the several acts imposing duties on imports, passed July fourteenth, eighteen hundred and thirty-two, be, and the same are hereby suspended until the first day of June, eighteen hundred and thirty-four.

Sec. 2. *And be it further enacted*, That, so much of the act to alter and amend the several acts imposing duties on imports, passed July the fourteenth eighteen hundred and thirty-two, as repeals the duties heretofore levied on copper bottoms cut round, and copper bottoms raised to the edge, and still bottoms cut round and turned upon the edge, and parts thereof, and on copper plates or sheets, weighing more than thirty-four ounces per square foot, commonly called braziers copper, and on tobacco leaves, or unmanufactured, be, and the same is hereby repealed.

Sec. 3. *And be it further enacted*, That, nothing contained in the act, of the fourteenth of July, eighteen hundred and thirty-two, to alter and amend the several acts imposing duties on imports, shall be so construed as to authorize the exemption, from the payment of duty on sheet and rolled brass, but the same shall be charged with the payment of a duty of twenty-five per centum ad valorem. [*Approved*, *March* 2, 1833.]

An ACT further to provide for the collection of duties on imports.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That whenever, by reason of unlawful obstructions, combinations, or assemblages, of persons, it shall become impracticable, in the judgment of the President, to execute the revenue laws and collect the duties on imports in the ordinary way, in any collection district, it shall and may be lawful for the President to direct that the custom house for such district be established and kept in any secure place within some port or harbor of such district, either upon land or upon board any vessel; and, in that case, it shall be the duty of the collector to reside at such place, and there to detain all vessels and cargoes arriving within the said district until the duties imposed on said cargoes, by law, be paid in cash, deducting interest according to existing laws; and in such cases it shall be unlawful to take the vessel or cargo from the custody of the proper officer of the customs, unless by process from some Court of the United States; and in case of any attempt otherwise to take such vessel or cargo by force, or combination, or assemblage of persons too great to be overcome by the officers of the customs, it shall and may be lawful for the President of the United States, or such person or persons as he shall have empowered for that purpose, to employ such part of the land or naval forces, or militia of the United States as may be deemed necessary for the purpose of preventing the removal of such vessel or cargo and protecting the officers of the customs in retaining the custody thereof.

SEC. 2. *And be it further enacted*, That the jurisdiction of the Circuit Courts of the United States shall extend to all cases, in law or equity, arising under the revenue laws of the United States, for which other provisions are not already made by law; and if any person shall receive any injury to his person or property for or on account of any act by him done, under any law of the United States, for the protection of the revenue or the collection of duties on imports, he shall be entitled to maintain suit for damage therefor in the Circuit Court of the United States in the district wherein the party doing the injury may reside, or shall be found. And all property taken or detained by any officer or other person under authority of any revenue law of the United States shall be irrepleviable, and shall be deemed to be in the custody of the law, and subject only to the orders and decrees of the Courts of the United States having jurisdiction thereof. And if any person shall dispossess or rescue, or attempt to dispossess or rescue, any property so taken or detained as aforesaid, or shall aid or assist therein, such person shall be deemed guilty of a misdemeanor, and shall be liable to such punishment as is provided by the twenty-second section of the act for the punishment of certain crimes against the United States, approved the thirtieth day of April, anno Domini one thousand seven hundred and ninety, for the wilful obstruction or resistance of officers in the service of process.

SEC. 3. *And be it further enacted*, That in any case where suit or prosecution shall be commenced in a Court of any State against any officer of the United States, or other person, for or on account of any act done under the revenue laws of the United States, or under color thereof, or for or on account of any right, authority, or title, set up or claimed by such officer, or other person, under any such law of the United States, it shall be lawful for the defendant in such suit, or prosecution, at any time before trial, upon a petition to the Circuit Court of the United States, in and for the district in which the defendant shall have been served with process, setting forth the nature of said suit or prosecution, and verifying the said petition by affidavit together with a certificate signed by an attorney or counsellor at law of some Court of record of the State in which such suit shall have been commenced, or of the United States, stating forth that, as counsel for the petitioner, he has examined the proceedings against him, and has carefully inquired into all the matters set forth in the petition, and that he believes the

same to be true; which petition, affidavit, and certificate, shall be presented to the said Circuit Court, if in session, and if not, to the clerk thereof, at his office, and shall be filed in said office, and the cause shall thereupon be entered on the docket of said Court, and shall be thereafter proceeded in as a cause originally commenced in that Court; and it shall be the duty of the clerk of said Court, if the suit were commenced in the Court below by summons, to issue a writ of certiorari to the State Court, requiring said Court to send to the said Circuit Court the record and proceedings in said cause; or if it were commenced by capias, he shall issue a writ of habeas corpus cum causa, a duplicate of which said writ shall be delivered to the clerk of the State Court, or left at his office by the marshal of the district, or his deputy, or some person duly authorized thereto; and, thereupon it shall be the duty of the said State Court to stay all further proceedings in such cause, and the said suit, or prosecution, upon delivery of such process, or leaving the same as aforesaid, shall be deemed and taken to be moved to the said Circuit Court, and any further proceedings, trial or judgment therein in the State Court shall be wholly null and void. And if the defendant in any such suit be in actual custody on mesne process therein, it shall be the duty of the marshal, by virtue of the writ of habeas corpus cum causa, to take the body of the defendant into his custody, to be dealt with in the said cause according to the rules of law and the order of the Circuit Court, or of any judge thereof, in vacation. And all attachments made and all bail and other security given upon such suit, or prosecution, shall be and continue in like force and effect, as if the same suit or prosecution, had proceeded to final judgment and execution in the State Court. And if, upon the removal of any such suit, or prosecution, it shall be made to appear to the said Circuit Court that no copy of the record and proceedings therein, in the State Court, can be obtained, it shall be lawful for said Circuit Court to allow and require the Plaintiff to proceed *de novo*, and to file a declaration of his cause of action, and the parties may thereupon proceed as in actions originally brought in said Circuit Court; and on failure of so proceeding, judgment of *non pros.* may be rendered against the plaintiff with costs for the defendant.

Sec 4 *And be it further enacted*, That in any case in which any party is or may be by law, entitled to copies of the record and proceedings in any suit or prosecution in any State Court, to be used in any court of the United States, if the clerk of said State Court, shall, upon demand, and the payment or tender of the legal fees, refuse or neglect to deliver to such party certified copies of such record and proceedings, the Court of the United States in which such record and proceedings may be needed, on proof, by affidavit, that the clerk of such State Court has refused or neglected to deliver copies thereof, on demand as aforesaid, may direct and allow such record to be supplied by affidavit, or otherwise, as the circumstance of the case may require and allow; and, thereupon, such proceeding, trial, and judgment, may be had in the said Court of the United States, and all such processes awarded, as if certified copies of such records and proceedings had been regularly before the said court.

Sec. 5. *And be it further enacted*, That whenever the President of the United States shall be officially informed, by the authorities of any State, or by a judge of any Circuit or District Court of the United States, in the State, that, within the limits of such State, any law or laws of the United States, or the execution thereof, or of any process from the Courts of the United States is obstructed by the employment of military force, or by any other unlawful means, too great to be overcome by the ordinary course of judicial proceeding, or by the powers vested in the marshal by existing laws, it shall be lawful for him, the President of the United States, forthwith to issue his proclamation, declaring such fact or information, and requiring all such military and other force forthwith to disperse; and if at any time after issuing such proclamation, any such opposition or obstruction shall be made, in the manner or by the means aforesaid, the President shall be, and hereby is, au-

thorized, promptly to employ such means to suppress the same, and to cause the said laws or process to be duly executed, as are authorized and provided in the cases therein mentioned by the act of the twenty-eighth of February, one thousand seven hundred and ninety-five, entitled "An act to provide for calling forth the militia to execute the laws of the Union, suppress insurrections, repel invasions, and to repeal the act now in force for that purpose;" and also, by the act of the third of March, one thousand eight hundred and seven, entitled "An act authorizing the employment of the land and naval forces of the United States in cases of insurrection"

SEC 6. *And be it further enacted*, That in any State where the jails are not allowed to be used for the imprisonment of persons arrested or committed under the laws of the United States, or where houses are not allowed to be so used, it shall and may be lawful for any marshal, under the direction of the judge of the United States for the proper district, to use other convenient places, within the limits of said State, and to make such other provision as he may deem expedient and necessary for that purpose.

SEC 7. *And be it further enacted*, That either of the justices of the Supreme Court, or a judge of any District Court of the United States, in addition to the authority already conferred by law, shall have power to grant writs of habeas corpus in all cases of a prisoner or prisoners, in jail or confinement, where he or they shall be committed or confined on, or by any authority or law, for any act done, or omitted to be done, in pursuance of a law of the United States, or any order, process, or decree, of any judge or court thereof, any thing in any act of Congress to the contrary notwithstanding. And if any person or persons to whom such writ of habeas corpus may be directed, shall refuse to obey the same, or shall neglect or refuse to make return, or shall make a false return thereto, in addition to the remedies already given by law, he or they shall be deemed and taken to be guilty of a misdemeanor, and shall, on conviction before any court of competent jurisdiction, be punished by fine, not exceeding one thousand dollars, and by imprisonment, not exceeding six months or by either, according to the nature and aggravation of the case.

SEC 8. *And be it further enacted*, That the several provisions contained in the first and fifth sections of this act, shall be in force until the end of the next session of Congress, and no longer. [*Approved, March 2, 1833.*]

[*Circular to Collectors, Naval Officers, and Surveyors*]

Treasury Department, Comptroller's Office, Dec. 26th, 1833.

SIR:—As some diversity of practice may obtain in relation to the manner of deducing the one tenth part of the excess of duties in all those cases in which the duties on goods imported from and after the thirty-first of the current month shall exceed twenty per centum on the value thereof, and as to the manner of ascertaining whether the specific rates of duty imposed by the existing laws exceed, or fall short of, twenty per centum on the value thereof, it is deemed proper, in reference to the act of 2d March, 1833, entitled "An act to modify the act of 14th July, 1832, and all other acts imposing duties on imports," to communicate the following views upon these several points:—

Supposing the dutiable value of goods, now liable to an ad valorem duty of 25 per cent., to be $500 00, the duty thereon, at that rate, would be $125 00
But the duty thereon at the rate of 20 per centum, would only be 100 00

Excess, - - - $25 00

One tenth part of such excess is $2 50, which being deducted from $125 00 leaves the sum of $122 50 as the amount of duty to be paid in the case.

Or Thus: Deduct one tenth part of the excess of 5 per cent., say one half per cent., from 25 per cent., and there remains 24½ per cent., which rate on $500, produces $122 50, as in the preceding example;

In relation to the specific rates, it will be supposed that an importation of four hundred pounds of sugar be made, the duty on which, at the existing rate of 2½ cents per pound, would be - - - - $10 00

The invoice and correct value of the sugar will be supposed to be $6 00 per one hundred pounds, making the value of the four hundred pounds to be - - - - $24 00

To which add dutiable charges, - - - - 2 00

$26 00

The duty on $26 00 at twenty per cent., would be - - $5 20

Excess of the specific over the ad valorem duty, - - $4 80

One tenth part of the excess is forty-eight cents, which being deducted from $10 00, the amount of duty at the specific rate, leaves $9 52 as the amount of duty to be paid in the case.

With a view to facilitate the transactions at the custom-houses the form of an entry to be made by an importer of goods is subjoined hereto, and forms of the following returns will be transmitted as early as it will be practicable to prepare them:

1 Form of the quarter-yearly abstracts, to be rendered by the Collectors, of goods paying ad valorem duties.

2. Similar abstract of goods now liable to specific rates of duty.

3. Form of a bond account.

From the item of forty bales of blue cottons, in the form of the importer's entry, it will be perceived that, in conformity with the decision of Mr. Secretary McLane, in his circular to the officers of the customs, under date of the 20th April last, the calculation is made on the actual or real *foreign* cost or value, instead of the assumed value, under the minimum principle.

In accordance with the usual practice of this office, I avail myself of the occasion also to communicate the decisions which have been made since the last circular, in relation to the following questions:

The act of the 14th July, 1832, in imposing duties on *blankets*, not defining the particular sizes, has given rise to some difficulty in their classification;—those the cost of which does not exceed seventy-five cents each, being entitled to an entry at an ad valorem duty of 5 per cent., whilst those costing more than seventy-five cents each, are made liable to an ad valorem duty of 25 per cent.

Under these circumstances it has been deemed the more advisable course, instead of prescribing by a Treasury regulation what size an article shall be to constitute it a *blanket* within the meaning and intention of the law, to leave that point to be determined by mercantile usage and custom, keeping in view that the goods must be of such sizes as will render them suitable for the common and general purposes for which *blankets* are used.

In relation to bonds given on the exportation of goods for the benefit of drawback, it is deemed proper to direct that, in future they be not cancelled until after the expiration of the time allowed by the 81st section of the Collection law, of 2nd March, 1799, for the production of the prescribed proofs of landing abroad, although such proofs may be produced before the expiration of such time

In relation to the following articles, it has been decided,—

1. That *bootakins* or *bootees*, having what is called a hosiery top attached to a leather sole, are now liable to $1 50 per pair.

2. That *bags* made of linen are now liable to an ad valorem duty of 25 per cent, as "*manufactures of hemp or flax.*"

3. That *gunny* and *grass bags* are free of duty.

4. That *cast iron stays or studs*, (so called,) used in making *chain cables*, are now liable to 3 cents per pound, as *parts of iron cables, manufactured in whole or in part.*

5 That *links, manufactured in whole or in part*, suitable for *chain cables* are now liable to 3 cents per pound.

6. That chain or warp, made of tow, for manufacturing carpets or carpeting, is now liable to 25 per cent ad valorem.

7, That floss silk, or tram, is entitled to an entry at an ad valorem duty of 5 per cent.

8. That camlets, composed entirely of goat or camel's hair, are free of duty.

9. That halters, for horses, made of sizal grass, are free of duty

10. That round iron, for axles for cars on rail roads and locomotive engines, are not entitled to the benefit of the act of 14th July, 1832, in relation to iron for rail roads or inclined planes.

11. That all those linens which are specified in the 3rd paragraph of the circular of the 12th of August last, imported after the 31st of the current month, will be entitled to an exemption from duty.

12. That *marrow* is free of duty.

13 That men's hats, made of silk plush, are now liable to an ad valorem duty of 30 per cent.

14 That anticorrosive lithic paint being a compound of lead and carbonate of lime or stone, is liable to 15 per cent. as a "*manufacture of lead, not otherwise specified*, or of which lead is a component material."

15. That shawls of *worsted, embroidered with silk thread*, having been decided to be now entitled to an entry at an ad valorem duty of 10 per cent., will be free after the 31st of the current month.

16 That stereotype plates are now liable to an ad valorem duty of 25 p cent.

17. That *stretchers*, for umbrellas, completely manufactured are now liable to an ad valorem duty of 25 per centum

18 That *tips* and *tops*, of *bone*, for canes and umbrellas, are free of duty.

19. That an article called *tinsel stuff*, is now liable to an ad valorem duty of 25 per cent

20. That *worsted stuff* goods, being *embroidered* with *worsted yarn*, does not affect their classification.

21. That *webbing*, composed of *cotton* and *gum elastic*, is now liable to 25 per cent.

22. That an article called "*pyrolignite of lead*," composed of acetic acid, lead, and empyrumatic oil, being, in fact, an impure sugar of lead, is liable to the duty imposed on *sugar of lead.*

(*Circular.*)

Treasury Department, Comptroller's Office, Jan. 15, 1834.

SIR:—In giving the instructions in the circular of the 26th ultimo, in relation to the item of 40 bales of blue cotton cloths, I was under the impression that, according to the views expressed by the Secretary of the Treasury, in his circular of 20th April, 1833, the reduction of duties provided for by the act of 2d March, 1833, was to be ascertained by calculating the duty of 25 per cent. imposed by the act of 14th July, 1832. on the actual or real value of this description of goods, instead of the minimum, or assumed, or artificial value of 35 cents per square yard, when costing less than that sum

The Secretary of the Treasury has, however, decided, that such was not the intention of the circular of the 20th April, 1833, and has directed that the duty of 25 per cent. imposed by the act of the 14th July, 1832, is to be calculated on the minimum principle, or assumed value of such goods; and that the duty of 20 per cent. under the act of 2d March, 1833, is to be estimated on the real or actual foreign cost or value of such goods— he difference between the two amounts thus produced constituting the excess upon which the one-tenth is to be deducted.

You will, accordingly, be pleased to make the alterations, and additions, in relation to the item of 40 bales of blue cotton cloths in the form of the importer's entry, subjoining to the circular from this office of the 26th ultimo, in the manner specified in the accompanying statement

Respectfully, JOSEPH ANDERSON, *Comptroller.*

Table of Fees of Officers of the Customs.

Under the act of 31st December, 1792, for Registering and Recording vessels

1.	For the admeasurement of every ship or vessel, of an hundred tons and under,	1 cent per ton.
2.	For the admeasurement of every ship or vessel, above 100 and not exceeding 200 tons,	$1 50
3.	For the admeasurement of every ship or vessel above 200 tons,	2 00
4	For every certificate of registry or record,	2 00
5.	For every endorsement upon a certificate of registry or record,	1 00
6	For taking every bond required by the act,	0 25

Note.—At those ports at which there is a *Collector*, *Naval Officer*, and *Surveyor*, the said fees shall be equally divided between them; where there is no *Naval Officer* two thirds to the *Collector* and one-third to the *Surveyor*; and where there is only a *Collector*, he shall receive the whole amount thereof; and where there is more than one *Surveyor* in any district each of them shall receive his proportionable part of such fees, as shall arise in the port for which he is appointed; provided, that in all cases, where the tonnage of any ship or vessel shall be ascertained by any person appointed for that purpose, such person shall be paid a reasonable compensation therefor, out of the fees aforesaid, before any distribution thereof, as aforesaid.

Under the act for enrolling and licensing vessels, passed the 18th Feb. 1793.

For admeasuring every ship or vessel in order, to the enrolment, or licensing or recording the same, if of the burthen of five tons, and less than twenty tons,	$0 50
If of twenty tons and not exceeding seventy tons,	0 75
If above seventy tons, and not exceeding one hundred tons,	1 00
If above one hundred tons,	1 50
For every certificate of enrolment,	0 50
For every endorsement on a certificate of enrolment,	0 20
For every license, and granting the same, including the bond, if not exceeding twenty tons,	0 25
If above twenty and not more than one hundred tons,	0 50
If more than one hundred tons	1 00
For every endorsement on a license,	0 20
For certifying manifests, and granting a permit for a licensed vessel to proceed from district to district—if above fifty tons,	0 25
For certifying manifests, and granting a permit for a licensed vessel to proceed from district to district—if less than fifty tons,	0 50
For receiving a certified manifest, and granting a permit, on the arrival such vessel, if less than fifty tons,	0 25
For receiving a certified manifest, and granting a permit, on the arrival of such vessel, if above fifty tons,	0 50
For certifying manifests, and granting a permit for a *registered* vessel to proceed from district to district,	1 50
For receiving a certified manifest and granting a permit, on the arrival of such *registered* vessel,	1 50
For granting a permit for a vessel carrying on the fishery, to trade at a foreign port,	0 25
For the report and entry of any foreign goods imported in such vessel,	0 25

Note—Where a *Surveyor* shall certify a manifest, or grant a permit, or receive a certified manifest, and grant a permit, the fees arising therefrom shall be received by him solely for his use, which regulation applies only to a port of delivery at which there is no other than a *Surveyor*.

All the other fees arising under the act, are to be equally divided between the *Collector*, *Naval Officer*, and *Surveyor*, where there are such officers; where there is no *Naval Officer*, two thirds to the *Collector*, and the other third to the *Surveyor*; and where there is only a *Collector*, he shall receive

he whole amount ther of; and were there is more than one *Surveyor* in any district, each of them shall receive his proportionable part of such fees, as shall arise in the port for which he is appointed: provided always that in all cases, where the tonnage of any ship or vessel shall be ascertained by any persons appointed for that purpose, such person shall receive a reasonable compensation therefore out of the fees aforesaid, before any distribution thereof as aforesaid.

Under the act to establish the compensation of the officers employed in the collection of the duties on imports and tonnage passed the 2d March, 1799.

For every entrance of any ship or vessel of one hundred tons burthen and upwards, . .	$2 50	For every permit to land goods (*a*)	20
For every clearance of any ship or vesssel of one hundred tons burthen and upwards, .	2 50	For every bond taken officially,	0 40
For every clearance of any ship or vessel under the burthen of one hundred tons, .	1 50	For every permit to land goods for exportation, which are entitled to drawback, .	0 30
For every entrance of any ship or vessel under the burthen of one hundred tons .	1 50	For every debenture, or other official certificate, .	0 20
For every post entry, .	2 00	For every bill of health, (*b*)	0 20
		For every official document (registers excepted) required by any merchant, owner or master of any vessel, not before enumerated, . .	0 20

Where a *Naval Officer* is appointed to the same port, the said fees shall be equally divided between the *Collector* and the said *Naval Officer*, the latter paying one-third the expense of the necessary stationary, and of the rent of an office, to be provided by the *Collector*, at the place assigned for his residence, &c, except the expense of fuel, office rent and necessary stationary for the *Collectors* of the districts of Salem and Beverly, Boston and Charlestown, the cities of New York, Philadelphia, and Charleston, the towns of Baltimore, Norfolk, and Portsmouth, which shall be paid three fourths by the said *Collectors*, and the other one fourth by the respective *Naval Officers* in those districts—*Provided*, that in all fees arising on the exportations of any goods on which drawbacks are allowed, shall be equally shared among the *Collectors*, *Naval Officer*, and *Surveyor*, where there are such officers at the port where the fees are paid, &c., and where there is no *Naval Officer*, such fees shall be equally divided between the *Collector* and *Surveyor*, who may be concerned in attending to such exportation, and the *Surveyors* shall pay their proportion of the expenses of stationary and printing.

To each *Surveyor*, for the admeasurement and certifying the same, of every ship or vessel of one hundred tons and under, one cent per ton; for the admeasurement of every ship or vessel above one hundred tons and not exceeding two hundred tons, one hundred and fifty cents; for every ship or vessel above two hundred tons, two hundred cents; for all other services by the act in question to be performed by such *Surveyor*, on board any ship or vessel of one hundred tons and upwards having on board goods subject to duty, three dollars; for the like services on board any ship or vessel of less than one hundred tons burthen, having on board goods liable to duty, one and a half dollars; on all vessels not having on board goods subject to duty, two thirds of a dollar. All which fees shall be paid by the master or owner of the ship or vessel in which the said services shall be performed, to the *Surveyor* by whom they shall be performed, if performed by one only for his sole benefit; but if performed by more than one, to him who shall have the first agency, to be divided in equal parts between him and the other or others by whom the said services shall be performed

Note—The fees in the preceding act are applicable exclusively to vessels

(*a*) This fee chargeable for the bond on granting a Mediterranean passport.
(*b*) This fee chargeable on granting a sea letter.

engaged in the foreign trade, and services to be performed under the collection law of the same date.

Compensation of Inspectors of the Customs, under the act of 2d March, 1799.

To each *Inspector* there shall be allowed, for every day he shall be actually employed in aid of the Customs, a sum not exceeding two dollars, and for every other person that the *Collector* may find it necessary and expedient to employ as occasional *Inspectors*, or in any other way in aid of the revenue a like sum, whilst actually so employed, not exceeding two dollars.

Note—By the act of 26th April, 1816, an additional allowance of fifty per cent. is authorized, making the maximum compensation of the *Inspectors* of the *Customs* three dollars per day—But this amount is not allowed to all the *Inspectors*—The rate in the different ports is regulated with reference to the expense of living, the responsibility of the officers, the extent of commerce, &c.

Compensation of Deputy Inspectors of the revenue, under the act of 2 *Mar* 1799.

Two cents and one half, for every cask, or package, of foreign distilled spirits, wines or teas, by them marked and returned to their respective principals.

Compensation of Measurers, under the act of 2d March, 1799.

1. For every hundred bushels of grain, . . .	$0 20
2. For every hundred bushels of salt according to the weight established by law for the payment of the duties thereon—say 56 lbs. per bushel,	0 50
3. For every hundred bushels of coal, . . .	0 60

Compensation of Weighers under the act of 2d March, 1799

For weighing every hundred and twelve pounds, and marking every cask, box or package, weighing more than 200 pounds each, except sugar, coffee, pepper, pimento, indigo, in bales, bags, mats, cannisters, or seroons, with the weight in durable characters, in the districts of Pennsylvania, New York, Boston and Charlestown, and Baltimore, one cent and a quarter: in the district of Norfolk, one cent and a half; and in other districts two cents.

Compensation of Gaugers, under the act of 2d March, 1799.

For gauging and marking every cask, to be marked in durable characters with his own name and the quantity, eight cents; for computing the contents of, and making cases containing distilled spirits and wines, three cents per case; for actually counting the number of bottles of cider, beer, ale, perry, or porter contained in any cask, or other package or packages one cent per dozen; and in proportion for any greater or lesser quantity.

Note.—To the compensations of the *Measurers*, *Weighers* and *Gaugers*, as fixed by the act of 2nd March, 1799, the act of 26th April, 1816, authorizes an additional allowance of 50 per cent.

By the act of 6th April, 1802, repealing the internal duties, the Secretary of the Treasury is authorized to designate the *Collectors* of the *Customs* who are to prepare and issue the certificates to accompany wines, distilled spirits and teas, previously prepared and issued by the supervisors of the revenue.

For the purpose of carrying said law into effect, a *Collector* of the *Customs* is designated for each State, who is entitled to a fee of 2 cents for every certificate of the kind alluded to—and the *Inspectors* of the revenue, in relation to the same service are entitled to the following fees:

1. For every certificate to accompany foreign distilled spirits,	1½ cents
2 For every certificate to accompany wines and teas. .	2½ cents

For every certificate of citizenship issued by a *Collector* to a seaman of the United States under the 4th section of the act of 28th May, 1796, the *Collector* is entitled to a fee of 25 cents; and to a like fee under the 1st section of the act of 28th February, 1803, for certifying the lists of the crews of American vessels.
